Molecular Theory of Solutions Jan 24 2022 This book presents new and updated developments in the molecular theory of mixtures and solutions. It is based on the theory of Kirkwood and Buff which was published more than fifty years ago. This theory has been dormant for almost two decades. It has recently become a very powerful and general tool to analyze, study and understand any type of mixtures from the molecular, or the microscopic point of view. The traditional approach to mixture has been, for many years, based on the study of excess thermodynamic quantities. This provides a kind of global information on the system. The new approach provides information on the local properties of the same system. Thus, the new approach supplements and enriches our information on mixtures and solutions.

Image Processing Nov 21 2021 The classic text that covers practical image processing methods and theory for image texture analysis, updated second edition The revised second edition of *Image Processing: Dealing with Textures* updates the classic work on texture analysis theory and methods without abandoning the foundational essentials of this landmark work. Like the first, the new edition offers an analysis of texture in digital images that are essential to a diverse range of applications such as: robotics, defense, medicine and the geo-sciences. Designed to easily locate information on specific problems, the text is structured around a series of helpful questions and answers. Updated to include the most recent developments in the field, many chapters have been completely revised including: Fractals and Multifractals, Image Statistics, Texture Repair, Local Phase Features, Dual Tree Complex Wavelet Transform, Ridgelets and Curvelets and Deep Texture Features. The book takes a two-level mathematical approach: light math is covered in the main level of the book, with harder math identified in separate boxes. This important text: Contains an update of the classic advanced text that reviews practical image processing methods and theory for image texture analysis Puts the focus exclusively on an in-depth exploration of texture Contains a companion website with exercises and algorithms Includes examples that are fully worked to enhance the learning experience Written for students and researchers of image processing, the second edition of *Image Processing* has been revised and updated to incorporate the foundational information on the topic and information on the latest advances.

Biblical Text and Exegetical Culture Sep 19 2021 In this wide-ranging collection, Michael Fishbane investigates the complex and diverse relationships between the 'biblical text' and 'exegetical culture.' The author demonstrates the multiple literary dimensions and interpretative strategies that came to form the Hebrew Bible in the context of the ancient Near East, the Dead Sea Scrolls in the context of an emergent biblical-Jewish culture, and the classical rabbinic Midrash in the context of an emergent rabbinic civilization in late antiquity. Within each study, and in the collection as a whole, the author shows a broad range of creative methods, always with a scholarly concern to illuminate the religious ideas of Scripture as it was perceived through diverse hermeneutical lenses and exegetical methodologies. The studies range from the purely literary to the highly analytic, from myth to law, and from studies of symbols to the study of exegetical methods.

Nonlinearity, Bounded Rationality, and Heterogeneity Aug 07 2020 This book pursues a nonlinear approach in considering both chaotic dynamical models and agent-based simulation models of economics, as well as their dynamical behaviors. Three key concepts arising in this context are “nonlinearity,” “bounded rationality” and “heterogeneity,” which also make up the title of the book. Nonlinearity is the warp that runs throughout all models because

systems that exhibit chaotic or other complex behavior in the absence of any exogenous disturbances are absolutely nonlinear. Bounded rationality constitutes the woof, because economic systems do not exhibit complex behavior if all agents are perfectly rational, as is usually assumed in neoclassical economics. Agents who are boundedly rational have to struggle to do their best with limited information and tend to adapt to their economic environment without knowing what is the best. Furthermore, the heterogeneity of firms or consumers dyes the fabric of complex dynamics woven from the warp and woof.

Welcoming Africa's children – Theological and ministry perspectives Dec 31 2019 The purpose of this book is to combine perspectives of scholars from Africa on Child Theology from a variety of theological sub-disciplines to provide some theological and ministerial perspectives on this topic. The book disseminates original research and new developments in this study field, especially as relevant to the African context. In the process it addresses also the global need to hear voices from Africa in this academic field. It aims to convey the importance of considering Africa's children in theologising. The different chapters represent diverse methodologies, but the central and common focus is to approach the subject from the viewpoint of Africa's children. The individual authors' varied theological sub-disciplinary dispositions contribute to the unique and distinct character of the book. Almost all chapters are theoretical orientated with less empirical but more qualitative research, although some of the chapters refer to empirical research that the authors have performed in the past. Most of the academic literature in the field of Child Theologies is from American or British-European origin. The African context is fairly absent in this discourse, although it is the youngest continent and presents unique and relevant challenges. This book was written by theological scholars from Africa, focussing on Africa's children. It addresses not only theoretical challenges in this field but also provides theological perspectives for ministry with children and for important social change. Written from a variety of theological sub-disciplines, the book is aimed at scholars across theological sub-disciplines, especially those theological scholars interested in the intersections between theology, childhood studies and African cultural or social themes. It addresses themes and provides insights that are also relevant for specialist leaders and professionals in this field. No part of the book was plagiarised from another publication or published elsewhere.

Abingdon New Testament Commentaries | 1 & 2 Thessalonians Dec 23 2021 Accepting the widespread view that 1 Thessalonians is the earliest surviving Pauline letter, Furnish commends reading it as fully as possible on its own terms, without presupposing or imposing themes or positions that are explicit only in letters of a later date. While he agrees with commentators who note this letter's pastoral aims and character, he is more convinced than some that it also exhibits a rich and coherent theological point of view. Furnish interprets 2 Thessalonians as the work of an anonymous Paulinist writing several decades after the apostle's death. He regards this letter, too, as historically and theologically valuable, although less for what it discloses about Paul's ministry and thought than for what it shows about the reception and interpretation of Paul in the late first-century church.

