The Food Explorer Jul 20 2021 The true adventures of David Fairchild, a turn-of-the-century food explorer who traveled the globe and introduced diverse crops like avocados, mangoes, seedless grapes—and thousands more—to the American plate. "Fascinating."—The New York Times Book Review □ "Fast-paced adventure writing."—The Wall Street Journal □ "Richly descriptive."—Kirkus □ "A must-read for foodies."—HelloGiggles In the nineteenth century, American meals were about subsistence, not enjoyment. But as a new century approached, appetites broadened, and David Fairchild, a young botanist with an insatiable lust to explore and experience the world, set out in search of foods that would enrich the American farmer and enchant the American eater. Kale from Croatia, mangoes from India, and hops from Bavaria. Peaches from China, avocados from Chile, and pomegranates from Malta. Fairchild's finds weren't just limited to food: From Egypt he sent back a variety of cotton that revolutionized an industry, and via Japan he introduced the cherry blossom tree, forever brightening America's capital. Along the way, he was arrested, caught diseases, and bargained with island tribes. But his culinary ambition came during a formative era, and through

him, America transformed into the most diverse food system ever created. “Daniel Stone draws the reader into an intriguing, seductive world, rich with stories and surprises.
