Unsinkable Nov 01 2022 Boston Whalers are the quintessential American motorboats. Born from innovation, risk, and above all hard work, their reputation for reliability, fun, and safety has changed the way the people go boating. The first Whalers hit the water in 1958, but the "Unsinkable Legend" was created with a daring launch in 1961, when Boston Whaler founder Richard "Dick" Fisher sawed a boat in half before the cameras of Life magazine -- and then piloted the back half of the hull around Wampatuck Pond in Hanson, Massachusetts. People were shocked and delighted, and the company made its mark on the history of boating by proving that it had created something altogether new and absolutely unsinkable. *Unsinkable: The History of Boston Whaler* is the first book to tell the story of these iconic boats. Published to celebrate the company's 60th anniversary, author Matthew Plunkett relays a fascinating and engaging tale beginning with how Dick Fisher came to create Boston Whaler and then detailing how the company evolved over the decades. From the original 13' hull, unflatteringly known as the "blue bathtub," to its current flagship, the 420 Outrage, this book covers the whole story of a truly American company. Drawing on dozens of interviews with employees who were there in the plants, at the dealerships, and on the boats, *Unsinkable: The History of Boston Whaler* is filled with previously untold stories as well as never before published images, including photos from the families of Dick Fisher and legendary designer Bob Dougherty, Mr. Unsinkable himself. This intimate look into the creation, culture, and ongoing legacy of Boston Whaler reveals just how influential this company has been both within the industry and for its legions of diehard fans around the world.

The Revival of the 2-stroke Engine and Studying Flex Fuel Engines Aug 18 2021 This collection is a resource for studying the history of the evolving technologies that have contributed to snowmobiles becoming cleaner and quieter machines. Papers address design for a snowmobile using the EPA test procedure and standard for off-road vehicles. Innovative technology solutions include: • Engine Design: improving the two-stroke, gas direct injection (GDI) engine • Applications of new muffler designs and a catalytic converter • Solving flex-fuel design and engine power problems The SAE International Clean Snowmobile Challenge (CSC) program is an engineering design competition. The program provides undergraduate and graduate students the opportunity to enhance their

engineering design and project management skills by reengineering a snowmobile to reduce emissions and noise. The competition includes internal combustion engine categories that address both gasoline and diesel, as well as the zero emissions category in which range and draw bar performance are measured. The goal of the competition is designing a cleaner and quieter snowmobile. The competitors' modified snowmobiles are also expected to be cost-effective and comfortable for the operator to drive.
