Sustainable Business Models Aug 08 2020 This book provides a comprehensive exploration into the identification and development of sustainable business models as well as their implementation, management and evaluation. With ever-increasing pressure on organisations to respond to societal change and improve competition through sustainable business model innovation (SBMI), this book aims to contribute to the knowledge of their design and management. The chapters explore the role of partnerships, the Internet of Things and the circular economy, among other factors, in developing SBM and how SBMI is facilitated through ideation and in entrepreneurial settings. Providing new typologies, patterns and a framework to evaluate the level of sustainability of business models, this book critically reviews existing literature on the topic to examine the potential of SBMI in research and in practice. The contributing authors employ a number of case studies and case examples to illustrate the integration of sustainable business models throughout the value chain, and their influence on wider social, environmental and business activities.

Seven Essentials for Business Success May 29 2022 Successful leaders are great teachers and successful teachers serve as models of leadership. This book enables leaders and teachers to understand and use the best practices developed by award-winning professors, each of whom teaches one of the seven areas that are essential for business success. These professors candidly discuss their successes and failures in the classroom, the mentors who inspired them, how they developed their teaching methods, their rigorous preparation for class, and the role of research in their teaching. Through descriptions of the professors in action, readers will gain an insider's perspective on their teaching skills, and witness how they teach the seven essentials for success in a variety of settings--MBA, Executive MBA, and executive education courses. The chapters also describe the daily lives (professional and personal) of the professors, and the impact they have beyond the classroom in improving organizations and society. If you are a leader or teacher--or if you are interested in the content of a business school education--this book provides an insider's perspective on the best practices used by legendary professors when teaching the seven essentials that represent the core body of knowledge for business success.

Business Success Through Service Excellence Jan 01 2020 The text is aimed at CEOs and all executive management, however the scope of the material will engage the entire organization. The authors identify the key ingredients of service excellence and show how leading companies have achieved success. Each chapter begins with a review of the key components of service excellence followed by two mini exemplar case studies that highlight how those companies have achieved success in that particular area. An introductory chapter proposes a framework based on the Unisys model that shows how companies can become customer centric, and a final chapter takes an integrative approach and features a case study from the overall winners of the Awards to highlight how this company has achieved success. An additional feature of the book is the service excellence questionnaire. Purchasers of the book are able to go online to complete the questionnaire and submit it to establish their competitive benchmark against other companies in both the same sector and across different sectors. A web site accompanies the book where updates on the category

winners are featured to ensure that current information is always available.

Achieving Successful Business Outcomes Jan 31 2020 Achieving Successful Business Outcomes: Driving High Performance & Effective Transformations in a Continuously Evolving Business Environment (978-1-003-00939-9, 346640) "The missing manual for CXOs who want to understand the reasons their growth strategies are faltering and how to reinvigorate them." Steven Sonsino, London Business School, author of *Leadership Unplugged* and *The Seven Failings of Really Useless Leaders* "A valuable and important contribution to our future relevance toolkit!" Anton Musgrave, Futurist and Senior Partner, Future World International "A timely and compelling book that demystifies what it takes to drive change in a volatile and turbulent business environment." Sudhanshu Palsule, author of *Rehumanizing Leadership, The Social Leader and Managing in Four Worlds* "Not just a compendium of practical business lessons but also a new and powerful extendable model that can be used to evolve, evaluate and execute risk-calibrated business strategies. Piyush Sharma, School of Marketing, Faculty of Business and Law, Curtin University, Australia; Associate Editor, *Marketing – Journal of Business Research*; Regional Editor – *Journal of Knowledge Management* "The framework is very innovative and relevant in today's highly competitive business environments. An important and valuable contribution to improving managerial and organizational effectiveness." Vinod Singhal, Charles W. Brady Chair, Scheller College of Business, Georgia Institute of Technology Navigating in space is exponentially more difficult than navigating on the road – because there are too many directions to investigate, too many unknowns to be prepared for and infinite pathways to chart in the galactic system. So it is with business. Business environments are extremely demanding and change continuously, precipitated by innumerable actors and conditions. Business success cannot be predicated on the pedigree of a leader or a prescribed theory alone, as start-ups have amply proven. Large companies have tried to copy nimble-footed start-ups while start-ups, after achieving a certain size, have been forced to adapt to uncharted territory. Disruptions seems to be the order of the day. This book is about achieving successful business outcomes. An aircraft has a complex dashboard of dials, where only a critical few need to be monitored continuously, and other subsets warrant attention only during specific phases of the flight. A well-modeled business can be managed successfully using a similar strategy. But the larger question is how to model a business, with closely correlated variables, to represent the reality of the environment and to allow for devising, formulating and adjusting business strategy and actions in real-time. The author uses a simple but well-researched STA-Triangle (space, time and action) model to achieve this purpose. The core of the STA model is to help navigate effectively in a rapidly changing business environment. Unlike traditional business studies that use a single lens to define business rules or organizational practices, it uses the combination of space, time and action as the driver of outcomes – something fundamental and core to human thinking across the ages. This book contains both theoretical and practical applications – the former helps propel further research and analysis and the latter helps practicing leaders confidently drive their firms forward in any environmental conditions. It will also help causal readers understand how the future is evolving and how different organizations are responding to this change. The author includes more than a hundred supporting examples and tools that help create highly incisive and unique views for calibrating strategy and execution.
