Inter-act Jan 23 2022 **Inter-Act: Interpersonal Communication Concepts, Skills, and Contexts, Ninth Edition**, by best-selling authors Kathleen S. Verderber and Rudolph F. Verderber provides a framework of practical communication skills supported by current theory and numerous real-life examples and scenarios. It addresses modern technology's challenges and obstacles to creating and maintaining healthy relationships between not only those who are close and intimate but those who differ in politics, gender, age, race,

religion, and culture. The authors demonstrate the significance of sensitivity to culture, gender, and racial diversity, the importance of ethical communication practices, and ways to reinforce personal ethical communication skills. This ninth and updated edition includes a unique chapter on communicating in the workplace and an entirely new chapter on electronically mediated interpersonal communication. It also includes effective pedagogical features called "Skill Builder Boxes," marginal segments called "Inter-Act with Technology," and sections called "What Would You Do? A Question of Ethics."

Innovations in Hospice Architecture Jul 17 2021 Providing much-needed focus on hospice projects in the context of unprecedented rates of societal ageing, this new reference book presents an overview of major recent developments in this rapidly evolving building type. The authors present an overview of the historical origins of the contemporary hospice and the diverse variations on the basic premise of hospice care, and offer a series of case studies of exemplary hospices. The most innovative work in this area over the past decade has been in Japan, the US, Canada and the UK, and the authors describe and analyze examples both as individual projects and as comparable yet differing approaches. Hospice Architecture will be essential reading for anyone involved in the planning, design and construction of hospices.

Innovations in Behavioural Health Architecture Apr 25 2022
WINNER OF A NAUTILUS 2018 SILVER MEDAL BOOK AWARD
Innovations in Behavioural Health Architecture is the most comprehensive book written on this topic in more than 40 years. It examines the ways in which healthcare architecture can contribute, as a highly valued informational and reference source, to the provision of psychiatric and addictive disorder treatment in communities around the world. It provides an overview of the need for a new generation of progressively planned and designed treatment centres - both inpatient and outpatient care environments - and the advantages, challenges, and opportunities associated with meeting the burgeoning need for treatment settings of this type. Additional chapters address the specifics of geriatric psychiatry and its architectural ramifications in light of the rapid aging of societies globally and provide a comprehensive compendium of planning and design considerations for these places in both inpatient and outpatient care contexts. Finally, the book presents an expansive and fully illustrated set of international case studies that express state-of-the-art advancements in architecture for behavioural healthcare.

Photographing Yellowstone National Park Jul 29 2022 Expert photography advice the author provided to visitors to Yellowstone when he served there as the Kodak Ambassador in Yellowstone National Park. This guide is designed to allow the average visitor to comfortably manage the vast abundance of subjects within Yellowstone National Park and to answer the crucial questions of what is worth photographing and how to do that in a way that will result in postcard-perfect photos of the park's landscapes and wildlife. An

appendix provides a suggested itinerary to plan a visit to each district. No park visitor should be without it.

Innovations in Hospice Architecture Feb 21 2022 "This fully revised, new edition of Innovations in Hospice Architecture responds to the need for an up-to-date, theoretically based reference book summarizing key historical and recent developments with respect to this rapidly evolving building type. It presents: an overview of the historical origins of the contemporary hospice the diverse variations on the basic premise of hospice care a review of the scant architectural literature published on this subject to date a broad series of case studies of exemplary hospices around the world planning and design concepts for palliative care environments. Case study projects are from Japan, Canada, Europe, Africa, Australia, Indonesia, China, the United States, and South America. The case studies are individually presented and comparatively analysed, and prognostications for the future of hospice architecture are discussed. Each case includes floor plans, technical drawings and beautiful, full colour photography. Through the in-depth discussion of the inner profundities of hospice architecture, the book presents this as a humane, genuine expression of the spiritual, physical and psychosocial dimensions of the contemporary death and dying movement. Written with a broad audience in mind, the book provides both technical and conceptual information, blending narrative, images, and diagrammation so that the audience may understand, and articulate that understanding in any professional setting"--

Sprawling Cities and Our Endangered Public Health Mar 01 2020 Sprawl is an unsustainable pattern of growth that threatens to undermine the health of communities globally. It has been a dominant mid-to-late twentieth century growth pattern in developed countries and in the twenty-first century has shown widespread signs of proliferation in India, China, and other growing countries. The World Health Organization cites sprawl for its serious adverse public health consequences for humans and ecological habitats. The many adverse impacts of sprawl on the health of individuals, communities, and biological ecosystems are well documented. Architects have been rightly criticized for failing to grasp the aesthetic and functional challenge to create buildings and places that mitigate sprawl while

simultaneously promoting healthier, active lifestyles in neighbourhoods and communities. Sprawling Cities and Our Endangered Public Health examines the past and present role of architecture in relation to the public health consequences of unmitigated sprawl and the ways in which it threatens our future. Topics examined include the role of twentieth century theories of architecture and urbanism and their public health ramifications, examples of current unsustainable practices, design considerations for the creation of health-promoting architecture and landscape urbanism, a critique of recent case studies of sustainable alternatives to unchecked sprawl, and prognostications for the future. Architects, public health professionals, landscape architects, town planners, and a broad range of policy specialists will be able to apply the methods and tools presented here to counter unmitigated sprawl and to create architecture that promotes active, healthier lifestyles. Stephen Verderber is an internationally respected evidence-based researcher/practitioner/educator in the emerging, interdisciplinary field of architecture, health, and society. This, his latest book on the interactions between our buildings, our cities and our health, is an invaluable reference source for everyone concerned with sustainable architecture and landscape urbanism.

