Computerworld Jun 26 2019 For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

Multimedia Technology and Enhanced Learning Aug 09 2020 This proceedings, ICMTEL 2022, constitutes the refereed proceedings of the 4th International Conference on Multimedia Technology and Enhanced Learning, ICMTEL 2022, held in April 2022. Due to the COVID-19 pandemic the conference was held virtually. The 59 revised full papers have been selected from 188 submissions. They were organized in topical sections as

follows: internet of things and communication; education and enterprise; machine learning; big data and signal processing; workshop of data fusion for positioning and navigation; and workshop of intelligent systems and control.

Sport Promotion and Sales Management Mar 16 2021 This is a guide to promotion and sales in the sport industry. Experts from the classroom and sports field offer insights and experiential data on the skills needed to succeed in sports promotion and sales.

Case Studies in Project, Program, and Organizational Project Management Oct 11 2020 The ever expanding market need for information on how to apply project management principles and the PMBOK® contents to day-to-day business situations has been met by our case studies book by Harold Kerzner. That book was a spin-off from and ancillary to his best selling text but has gained a life of its own beyond adopters of that textbook. All indications are that the market is hungry for more cases while our own need to expand the content we control, both in-print and online would benefit from such an expansion of project management "case content". The authors propose to produce a book of cases that compliment Kerzner's book. A book that offers cases beyond the general project management areas and into PMI®'s growth areas of program management and organizational project management. The book will be structured to follow the PMBOK in coverage so that it can not only be used to supplement project management courses, but also for self study and training courses for the PMP® Exam. (PMI, PMBOK, PMP, and Project Management Professional are registered marks of the Project Management Institute, Inc.)

Training Bulletin Apr 28 2022

Proceedings of the 3rd International Conference on Electrical and Information Technologies for Rail Transportation (EITRT) 2017 Nov 23 2021 The proceedings collect the latest research trends, methods and experimental results in the field of electrical and information technologies for rail transportation. The topics cover novel traction drive technologies of rail transportation, safety technology of rail transportation system, rail transportation information technology, rail transportation operational management technology, rail transportation cutting-edge theory and technology etc. The proceedings can be a valuable reference work for researchers and graduate students working in rail transportation, electrical engineering and information technologies.

Obsessed Nov 11 2020 Being obsessed with positive change and ideas can propel us to extraordinary achievements and can be a fantastic positive driver of change. In the age of AI wired consumers with irrationally high demands, we need to be obsessed with creating smooth, differentiated, relevant, exciting customer experiences and frictionless customer services. Any of those interactions should be driven by customer data - the pulse of every customer's unique heartbeat, and an organisation that has adopted new methodologies, processes, and technology platforms. In Obsessed, we demystify the complex world of data and sales and marketing technology. We answer questions like: How do you build a data culture and strategy? How can you be more intentional about the technology foundation you choose to improve your marketing and sales engine across the customer lifecycle. How do you create an obsession for the right metrics that focus on value? How do you infuse Artificial Intelligence capabilities into your organization? Can you see GDPR as an enabler? Finally, we need a cultural paradigm shift in dealing with marketing technology and applying it to marketing and sales scenarios. An obsession with long term thinking and customer relationships based on value rather than short term. And that's when you truly start rebooting your revenue engine. ABOUT THE AUTHOR Marc Bresseel started his professional career at IBM and subsequently grew further while at Microsoft. He was fortunate to kick off the Microsoft online services MSN, Hotmail, and Messenger as one of the early internet

pioneers in Belgium. He managed the sales and marketing activities for MSN and Microsoft online services in the EMEA markets and became Global CMO for Microsoft Advertising. After sixteen years at Microsoft, Marc managed the top 14 markets for IPG Mediabrands. In 2014 he became a founding partner of Duval Union, an organization that provides business & marketing consulting, and marketing & communication execution to brands.

Communication Skills Training Sep 21 2021 Decode Your Relationships And Discover The Power Of Effective Communication A 75-year Harvard study found that love is the secret to a fulfilling life. But if that's true, why do so many people break up? The #1 reason for the dramatic increase in breakups is that we don't take time for real communication within our relationship. The key to any relationship is good communication. In "Communication Skills Training", you'll discover: - The secret language to maintain healthy and fulfilling relationships in all areas of life - How to read the invisible hints someone gives - The #1 skill for meaningful conversations - How to create a team of warriors who love to fight for your ideas - How to become a master in public speaking and own the stage like Tony Robbins - How to use communication at work for more success and satisfaction in your job - How to deal with toxic relationships and never be manipulated again - How to create a romantic fairytale relationship and live happily ever after - 17 relationship killers and how to overcome them - How to fix a relationship and how to break up when there is nothing left to fix Even if you call yourself a relationship expert, there are still hidden secrets about the other gender you probably haven't heard of. If you want to maintain healthy, long-lasting relationships, then check out this guidebook right now!

