The Routledge History of Global War and Society Jan 11 2021 The Routledge History of Global War and Society offers a sweeping

introduction to the most significant research on the causes, experiences, and impacts of war throughout history. This collection of twenty-seven essays by leading historians demonstrates how war and society studies have dramatically expanded the chronological, geographic, and thematic breadth of the field of military history. Each chapter addresses the ways in which recent scholarship has integrated cultural, ethical, environmental, medical, and ideological factors to explain both conventional conflicts and genocide, terrorism, and other forms of mass violence. The broad scope of the collection makes it the perfect primer for scholars and students seeking to understand the complex interactions of warfare and those affecting and affected by conflict.

CULTURE AS HISTORY Jul 05 2020 Bringing together for the first time the best of twenty-five years of unique critical work, Warren Susman takes us on a startling tour through the conflicts and events which have transformed the social, political, and cultural face of America in this century. Probing a rich panoply of images from the mass media and advertising, testing prevalent intellectual and economic theories, linking the revolutions in communications and technology to the rise of a new pantheon of popular heroes. Susman documents and analyzes the process through which the older, Puritan-republican, producer-capitalist culture has given way to the leisure-oriented, consumer society we now inhabit: the culture of abundance.

Technology and American Society Sep 30 2022 Providing a global perspective on the development of American technology, *Technology and American Society* offers a historical narrative detailing major technological transformations over the last three centuries. With coverage devoted to both dramatic breakthroughs and incremental innovations, authors Gary Cross and Rick Szostak analyze the cause-and-effect relationship of technological change and its role in the constant drive for improvement and modernization. This fully-updated 3rd edition extends coverage of industry, home, office, agriculture, transport, constructions, and services into the twenty-first century, concluding with a new chapter on recent electronic and technological advances. *Technology and American Society* remains the ideal introduction to the myriad interactions of technological advancement with social, economic, cultural, and military change throughout the course of American history.

Consumer Society in American History Aug 18 2021 This volume offers the most comprehensive and incisive exploration of American consumer history to date, spanning the four centuries from the colonial era to the present.

Historics Dec 22 2021 From an author at the forefront of research in this area comes this provocative and seminal work that presents a unique and fresh new look at history and theory. Taking a broadly European view, the book draws on works of French and German

philosophy, some of which are unknown to the English-speaking world, and Martin L. Davies spells out what it is like to live in a historicized world, where any event is presented as historical as, or even before, it happens. Challenging basic assumptions made by historians, Davies focuses on historical ideas and thought about the past instead of examining history as a discipline. The value of history in and for contemporary culture is explained not only in terms of cultural and institutional practices but in forms of writing and representation of historical issues too. *Historics* stimulates thinking about the behaviours and practice that constitute history, and introduces complex ideas in a clear and approachable style. This important text is recommended not only for a wide student audience, but for the more discerning general reader as well.

Civil Society Aug 30 2022 Civil society is one of the most used - and abused - concepts in current political thinking. In this important collection of essays, the concept is subjected to rigorous analysis by an international team of contributors, all of whom seek to encourage the historical and comparative understanding of political thought. The volume is divided into two parts: the first section analyses the meaning of civil society in different theoretical traditions of Western philosophy. In the second section, contributors consider the theoretical and practical contexts in which the notion of civil society has been invoked in Asia, Africa and Latin America. These essays demonstrate how an influential Western idea like civil society is itself altered and innovatively modified by the specific contexts of intellectual and practical life in the societies of the South.

History, Society and the Individual Jul 29 2022 This volume consists of five papers selected from a corpus of material researched over the past quarter of a century. None has previously been published, and they represent the author's interest in church history, medical history and the visual arts. Three of the five papers are based on lectures given at conferences or public occasions; the other two derive from research conducted at the Oxford Centre for Methodism and Church History in 2010 and 2020.

Civil Society and Gender Justice Jul 17 2021 Civil society and civic engagement have increasingly become topics of discussion at the national and international level. The editors of this volume ask, does the concept of "civil society" include gender equality and gender justice? Or, to frame the question differently, is civil society a feminist concept? Conversely, does feminism need the concept of civil society? This important volume offers both a revised

gendered history of civil society and a program for making it more egalitarian in the future. An interdisciplinary group of internationally known authors investigates the relationship between public and private in the discourses and practices of civil societies; the significance of the family for the project of civil society; the relation between civil society, the state, and different forms of citizenship; and the complex connection between civil society, gendered forms of protest and nongovernmental movements. While often critical of historical instantiations of civil society, all the authors nonetheless take seriously the potential inherent in civil society, particularly as it comes to influence global politics. They demand, however, an expansion of both the concept and project of civil society in order to make its political opportunities available to all.