The Cambridge Guide to Orchestration Apr 26 2022 Demonstrating not only how to write for orchestra but also how to understand and enjoy a score, *The Cambridge Guide to Orchestration* is a theoretical and practical guide to instrumentation and orchestration for scholars, professionals and enthusiasts. With detailed information on all the instruments of the orchestra, both past and present, it combines discussion of both traditional and modern playing techniques to give the most complete overview of the subject. It contains fifty reduced scores to be re-orchestrated and a wide range of exercises, which clarify complex subjects such as multiple stops on stringed instruments, harmonics and trombone glissandi. Systematic analysis reveals the orchestration techniques used in original scores, including seven twentieth-century compositions. This Guide also includes tables and lists for quick reference, providing the ranges of commonly used instruments and the musical names and terminology used in English, German, Italian and French.

Exegetical Dictionary of the New Testament, Vol. 1 Sep 27 2019 The English translation of the three-volume *Exegetisches Wörterbuch zum Neuen Testament*, this monumental work by an ecumenical group of scholars is first of all a complete English dictionary of New Testament Greek. Going beyond that, however EDNT also serves as a guide to the usage of every New Testament word in its various contexts, and it makes a significant contribution to New Testament exegesis and theology. EDNT's thorough, lengthy discussions of more significant words and its grouping of words related by root and meaning (with alphabetical cross-references) distinguish it from simpler Greek-English lexicons. Advancing the discussion of the *Theological Dictionary of the Old Testament*, EDNT summarizes more recent treatments of numerous questions in New Testament study and takes into consideration newer viewpoints of linguistics.

Introducing Christian Theologies II May 04 2020 Should Christianity's theological face remain largely European and North American in the twenty-first century in the wake of the expansion of Christianity in sub-Saharan Africa, Asia, and Latin America? The question about the theological face of Christianity cannot be ignored. For too long African, Asian, and Latin American theologians have been left out of mainstream theological discussions. Few standard textbooks on Christian theology acknowledge the unique contributions theologians from these continents have made to global Christianity. *Introducing Christian Theologies: Voices from Global Christian Communities* is a two-volume textbook that alters the predominantly European and North American theological face of Christianity by interacting with the voices of Christian communities from around the globe. *Introducing Christian Theologies* explores the works of key theologians from across the globe, highlighting their unique contributions to Christian theology and doctrine.

Vygotsky's Notebooks Jul 18 2021 This book consists of previously unpublished manuscripts by Vygotsky found in the first systematic study of Vygotsky's family archive. The notebooks and scientific diaries gathered in this volume represent all periods of Vygotsky's scientific life, beginning with the earliest manuscript, entitled *The tragicomedy of strivings* (1912), and ending with his last note, entitled *Pro domo sua* (1934), written shortly before his death. The notes reveal unknown aspects of the eminent psychologist's personality, show his aspirations and interests, and allow us to gain insights into the development of his thinking and its internal dynamics. Several texts reflect the plans that Vygotsky was unable to realize during his lifetime, such as the creation of a theory of emotions and a theory of consciousness, others reveal Vygotsky's involvement in activities that were previously unknown, and still others provide outlines of papers and lectures. The notes are presented in chronological order, preceded by brief introductions and accompanied by an extensive set of notes. The result is a book that allows us to obtain a much deeper understanding of Vygotsky's innovative ideas.

Biotechnology in Healthcare, Volume 2 Apr 14 2021 *Biotechnology in Healthcare* presents up-to-date knowledge on the emerging field of biotechnology as applied to the healthcare industry. Biotechnology has revolutionized healthcare in the last two decades by developing and introducing novel diagnostics, therapeutics, and preventive measures; whether it is noncommunicable or communicable disease, primary or secondary care, or public health, it has shown its immense potential to provide a solution to the healthcare providers, physicians, and allied health care professionals. The second volume, *Applications and Initiatives*, contains 19 chapters focused on the applications of biotechnology related to public healthcare, hospital management, oncology, neurodegenerative and infectious diseases, regenerative medicine, IVF, clinical trials, precision food, FMGCs, PPCPs, pharmaceuticals, and smart technologies to monitor pandemic. Further, this volume also presents government initiatives and entrepreneurship challenges in healthcare biotechnology sector. This is a valuable resource for students, biotechnologists, bioinformaticians, clinicians, and members of biomedical and healthcare fields who need to understand more about the promising developments of the emerging field of biotechnology in healthcare. • Describes various applications of novel biotechnology approaches in healthcare • Presents applications of biotechnology in primary and secondary healthcare and in public health. • Discusses government initiatives, challenges and opportunities, and entrepreneurship development in the area of healthcare biotechnology.

Good Regulation, Bad Regulation Mar 14 2021 Since the 2007 2008 global financial crisis, there has been much debate about the role of financial regulation and the causes of financial instability in the industry. Where studies commonly question the value of a regulated rather than free market, this book focuses on the differentiation of 'good regulation' and 'bad regulation'. This book highlights the need for financial regulation to combat corruption, and the integral link that exists between corruption and financial instability. The author evaluates the benefits and shortcomings of specific types of regulation, drawing on recent examples to illustrate each argument. The book presents compelling arguments for the regulation of leverage, liquidity, payday loans and securitisation; and debates the negative aspects of the regulation of short selling, and high-frequency trading, and of Basel-style banking regulation. The author argues that there is no free-market solution to financial instability, and rejects the idea of 'too big to fail'.
