Come As You Are Jan 23 2022 "Amazingly raw and candid . . . Come As You Are is as good as rock bios get" —Billboard Nirvana came out of nowhere in 1991 to sell nearly five million copies of their landmark album Nevermind, whose thunderous sound and indelible melodies embodied all the confusion, frustration, and passion of the emerging Generation X. Come As You Are is the close-up, intimate story of Nirvana—the only book with exclusive in-depth interviews with bandmembers Kurt Cobain, Krist Noveselic, and Dave Grohl, as well as friends, relatives, former bandmembers, and associates—now updated to include a final chapter detailing the last year of Kurt Cobain's life, before his tragic suicide in April 1994.

Blade-Mounted Trailing Edge Flap Control for Bvi Noise Reduction Jun 27 2022 Numerical procedures based on the 2-D and 3-D full potential equations and the 2-D Navier-Stokes equations were developed to study the effects of leading and trailing edge flap motions on the aerodynamics of parallel airfoil-vortex interactions and on the aerodynamics and acoustics of the more general self-generated rotor blade vortex interactions (BVI). For subcritical interactions, the 2-D results indicate that the trailing edge flap can be used to alleviate the impulsive loads experienced by the airfoil. For supercritical interactions, the results show the necessity of using

a leading edge flap, rather than a trailing edge flap, to alleviate the interaction. Results for various time dependent flap motions and their effect on the predicted temporal sectional loads, differential pressures, and the free vortex trajectories are presented. For the OLS model rotor, contours of a BVI noise metric were used to quantify the effects of the trailing edge flap on the size and directivity of the high/low intensity noise region(s). Average reductions in the BVI noise levels on the order of 5 dB with moderate power penalties on the order of 18 pct. for a four bladed rotor and 58 pct. for a two bladed rotor were obtained. Full-Size Ford Restoration: 1960-1964 Oct 20 2021 Ford's full-size model change from 1959 to 1960 was seen as a big departure from the swerving lines of the 1950s. Slow to start on sales, Ford's full-size production grew year after year, peaking with 648,010 units produced in 1963. It was an all-time best for the Galaxie line and its sister nameplates. Eight appearance and performance offerings were applied to the full-size Ford line including the Fairlane, Galaxie, Ranch Wagon, Country Sedan, Country Squire, Courier, 300, and Custom, which made each car unique. With more than 2.3 million full-size Fords produced from 1960 to 1964, a restoration book for these cars has been desperately needed, and here it is! Author Colin Kleer, president of Pennsylvania's Three Rivers chapter of the Galaxie Club puts his decades of experience restoring these cars into this single volume. Featuring step-by-step procedures on body, driveline, chassis, and interior components, Kleer shows, with more than 400 photos and text, how to restore a full-size Ford to its former glory. Crucial projects such as rust repair and driveline maintenance help guarantee that your Ford will be sound and solid for years to come after the restoration. The Galaxie and its full-size stablemates continue to be a strong force at car shows and in the marketplace; they create an even deeper following for these cars. Adding a detailed restoration book to the full-size restorers' arsenal will surely aid in bringing more of these Fords back to life and back on the road.