MCTS Self-Paced Training Kit (Exam 70-667) Sep 29 2019 Announcing an all-new SELF-PACED TRAINING KIT designed to help maximize your performance on 70-667, the required exam for the MCTS certification: Configuring Microsoft SharePoint 2010. This 2-in-1 kit includes the official Microsoft study guide, plus practice tests on CD to help you assess your skills. It comes packed with the tools and features exam candidates want most - including in-depth, self-paced training based on final exam content; rigorous, objective-by-objective review; exam tips from expert, exam-certified authors; and customizable testing options. It also provides real-world scenarios, case study examples, and troubleshooting labs for the skills and expertise you can use on the job. Work at your own pace through the lessons and lab exercises in the official study guide. Coverage includes installing and configuring a SharePoint environment, deploying applications, and managing and maintaining a SharePoint environment. Then assess yourself using practice questions on CD, featuring multiple customizable testing options to meet your specific needs. Choose timed or untimed testing mode, generate random tests, or focus on discrete objectives. You get detailed explanations for right and wrong answers - including pointers back to the book for further study. - making this kit an exceptional value and a great career investment. A Note Regarding the CD or DVD Assess your skills with practice tests. You can work through hundreds of questions using multiple testing modes to meet your specific learning needs. You get detailed explanations for right and wrong answers-including a customized learning path that describes how and where to focus your studies. For customers who purchase an ebook version of this title, instructions for downloading the CD files can be found in the ebook.

Report of the Royal Commission on the Poor Laws and Relief of Distress Dec 01 2019

Natural Computing for Unsupervised Learning Jun 06 2020 This book highlights recent research advances in unsupervised learning using natural computing techniques such as artificial neural networks, evolutionary algorithms, swarm intelligence, artificial immune systems, artificial life, quantum computing, DNA computing, and others. The book also includes information on the use of natural computing techniques for unsupervised learning tasks. It features several trending topics, such as big data scalability, wireless network analysis, engineering optimization, social media, and complex network analytics. It shows how these applications have triggered a number of new natural computing techniques to improve the performance of unsupervised learning methods. With this book, the readers can easily capture new advances in this area with systematic

understanding of the scope in depth. Readers can rapidly explore new methods and new applications at the junction between natural computing and unsupervised learning. Includes advances on unsupervised learning using natural computing techniques Reports on topics in emerging areas such as evolutionary multi-objective unsupervised learning Features natural computing techniques such as evolutionary multi-objective algorithms and many-objective swarm intelligence algorithms

CIO Paradox Mar 04 2020 Regardless of industry, most major companies are becoming technology companies. The successful management of information has become so critical to a company's goals, that in many ways, now is the age of the CIO. Yet IT executives are besieged by a host of contradictions: bad technology can bring a company to its knees, but corporate boards rarely employ CIOs; CIOs must keep costs down at the very same time that they drive innovation. CIOs are focused on the future, while they are tethered by technology decisions made in the past. These contradictions form what Martha Heller calls The CIO Paradox, a set of conflicting forces that are deeply embedded in governance, staffing, executive expectations, and even corporate culture. Heller, who has spent more than 12 years working with the CIO community, offers guidance to CIOs on how to attack, reverse, or neutralize the paradoxical elements of the CIO role. Through interviews with a wide array of successful CIOs, The CIO Paradox helps readers level the playing field for IT success and get one step closer to bringing maximum value to their companies.

Model-driven Simulation and Training Environments for Cybersecurity Feb 12 2021 This book constitutes the refereed post-conference proceedings of the Second International Workshop on Model-Driven Simulation and Training Environments for Cybersecurity, MSTEC 2020, held in Guildford, UK, in September 2020 in conjunction with the 24th European Symposium on Research in Computer Security, ESORICS 2020. The conference was held virtually due to the COVID-19 pandemic. The MSTEC Workshop received 20 submissions from which 10 full papers were selected for presentation. The papers are grouped in thematically on: cyber security training modelling; serious games; emulation & simulation studies; attacks; security policies.

