[Land of seven rivers](#) Jul 19 2021 DID THE GREAT FLOOD OF INDIAN LEGEND ACTUALLY HAPPEN? WHY DID THE BUDDHA WALK TO SARNATH TO GIVE HIS FIRST SERMON? HOW DID THE EUROPEANS MAP INDIA? The history of any country begins with its geography. With sparkling wit and intelligence, Sanjeev Sanyal sets off to explore India and look at how the country's history was shaped by, among other things, its rivers, mountains and cities. Traversing remote mountain passes, visiting ancient archaeological sites, crossing rivers in shaky boats and immersing himself in old records and manuscripts, he considers questions about Indian history that we rarely ask: Why do Indians call their country Bharat? How did the British build the railways across the subcontinent? Why was the world's highest mountain named after George Everest? Moving from the geological beginnings of the subcontinent to present-day Gurgaon, Land of the Seven Rivers is riveting, wry and full of surprises. It is the most entertaining history of India you will ever read.

Southeast Asia has recently attracted archaeological attention as the locus for the first recorded sea crossings; as the region of origin for the Austronesian population dispersal across the Pacific from Neolithic times; as an arena for the development of archaeologically-rich Neolithic, and metal using communities, especially in Thailand and Vietnam, and as the backdrop for several unique and strikingly monumental Indic civilizations, such as the Khmer civilization centred around Angkor. Southeast Asia is invaluable to anyone interested in the full history of the region.

**Republicanism, Communism, Islam** Mar 15 2021 In Republicanism, Communism, Islam, John T. Sidel provides an alternate vantage point for understanding the variegated forms and trajectories of revolution across the Philippines, Indonesia, and Vietnam, a perspective that is de-nationalized, internationalized, and transnationalized. Sidel positions this new vantage point against the conventional framing of revolutions in modern Southeast Asian history in terms of a nationalist template, on the one hand, and distinctive local cultures and forms of consciousness, on the other. Sidel's comparative analysis shows how—in very different, decisive, and often surprising ways—the Philippine, Indonesian, and Vietnamese revolutions were informed, enabled, and impelled by diverse cosmopolitan connections and international conjunctures. Sidel addresses the role of Freemasonry in the making of the Philippine revolution, the importance of Communism and Islam in Indonesia's Revolusi, and the influence that shifting political currents in China and anticolonial movements in Africa had on Vietnamese revolutionaries. Through this assessment, Republicanism, Communism, and Islam tracks how these forces, rather than nationalism per se, shaped the forms of these revolutions, the ways in which they unfolded, and the legacies which they left in their wakes.

**History Textbooks and the Wars in Asia** Feb 11 2021 Over the past fifteen years Northeast Asia has witnessed growing intraregional exchanges and interactions, especially in the realms of culture and economy. Still, the region cannot escape from the burden of history. This book examines the formation of historical memory in four Northeast Asian societies (China, Japan, South Korea, and Taiwan) and the United States focusing on the period from the beginning of the Sino-Japanese war in 1931 until the formal conclusion of the Pacific War with the San Francisco Peace Treaty of 1951. The contributors analyse the recent efforts of Korean, Japanese, and Chinese scholars to write a 'common history' of Northeast Asia and question the underlying motivations for their efforts and subsequent achievements. In doing so, they contend that the greatest obstacle to reconciliation in Northeast Asia lies in the existence of divided, and often conflicting, historical memories. The book argues that a more fruitful approach lies in understanding how historical memory has evolved in each country and been incorporated into respective master narratives. Through uncovering the existence of different master narratives, it is hoped, citizens will develop a more self-critical, self-reflective approach to their own history and that such an introspective effort has the potential to lay the foundation for greater self- and mutual understanding and eventual historical reconciliation in the region. This book will be essential reading for students and scholars of Asian history, Asian education and international relations in East Asia.

**In the Land of a Thousand Gods** Mar 03 2020 A monumental history of Asia Minor from the Stone Age to the Roman Empire In this critically acclaimed book, Christian Marek masterfully provides the first comprehensive history of Asia Minor from prehistory to the Roman imperial period. Blending rich narrative with in-depth analyses, In the Land of a Thousand Gods shows Asia Minor's shifting orientation between East and West and its role as both a melting pot of nations and a bridge for cultural transmission. Marek employs ancient sources to illuminate civic institutions, urban and rural society, agriculture, trade and money, the influential Greek writers of the Second Sophistic, the notoriously bloody exhibitions of the gladiatorial arena, and more. He draws on the latest research—in fields ranging from demography and economics to architecture and religion—to describe how Asia Minor became a center of culture and wealth in the Roman Empire. A breathtaking work of scholarship, In the Land of a Thousand Gods will become the standard reference book on the subject in English.

