Two Centuries of Lewis and Clark Feb 11 2021 The landscape encountered by the Corps of Discovery during their multi-year, cross-country trek to the Pacific was dramatically different from the one that greeted visitors attending Portland's Lewis and Clark Centennial Exposition in 1905 or the one that exists in the Pacific Northwest today. On the occasion of the bicentennial of the Lewis and Clark expedition and the

centennial of the Lewis and Clark Centennial Exposition, the time is ripe for reconciling those earlier events with present-day activities. In *Two Centuries of Lewis and Clark*, William L. Lang and Carl Abbott have collaborated to address those issues. Lang scrutinizes the motivations for the Lewis and Clark expedition and the environmental ramifications of its discoveries on the people and the landscape of the Columbia River Basin. Abbott examines the ways in which the Lewis and Clark Exposition advanced President Jefferson's goal of developing the

economic potential of the Pacific Northwest, particularly through the exploitation of the region's abundant natural resources. William L. Lang is professor of history at Portland State University; he is the author of a number of books including *A Confederacy of Ambition: William Winlock Miller and the Making of Washington Territory*. Carl Abbott is professor of urban studies and planning at Portland State University and author of several books, among them *The Metropolitan Frontier: Cities in the Modern American West*. return, the vuelta. Four ships set out from Navidad, each one carrying a dream team of navigators. The smallest ship, guided by seaman Lope Martín, a mulatto who had risen through the ranks to become one of the most qualified pilots of the era, soon pulled far ahead and became mysteriously lost from the fleet. It was the beginning of a voyage of epic scope, featuring mutiny, murderous encounters with Pacific islanders, astonishing physical hardships-- and at last a triumphant return to the New World. But the pilot of the fleet's flagship, the Augustine friar mariner Andrés de

Urdaneta, later caught up with Martín to achieve the vuelta as well. It was he who now basked in glory, while Lope Martín was secretly sentenced to be hanged by the Spanish crown as repayment for his services. Acclaimed historian Andrés Reséndez, through brilliant scholarship and riveting storytelling-- including an astonishing outcome for the resilient Lope Martín--sets the record straight. *A Voyage of Discovery, Made Under the Orders of the Admiralty, in His Majesty's Ships Isabella and Alexander, for the Purpose of Exploring Baffin's Bay, and Inquiring*

twelve college students to a remote fishing village on the Sea of Cortez, they come upon a bay of dazzling beauty and richness. But as the group pursues various threads of investigation—ecological and evolutionary studies of the sea, the desert, and their various species of animals and plants; the stories of local villagers; the journals of conquistadors and explorers—they recognize that the bay, spectacular and pristine though it seems, is but a ghost of what it once was. Life in the Sea of Cortez, they realize, has been reshaped by complex human ideas and decisions—the laws

and economics of fishing, property, and water; the dreams of developers and the fantasies of tourists seeking the wild; even efforts to retrieve species from the brink of extinction—all of which have caused dramatic upheavals in the ecosystem. It is a painful realization, but the students discover a way forward. After weathering a hurricane and encountering a rare whale in its wake, they come to see that the bay's best chance of recovery may in fact reside in our own human stories, which can weave a compelling memory of the place. Glimpsing the intricate and ever-shifting web of human connections

with the Sea of Cortez, the students comprehend anew their own place in the natural world—suspended between past and future, teetering between abundance and loss. The redemption in their difficult realization is that as they find their places in a profoundly altered environment, they also recognize their roles in the path ahead, and ultimately come to see one another, and themselves, in a new light. In *Telling Our Way to the Sea*, Hirsh's voice resounds with compassionate humanity, capturing the complex beauty of both the marine world he explores and the people he explores it with.

2020 "Night ship, a voyage of discovery, is a short novel with a two-part structure. Six women, unknown to each other by day, join each other in a common dream or mythos aboard a fifteenth century sailing ship. Each

character narrates a twenty-first century story and also a fantasy story on the boat. The sailing ship is meant to represent the Lacanian concept of desire for the mother and is further influenced by Julia Kristeva's theory of the semiotic. The fantasy section constitutes the maternal division of language. The collective dream is fluid and rhythmic; the mythos is the realm of color and aspects of visual language. It is the realm of both spirituality and sexuality. It is the place of lesbian desire."--Author's preface, p. viii-ix.

students retrace the philosopher's intellectual journey rather than simply giving a report of the results so that the students see how the problems arose. Thus the philosopher's problem becomes a puzzle which the student has to face.

Lawhead uses metaphors, analogies, vivid images, concrete examples, common experiences, and diagrams to bring the abstract issues down to earth and show the practical implications and contemporary relevance of positions.

West; it was the sea, and no one writes more eloquently about that watery wilderness than Nathaniel Philbrick. In his bestselling *In the Heart of the Sea* Philbrick probed the nightmarish dangers of the vast Pacific. Now, in an epic sea adventure, he writes about one of the most ambitious voyages of discovery the Western world has ever seen—the U.S. Exploring Expedition of 1838–1842. On a scale that dwarfed the journey of Lewis and Clark, six magnificent sailing vessels and a crew of hundreds set out to map the entire Pacific Ocean and ended up naming the newly

discovered continent of Antarctica, collecting what would become the basis of the Smithsonian Institution. Combining spellbinding human drama and meticulous research, Philbrick reconstructs the dark saga of the voyage to show why, instead of being celebrated and revered as that of Lewis and Clark, it has—until now—been relegated to a footnote in the national memory. to the mercy of the slugs, the Guardian's award-winning writer Alys Fowler set out in an inflatable kayak to explore Birmingham's canal network, full of little-used waterways where huge pike skulk and kingfishers dart. Her book is about noticing the wild everywhere and what it means to see beauty where

you least expect it. What happens when someone who has learned to observe her external world in such detail decides to examine her internal world with the same care? Beautifully written, honest and very moving, Hidden Nature is also the story of Alys Fowler's emotional journey and her coming out as a gay woman: above all,

this book is about losing and finding, exploring familiar places and discovering unknown horizons. **A Voyage of Discovery and Research in the Southern and Antarctic Regions, During the Years 1839-43**