Delirious New Orleans Oct 08 2020 From iconic neighborhoods such as the French Quarter and the Garden District to more economically modest but no less culturally vibrant areas, architecture is a key element that makes New Orleans an extraordinary American city. Delirious New Orleans began as a documentary project to capture the idiosyncratic vernacular architecture and artifacts—vintage mom-and-pop businesses, roadside motels, live music clubs, neon signs, wall murals, fast-food joints, and so on—that helped give the city's various neighborhoods their unique character. But because so many of these places and artifacts were devastated by Hurricane Katrina, Delirious New Orleans has become both a historical record of what existed in the past and a blueprint for what must be rebuilt and restored to retain the city's unique multicultural landscape. Stephen Verderber starts with the premise that New Orleans's often-overlooked neighborhoods imbue the city with deep authenticity as a place. He opens Delirious New Orleans with a photo-essay that vividly presents this vernacular architecture and its artifacts, both before Katrina and in its immediate aftermath. In the following sections of the book, which are also heavily illustrated, Verderber takes us on a tour of the city's commercial vernacular architecture, as well as the expressive folk architecture of its African American neighborhoods. He discusses how the built environment was profoundly shaped by New Orleans's history of race and class inequities and political maneuvering, along with its peculiar, below-sea-level geography. Verderber also considers the aftermath of Katrina and the armada of faceless FEMA trailers that have, at least temporarily and by default, transformed this urban landscape.

The Medieval Fold Jun 23 2019 Striking cultural developments took place in the twelfth century which led to what historians have termed 'the emergence of the individual.' The Medieval Fold demonstrates how cultural developments typically associated with this twelfth-century renaissance autobiography, lyric, courtly love, romance can be traced to the Church's cultivation of individualism. However, subjects did not submit to pastoral power passively, they constructed fantasies and behaviors, redeploing or 'folding' it to create new forms of life and culture. Incorporating the work of Nietzsche, Foucault, Lacan, and Deleuze, Suzanne Verderber presents a model of the subject in which the opposition between interior self and external world is dislodged.

Thinking While Doing Aug 25 2019 The active engagement of architecture students in the design and construction of real projects is today an important dimension at more than 150 universities worldwide. Yet this emerging field continues to suffer from an insubstantial scholarly foundation. An initiative of universities in North America has developed a consistent and innovative practice model, which sets a new standard for this key aspect of education and professional practice.

Innovations in Hospital Architecture Mar 25 2022 This indispensable reference book captures key recent developments in the rapidly evolving field of sustainable hospital architecture. Today's architects must provide hospitals which enable high quality care for diverse patient populations in carbon neutral care settings, and this book succinctly considers what needs to be done in order to meet that challenge. The contemporary hospital is viewed in the context of global climate change, the planet's diminishing natural resources and the spiralling cost of operating healthcare facilities. Stephen Verderber considers the future of the hospital, and supplies a compendium of 100 planning and design considerations for the building type. The book includes twenty-eight case studies of built and unbuilt hospitals from around the world. These are grouped into five types - autonomous community based hospitals, children's hospitals, rehabilitation and elderly care centres and hospitals, regional medical centre campuses, and visionary (unbuilt) projects. Beautifully and extensively illustrated with many photographs, diagrams and floor plans, this is essential reading for all architects, planners, engineers, product manufacturers, clients, healthcare providers and government agencies involved in the present and future of sustainable healthcare environments.

The Challenge of Effective Speaking Nov 28 2019 THE CHALLENGE OF EFFECTIVE SPEAKING is a classic in the field. Written by true teachers of public speaking who have been in the classroom for many years and who have adapted their methods to best meet the needs of their changing student body, this Thirteenth Edition stays true to what has made it a market-leading text for hundreds of thousands of students. THE CHALLENGE OF EFFECTIVE SPEAKING presents the speechmaking process in a six-step framework based on classical and

contemporary theory. The straightforward writing style and effective use of examples enables students to understand and effectively perform key speechmaking activities. The six-step framework emphasizes topic selection, audience analysis and adaptation, effective research (including appropriate use of Internet resources), organization (with emphasis on outlining), language and delivery. The six action steps are introduced in generic form and then later adapted to follow principles of informative and persuasive speaking. THE CHALLENGE OF EFFECTIVE SPEAKING prepares students to take what they have learned in the classroom and apply it to their everyday lives.

An Introduction to Communication Studies Dec 30 2019 In this introductory textbook, the author contextualises approaches and theories on communication studies by making use of local examples from the mass media, as well as relevant political and social experiences. The book is divided into two parts. The first provides students with a strong foundation in communication while the second focuses on the areas of specialisation within communication studies. Each chapter starts with the learning Outcomes and a short overview of the chapter. Students can monitor their learning by using the summaries and 'test yourself' questions at the end of every chapter. Scenarios provide examples of how the theory can be applied in practice. This makes for a learner-friendly and accessible book which will prove invaluable to Students and professionals alike. Beginner students majoring in Communication Studies, as well as those studying towards various degrees or qualifications where communication is a prerequisite will find this book useful.