Homeownership, Renting and Society Aug 25 2019 On the eve of the financial crisis, the USA was inhabited by almost 70 percent homeowning households, in comparison to about 45 percent in Germany. *Homeownership, Renting and Society* presents new evidence showing that this homeownership gap already existed between American and German cities around 1900. Existing explanations based on culture, government housing policy or typical socio-economic factors have difficulties in accounting for these long-term cross-country differences. Using historical case studies on Germany and the USA, the book identifies three institutional domains on the supply-side of the housing market – urban land, housing finance and construction – that set countries on different housing trajectories and subsequently established differences that were hard to reverse in later periods. Further chapters generalize the argument across other OECD (Organisation for Economic Co-operation and Development) countries and extend the explanation to cover historical differences in homeownership ideology and horizontal property institutions. This enlightening volume also puts forward path-dependence theories in housing studies, connects housing with vast urban-history and political-economy literature and offers comprehensive insights about the case of a tenant's country which contradicts the tendency towards universal homeownership. Providing an all-new historic-institutionalist explanation of the German–American homeownership gap, this title will be of interest to postgraduate students and scholars interested in fields including: Housing Studies, Sociology, Urban History, Political Economy, Social Policy and Geography. It may also be of interest to those working in housing field organizations and ministries.

Iceland's 1100 Years May 15 2021 'Iceland's 1100 Years' recounts the history of a society on the margin of Europe as well as on the margin of reaching the size and wealth of a proper state. Iceland is unique

among the European societies in being founded as late as the Viking Age, and in surviving for centuries without any central power after Christianity had introduced the art of writing. This was the age of the Sagas, which are not only literature but also a rare treasury of sources about a stateless society. In sharp contrast to the prosperous society portrayed by the Sagas, early modern Iceland appears to have been extremely poor and miserable. It is challenging to question whether the deterioration was due to foreign rule, to a colder climate, or to an unfortunate internal power structure. Or was the Golden Age perhaps the invention of 19th-century nationalists? Iceland adopted nationalism quickly and thoroughly. In the mid-nineteenth century about 60,000 inhabitants, mostly poor peasants, set out to gain independence from Denmark, which was finally achieved in 1944 with the foundation of a republic. In recent decades Iceland has caught up economically with its closest neighbours. This has come about mainly through the mechanisation of fishing, which gave rise to a second battle for sovereignty, this time over the country's fishing grounds.

Macau History and Society Jun 15 2021 *Macau History and Society* illuminates the early Portuguese maritime exploration along China's south coast, political and economic development in Macau, and current social problems. The book makes significant contributions to a political sociology of Macau, emphasizing how different civilizations and cultures interacted with one another, and explores how a new Macau identity can be constructed. Democratization has been a never-ending process in Macau since the 1500's. Macau's experience indicates that sovereignty has been shared rather than exclusive. Although civilizations and cultures do clash, they also cooperate. But the Macau model is deeply flawed - Hao contends that Macau needs to build a new multicultural identity, and a cosmopolitan political and economic identity.

Mathematics in Society and History Aug 06 2020 This is the first book by a sociologist devoted exclusively to a general sociology of mathematics. The author provides examples of different ways of thinking about mathematics sociologically. The survey of mathematical traditions covers ancient China, the Arabic-Islamic world, India, and Europe. Following the leads of classical social theorists such as Emile Durkheim, Restivo develops the idea that mathematical concepts and ideas are collective representations, and that it is mathematical communities that create mathematics, not individual mathematicians. The implications of the sociology of mathematics, and especially of pure mathematics, for a sociology of mind are also explored. In general, the author's objective is to explore, conjecture, suggest,

and stimulate in order to introduce the sociological perspective on mathematics, and to broaden and deepen the still narrow, shallow path that today carries the sociology of mathematics. This book will interest specialists in the philosophy, history, and sociology of mathematics, persons interested in mathematics education, students of science and society, and people interested in current developments in the social and cultural analysis of science and mathematics.

Shifting Terrain Dec 10 2020 *Shifting Terrain* places contemporary political, economic, and social questions in long-range historical context. An essay on the new American imperialism is set against one that considers enduring lessons from Thucydides on the hubris of empire. The deep Lockean liberal structure of American politics is treated, along with a case history of the labor movement. Essays on child labor, hunger and poverty explore topics in world political economy as it affects the most dispossessed.