Tackling Society's Grand Challenges with Design Science Apr 04 2020 This book constitutes the thoroughly refereed proceedings of the 11th International Conference on Design Science Research in Information Systems and Technology, DESRIST 2016, held in St. John, Newfoundland, Canada, in May 2016. The 11 full papers, 2 short papers and 9 short papers describing prototypes and products were carefully reviewed and selected from 54 submissions. The papers are organized around the following topics: methodological aspects of design science; applications of design science research to real world design problems, for example in social media, health care systems, embedded technologies, climate, security.

Practical Natural Language Processing Aug 28 2019 Many books and courses tackle natural language processing (NLP) problems with toy use cases and well-defined datasets. But if you want to build, iterate, and scale NLP systems in a business setting and tailor them for particular industry verticals, this is your guide. Software engineers and data scientists will learn how to navigate the maze of options available at each step of the journey. Through the course of the book, authors Sowmya Vajjala, Bodhisattwa Majumder, Anuj Gupta, and Harshit Surana will guide you through the process of building real-world NLP solutions embedded in larger product setups. You'll learn how to adapt your solutions for different industry verticals such as healthcare, social media, and retail. With this book, you'll: Understand the wide spectrum of problem statements, tasks, and solution approaches within NLP Implement and evaluate different NLP applications using machine learning and deep learning methods Fine-tune your NLP

solution based on your business problem and industry vertical Evaluate various algorithms and approaches for NLP product tasks, datasets, and stages Produce software solutions following best practices around release, deployment, and DevOps for NLP systems Understand best practices, opportunities, and the roadmap for NLP from a business and product leader's perspective

Handbook on Business Process Management 1 Jul 20 2021 Business Process Management (BPM) has become one of the most widely used approaches for the design of modern organizational and information systems. The conscious treatment of business processes as significant corporate assets has facilitated substantial improvements in organizational performance but is also used to ensure the conformance of corporate activities. This Handbook presents in two volumes the contemporary body of knowledge as articulated by the world's leading BPM thought leaders. This first volume focuses on arriving at a sound definition of BPM approaches and examines BPM methods and process-aware information systems. As such, it provides guidance for the integration of BPM into corporate methodologies and information systems. Each chapter has been contributed by leading international experts. Selected case studies complement their views and lead to a summary of BPM expertise that is unique in its coverage of the most critical success factors of BPM. The second edition of this handbook has been significantly revised and extended. Each chapter has been updated to reflect the most current developments. This includes in particular new technologies such as in-memory data and process management, social media and networks. A further focus of this revised and extended edition is on the actual deployment of the proposed theoretical concepts. This volume includes a number of entire new chapters from some of the world's leading experts in the domain of BPM.

Designing and Building Security Operations Center Dec 25 2021 Do you know what weapons are used to protect against cyber warfare and what tools to use to minimize their impact? How can you gather intelligence that will allow you to configure your system to ward off attacks? Online security and privacy issues are becoming more and more significant every day, with many instances of companies and governments mishandling (or deliberately misusing) personal and financial data. Organizations need to be committed to defending their own assets and their customers' information. Designing and Building a Security Operations Center will show you how to develop the organization, infrastructure, and capabilities to protect your company and your customers effectively, efficiently, and discreetly. Written by a subject expert who has consulted on SOC implementation in both the public and private sector, Designing and Building a Security Operations Center is the go-to blueprint for cyber-defense. Explains how to develop and build a Security Operations Center Shows how to gather invaluable intelligence to protect your organization Helps you evaluate the pros and cons behind each decision during the SOC-building process

Official (ISC)2® Guide to the ISSMP® CBK® Dec 13 2020 As the recognized leader in the field of information security education and certification, the (ISC)2 promotes the development of information security professionals around the world. The Certified Information Systems Security Professional-Information Systems Security Management Professional (CISSP-ISSMP) examination assesses individuals understa

Advanced Persistent Training Feb 24 2022 Gain greater compliance with corporate training by addressing the heart of the very awareness vs. compliance problem: people are human. People have incredible strengths and incredible weaknesses, and as a Information Security professional, you need to recognize and devise training strategies that take advantage of both. This concise book introduces two such strategies, which combined, can take a security awareness program to the next level of effectiveness, retention, compliance, and maturity. Security policies and procedures are often

times inconvenient, technically complex, and hard to understand. Advanced Persistent Training provides numerous tips from a wide range of disciplines to handle these especially difficult situations. Many information security professionals are required by regulation or policy to provide security awareness training within the companies they work for, but many believe that the resulting low compliance with training does not outweigh the costs of delivering that training. There are also many who believe that this training is crucial, if only it could be more effective. What you will learn: Present awareness materials all year-round in a way that people will really listen. Implement a "behavior-first" approach to teaching security awareness. Adopt to gamification the right way, even for people who hate games. Use tips from security awareness leaders addressing the same problems you face. Who is this book for Security awareness professionals or IT Security professionals who are tasked with teaching security awareness within their organization.

