**The Only Guide to HVAC Sales...** Jul 31 2022 Whether you are a grassy green, brand new, junior HVAC technician trying to convince your first customer that they really do need to replace that six year old, hair encrusted air filter for ten dollars, or you're a full time, briefcase carryin', bowtie wearin', dyed in the wool snake oil salesman, trying to close the deal on a ten ton, 86 SEER, 4 stage, tri-fuel super heat pump with duel flux-capacitors in a single-wide trailer park, you have probably never been taught the basics of how to sell anything. One day a supervisor of yours just said "Jack's out today, so I need you to get over to Mrs. Fenabola's house, and sell her a furnace!" Yeah, that's the way it happened for most of us. Well, this is your chance to go back and learn those all important little details that no one ever told you about sales. Things like, where to find leads, how to speak to customers so they trust you enough to say "yes", how and when to close the sale, or what closing the sale even means! Got a clue about closing ratios? How about gross profit? Believe it or not, most salesmen don't even know if their jobs are profitable! Oh, and I know that you don't like to read too much; neither do I, so, I promise that this will be painless, teach you a few things to help increase your sales, and be at least slightly entertaining. In fact, this might actually be the easiest and most effective thing you ever do for your career! Aren't you the smarty pants now!

EPA 608 Study Guide Sep 20 2021 HVAC Training 101 is a site visited by over 100,000 enthusiasts monthly, who are interested in becoming HVAC technicians. The site initially began as the passion project of a retired HVAC technician. The site quickly gained popularity, building a strong community of aspiring HVAC technicians. Currently, it is managed by a team of ex-HVAC technicians with decades of experience in the industry. Head over to [HVACTraining101.Com](http://HVACTraining101.Com) to learn more. We began by writing about how to become certified as an HVAC technician. With rules and certifications varying for each state, it was a challenging task. We had a few friends in other states help us out, but for some states, we had to dig really deep to find the information needed. Our audience at the time was very happy with the information we provided. At this point, we started getting many questions about EPA 608 certification. Once you get the education and experience needed to become a technician, prospective employers will ask for certification to handle refrigerants. When we started writing about how to become certified, viewers again requested we write a study guide to help them prepare for the 608 exams. The study guides out there were dense and had much more information than was needed to pass the test. This inspired us to embark on a journey to write the simplest study guide for the EPA 608 exam, which would still cover all the necessary information. We hope we have achieved our intended objective. The journey to becoming an HVAC technician can be long and arduous. We congratulate you on taking this path and wish you the best in cracking the EPA 608 exam.