Why Study History? Jun 27 2022 Considering studying history at university? Wondering whether a history degree will get you a good job, and what you might earn? Want to know what it's actually like to study history at degree level? This book tells you what you need to know. Studying any subject at degree level is an investment in the future that involves significant cost. Now more than ever, students and their parents need to weigh up the potential benefits of university courses. That's where the *Why Study* series comes in. This series of books, aimed at students, parents and teachers, explains in practical terms the range and scope of an academic subject at university level and where it can lead in terms of careers or further study. Each book sets out to enthuse the reader about its subject and answer the crucial questions that a college prospectus does not.

History, Sociology and Education Sep 18 2021 Originally published in 1971, this volume examines the relationship between the history and sociology of education. History does not stand in isolation, but has much to draw from and contribute to, other disciplines. The methods and concepts of sociology, in particular, are exerting increasing influence on historical studies, especially the history of education. Since education is considered to be part of the social system, historians and sociologists have come to survey similar fields; yet each discipline appears to have its own aims and methodology.

A History of Science in Society Mar 13 2021 *A History of Science in Society* is a concise overview that introduces complex ideas in a non-technical fashion. Andrew Ede and Lesley B. Cormack trace the history of science through its continually changing place in society and explore the link between the pursuit of knowledge and the desire to make that knowledge useful. In this edition, the authors examine the

robust intellectual exchange between East and West and provide new discussions of two women in science: Maria Merian and Maria Winkelmann. A chapter on the relationship between science and war has been added as well as a section on climate change. The further readings section has been updated to reflect recent contributions to the field. Other new features include timelines at the end of each chapter, 70 upgraded illustrations, and new maps of Renaissance Europe, Captain James Cook's voyages, the 2nd voyage of the Beagle, and the main war front during World War I.

History and Society Nov 01 2022 R. H. Tawney believed that the subject of economic history raises questions which touch the fundamental concerns of all thinking people. By setting economic development firmly within the framework of cultural and political life, he provided an alternative to the recent fragmentation of economic history into a number of increasingly technical specialisms. First published as a collection in 1978, these ten essays, spanning the length of Professor Tawney's career remain as controversial and potent as ever, and the original introduction by J. M. Winter provides the first full evaluation and significance of R. H. Tawney's approach to economic history. Among the essays included in this volume are the indispensable studies of 'The Rise of the Gentry' and 'Harrington's Interpretation of His Age', as well as 'The Abolition of Economic Controls, 1918-1921', here published in full for the first time. Other selections, such as Tawney's celebrated inaugural lecture as Professor of Economic History at the London School of Economics in 1933, 'the Study of Economic History', offer a representative sample of the range and sweep of Tawney's historical imagination. Taken together, these essays demonstrate the validity of Tawney's conviction that economic historians must confront not only the creation of wealth, but also the moral questions surrounding its distribution.

Law, Society, and History Feb 21 2022 This book assembles essays on legal sociology and legal history by an international group of distinguished scholars. All of them have been influenced by the eminent and prolific legal historian, legal sociologist and scholar of comparative law, Lawrence M. Friedman. Not just a Festschrift of essays by colleagues and disciples, this volume presents a sustained examination and application of Friedman's ideas and methods. Together, the essays in this volume show the powerful ripple effects of Friedman's work on American and comparative legal sociology, American and comparative legal history and the general sociology of law and legal change.

Great Society Sep 06 2020 The New York Times bestselling author of *The Forgotten Man* and *Coolidge* offers a stunning revision of our last great period of idealism, the 1960s, with burning relevance for our contemporary challenges. "Great Society is accurate history that