Risk Centric Threat Modeling Oct 30 2019 This book introduces the Process for Attack Simulation & Threat Analysis (PASTA) threat modeling methodology. It provides an introduction to various types of application threat modeling and introduces a risk-centric methodology aimed at applying security countermeasures that are commensurate to the possible impact that could be sustained from defined threat models, vulnerabilities, weaknesses, and attack patterns. This book describes how to apply application threat modeling as an advanced preventive form of security. The authors discuss the methodologies, tools, and case studies of successful application threat modeling techniques. Chapter 1 provides an overview of threat modeling, while Chapter 2 describes the objectives and benefits of threat modeling. Chapter 3 focuses on existing threat modeling approaches, and Chapter 4 discusses integrating threat modeling within the different types of Software Development Lifecycles (SDLCs). Threat modeling and risk management is the focus of Chapter 5. Chapter 6 and Chapter 7 examine Process for Attack Simulation and Threat Analysis (PASTA). Finally, Chapter 8 shows how to use the PASTA risk-centric threat modeling process to analyze the risks of specific threat agents targeting web applications. This chapter focuses specifically on the web application assets that include customer's confidential data and business critical functionality that the web application provides.

- Provides a detailed walkthrough of the PASTA methodology alongside software development activities, normally conducted via a standard SDLC process
- Offers precise steps to take when combating threats to businesses
- Examines real-life data breach incidents and lessons for risk management

Risk Centric Threat Modeling: Process for Attack Simulation and Threat Analysis is a resource for software developers, architects, technical risk managers, and seasoned security professionals.

The Almanac of American Employers 2007 Jun 18 2021 Looking for jobs and careers with top American employers--the companies that are recruiting and hiring today? Do you want employment with top salaries, benefits, stock options and advancement opportunities? The Almanac of American Employers leads job seekers to the 500 best, largest, and most successful companies that are hiring in America. From new college graduates, to top executives, to first time employees seeking companies recruiting entry level workers, job seekers rely on our complete profiles of the 500 fastest-growing, major corporate employers in America today--companies creating the best job opportunities. This immense reference book includes hard-to-find information, such as benefit plans, stock plans, salaries, hiring and recruiting plans, training and corporate culture, growth, new facilities, research & development, fax numbers, toll-free numbers and Internet addresses. We rate over 100 firms as "Hot Spots" for job openings and advancement opportunities for women and minorities. In addition, The Almanac of American Employers includes a job market trends analysis and 7 Keys For Research for job openings. We give indices by career type, locations, industry and much more. Whether you're a new college graduate seeking the best salaries, training and advancement opportunities, or an experienced executive doing corporate research to find companies with the best benefit plans and stock options, The Almanac of American Employers is your complete reference to today's hottest companies. Both printed book and eBook purchasers can receive a free copy of the database on CD-ROM, enabling export of employer contacts, phone numbers and addresses.

Bouncer Training Guide Jan 26 2022 The National Nightclub Security Council, is an independent membership organization, Think tank, Publisher and Training provider dedicated to being up to date resources for its basic members, board members, business owners, managers, educators and students, and other interested citizens in order to help them better understand the nightclub/bar security training and policy choices facing the bar/club owners, Managers, Security Supervisors and Security staff in todays world. Today NNSC is one of the largest privately held nightclub training companies in the nation offering a curriculum of over one hundred topics of academy quality nightclub training programs throughout the United States.

StarBriefs Plus Sep 09 2020 With about 200,000 entries, StarBriefs Plus represents the most comprehensive and accurately validated collection of abbreviations, acronyms, contractions and symbols within astronomy, related space sciences and other related fields. As such, this invaluable reference source (and its companion volume, StarGuides Plus) should be on the reference shelf of every library, organization or individual with any interest in these areas. Besides astronomy and associated space sciences, related fields such as aeronautics, aeronomy, astronautics, atmospheric sciences, chemistry, communications, computer sciences, data processing, education, electronics, engineering, energetics, environment, geodesy, geophysics, information handling, management, mathematics, meteorology, optics, physics, remote sensing, and so on, are also covered when justified. Terms in common use and/or of general interest have also been included where appropriate.