reads like a novel, covering the high hopes and catastrophic missteps of our well-meaning leaders." —Alan Greenspan Today, a battle rages in our country. Many Americans are attracted to socialism and economic redistribution while opponents of those ideas argue for purer capitalism. In the 1960s, Americans sought the same goals many seek now: an end to poverty, higher standards of living for the middle class, a better environment and more access to health care and education. Then, too, we debated socialism and capitalism, public sector reform versus private sector advancement. Time and again, whether under John F. Kennedy, Lyndon Johnson, or Richard Nixon, the country chose the public sector. Yet the targets of our idealism proved elusive. What's more, Johnson's and Nixon's programs shackled millions of families in permanent government dependence. Ironically, Shlaes argues, the costs of entitlement commitments made a half century ago preclude the very reforms that Americans will need in coming decades. In *Great Society*, Shlaes offers a powerful companion to her legendary history of the 1930s, *The Forgotten Man*, and shows that in fact there was scant difference between two presidents we consider opposites: Johnson and Nixon. Just as technocratic military planning by "the Best and the Brightest" made failure in Vietnam inevitable, so planning by a team of the domestic best and brightest guaranteed fiasco at home. At once history and biography, *Great Society* sketches moving portraits of the characters in this transformative period, from U.S. Presidents to the visionary UAW leader Walter Reuther, the founders of Intel, and Federal Reserve chairmen William McChesney Martin and Arthur Burns. *Great Society* casts new light on other figures too, from Ronald Reagan, then governor of California, to the socialist Michael Harrington and the protest movement leader Tom Hayden. Drawing on her classic economic expertise and deep historical knowledge, Shlaes upends the traditional narrative of the era, providing a damning indictment of the consequences of thoughtless idealism with striking relevance for today. *Great Society* captures a dramatic contest with lessons both dark and bright for our own time.

A History of the Modern Fact Nov 28 2019 How did the fact become modernity's most favored unit of knowledge? How did description come

to seem separable from theory in the precursors of economics and the social sciences? Mary Poovey explores these questions in *A History of the Modern Fact*, ranging across an astonishing array of texts and ideas from the publication of the first British manual on double-entry bookkeeping in 1588 to the institutionalization of statistics in the 1830s. She shows how the production of systematic knowledge from descriptions of observed particulars influenced government, how numerical representation became the privileged vehicle for generating useful facts, and how belief—whether figured as credit, credibility, or credulity—remained essential to the production of knowledge. Illuminating the epistemological conditions that have made modern social and economic knowledge possible, *A History of the Modern Fact* provides important contributions to the history of political thought, economics, science, and philosophy, as well as to literary and cultural criticism.

State of Nature, Stages of Society Apr 25 2022 Frank Palmeri sees the conjectural histories of Rousseau, Hume, Herder, and other Enlightenment philosophers as a template for the development of the social sciences in the nineteenth and early twentieth centuries. Without documents or memorials, these thinkers, he argues, employed conjecture to formulate a naturalistic account of society's commercial and secular progression. Palmeri finds evidence of speculative frameworks in the political economy of Malthus, Martineau, Mill, and Marx. He traces the influence of speculative thought in the development of anthropology and ethnography in the 1860s, the foundational sociology of Comte and Spencer, and the sociology of religion pioneered by Weber, Durkheim, and Freud. Conjectural histories reveal a surprising ambivalence toward progress, modernity, and secularization among leading thinkers of the time, an attitude that affected texts as varied as Darwin's *Descent of Man*, Nietzsche's *Genealogy of Morality*, and the novels of Walter Scott, George Eliot, and H.G. Wells. Establishing the critical value of conjectural thinking in the study of modern forms of knowledge, Palmeri concludes his investigation with its return in the work of Foucault and in recent histories on early religion, political organization, and material life.

Public Relations, Society and the Generative Power of History Jan 29 2020 *Public Relations, Society and the Generative Power of History* examines how histories are used to explore how the past is constructed from the present, how the present is always historical, and how both past and present can power imagined futures. Divided into three distinct parts, the book uses historical inquiry as a springboard for engaging with interdisciplinary, critical and complex issues in the past and present. Part I examines the history of corporate PR, the centrality of the corporation in PR scholarship and the possibility of resisting corporate hegemony through PR efforts. The theme of Part II is 'Historicising gender, ethnicity and diversity in PR work,' focusing on how gendered and racialised identities have been constructed and resisted both within the profession and through the result of its work. Part III engages with 'Histories of public relations in the political sphere,' bringing together work on the different ways in which public relations has evolved in changing political contexts, both formally as a function within political institutions and in the context of contributions to broader narratives of nationalism and identity. Featuring contributions from leading academics, this book challenges traditional PR historiography and contests the 'lessons' derived from existing literature to address the implications of key areas of critically engaged PR theory. This volume is a valuable teaching resource for upper-level undergraduates and postgraduates studying public relations, strategic communications, political communication and organisational communication.

In the Matter of Nat Turner Apr 13 2021 A bold new interpretation of Nat Turner and the slave rebellion that stunned the American South In 1831 Virginia, Nat Turner led a band of Southampton County slaves in a rebellion that killed fifty-five whites, mostly women and children. After more than two months in hiding, Turner was captured, and quickly convicted and executed. *In the Matter of Nat Turner* penetrates the historical caricature of Turner as befuddled mystic and self-styled Baptist preacher to recover the haunting persona of this legendary American slave rebel, telling of his self-discovery and the dawning of his Christian faith, of an impossible task given to him by God, and of redemptive violence and profane retribution. Much about Turner remains unknown. His extraordinary account of his life and rebellion, given in chains as he awaited trial in jail, was written down by an opportunistic white attorney and sold as a pamphlet to cash in on Turner's notoriety. But the enigmatic rebel leader had an immediate and broad impact on the American South, and his rebellion remains one of the most momentous episodes in American history. Christopher Tomlins provides a luminous account of Turner's intellectual development, religious cosmology, and motivations, and offers an original and incisive analysis of the Turner Rebellion

itself and its impact on Virginia politics. Tomlins also undertakes a deeply critical examination of William Styron's 1967 novel, *The Confessions of Nat Turner*, which restored Turner to the American consciousness in the era of civil rights, black power, and urban riots. A speculative history that recovers Turner from the few shards of evidence we have about his life, *In the Matter of Nat Turner* is also a unique speculation about the meaning and uses of history itself.

The Routledge Handbook to the History and Society of the Americas
Oct 20 2021 The colonial heritage and its renewed aftermaths – expressed in the inter-American experiences of slavery, indigeneity, dependence, and freedom movements, to mention only a few aspects – form a common ground of experience in the Western Hemisphere. The flow of peoples, goods, knowledge and finances have promoted interdependence and integration that cut across borders and link the countries of North and South America together. The nature of this transversally related and multiply interconnected region can only be captured through a transnational, multidisciplinary, and comprehensive approach. *The Routledge Handbook to the History and Society of the Americas* explores the history and society of the Americas, placing particular emphasis on collective and intertwined experiences. Forty-four chapters cover a range of concepts and dynamics in the Americas from the colonial period until the present century: The shared histories and dynamics of Inter-American relationships are considered through pre-Hispanic empires, colonization, European hegemony, migration, multiculturalism, and political and economic interdependences. Key concepts are selected and explored from different geopolitical, disciplinary, and epistemological perspectives. Highlighting the contested character of key concepts that are usually defined in strict disciplinary terms, the Handbook provides the basis for a better and deeper understanding of inter-American entanglements. This multidisciplinary approach will be of interest to a broad array of academic scholars and students in history, sociology, political science cultural, postcolonial, gender, literary, and globalization studies.

Shaping Natural History and Settler Society Dec 30 2019 This book explores the life and work of Mary Elizabeth Barber, a British-born settler scientist who lived in the Cape during the nineteenth century. It provides a lens into a range of subjects within the history of knowledge and science, gender and social history, postcolonial, critical heritage and archival studies. The book examines the international importance of the life and works of a marginalized scientist, the instrumentalisation of science to settlers' political concerns and reveals the pivotal but largely silenced contribution of indigenous African experts. Including a variety of material, visual and textual sources, this study explores

how these artefacts are archived and displayed in museums and critically analyses their content and silences. The book traces Barber's legacy across three continents in collections and archives, offering insights into the politics of memory and history-making. At the same time, it forges a nuanced argument, incorporating study of the North and South, the history of science and social history, and the past and the present.

A History of Communications Jan 23 2022 *A History of Communications* advances a new theory of media that explains the origins and impact of different forms of communication - speech, writing, print, electronic devices, and the Internet - on human history in the long term. New media are "pulled" into widespread use by broad historical trends and these media, once in widespread use, "push" social institutions and beliefs in predictable directions. This view allows us to see for the first time what is truly new about the Internet, what is not, and where it is taking us.

High Society Apr 01 2020 *Explores the use of mind-altering substances from alcohol to cocaine worldwide throughout history. Beautifully illustrated with rarely seen material, this striking, rigorously researched book puts its controversial subject into the widest possible context. It paints vivid portraits of the roles that drugs play as medicines, sacraments, status symbols and trade goods from classical times through the mind-bending self-experiments of early scientists to the present 'war on drugs', and reveals how the international trade in substances such as tobacco, tea and opium shaped the modern world. "... deserves high praise for rendering a complex, controversial topic with clarity and elegance. It's also good looking ... quite marvellous" - British Medical Journal*