**Underground Asia** Jun 29 2022 A major historian tells the dramatic and untold story of the shadowy networks of revolutionaries across Asia who laid the foundations in the early twentieth century for the end of European imperialism on their continent. This is the epic tale of how modern Asia emerged out of conflict between imperial powers and a global network of revolutionaries in the turbulent early decades of the twentieth century. In 1900, European empires had not yet reached their territorial zenith. But a new generation of Asian radicals had already planted the seeds of their destruction. They gained new energy and recruits after the First World War and especially the Bolshevik Revolution, which sparked utopian visions of a free and communist world order led by the peoples of Asia. Aided by the new technologies of cheap printing presses and international travel, they built clandestine webs of resistance from imperial capitals to the front lines of insurgency that stretched from Calcutta and Bombay to Batavia, Hanoi, and Shanghai. Tim Harper takes us into the heart of this shadowy world by following the interconnected lives of the most remarkable of these Marxists, anarchists, and nationalists, including the Bengali radical M. N. Roy, the iconic Vietnamese leader Ho Chi Minh, and the enigmatic Indonesian communist Tan Malaka. He recreates the extraordinary milieu of stowaways, false identities, secret codes, cheap firearms, and conspiracies in which they worked. He shows how they fought with subterfuge, violence, and persuasion, all the while struggling to stay one step ahead of imperial authorities. *Underground Asia* shows for the first time how Asia's national liberation movements crucially depended on global action. And it reveals how the consequences of the revolutionaries' struggle, for better or worse, shape Asia's destiny to this day.

**Revelation** Oct 02 2022 The final book of the Bible, Revelation prophesies the ultimate judgement of mankind in a series of allegorical visions, grisly images and numerological predictions. According to these, empires will fall, the "Beast" will be destroyed and Christ will rule a new Jerusalem. With an introduction by Will Self.

*A History of Asia* Nov 03 2022 *A History of Asia* is the only text to cover the area known as "monsoon Asia" - India, China, Korea, Japan, and Southeast Asia- from the earliest times to the present. Written by leading scholar Rhoads Murphey, the book uses an engaging, lively tone to chronicle the complex political, social, intellectual, and economic histories of this area. Popular because of its scope and coverage, as well as its illustrations, maps, and many boxed primary sources, the new edition of *A History of Asia* continues as a leader in its field.

**Modern South Asia** Aug 08 2020 A wide-ranging survey of the Indian sub-continent, *Modern South Asia* gives an enthralling account of South Asian history. After sketching the pre-modern history of the subcontinent, the book concentrates on the last three centuries from c.1700 to the present. Jointly written by two leading Indian and Pakistani historians, *Modern South Asia* offers a rare depth of understanding of the social, economic and political realities of this region. This comprehensive study includes detailed discussions of: the structure and ideology of the British raj; the meaning of subaltern resistance; the refashioning of social relations along lines of caste class, community and gender; and the state and economy, society and politics of post-colonial South Asia. The new edition includes a rewritten, accessible introduction and a chapter by chapter revision to take into account recent research. The second edition will also bring the book completely up to date with a chapter on the period from 1991 to 2002 and a discussion of the last millennium in sub-continental history.

**The History of Development** Sep 28 2019 In this classic text, now in its fourth edition, Gilbert Rist provides a complete and powerful overview of what the idea of development has meant throughout history. He traces it from its origins in the Western view of history, through the early stages of the world system, the rise of US hegemony, and the supposed triumph of third-worldism, through to new concerns about the environment and globalization. In a new chapter on post-development models and ecological dimensions, written against a background of world crisis and ideological disarray, Rist considers possible ways forward and brings the book completely up to date. Throughout, he argues persuasively that development has been no more than a collective delusion, which in reality has resulted only in widening market relations, whatever the intentions of its advocates.

*History of International Relations* Apr 27 2022 Existing textbooks on international relations treat history in a cursory fashion and perpetuate a Euro-centric perspective. This textbook pioneers a new approach by historicizing the material traditionally taught in International Relations courses, and by explicitly focusing on non-European cases, debates and issues. The volume is divided into three parts. The first part focuses on the international systems that traditionally existed in Europe, East Asia, pre-Columbian Central and South America, Africa and Polynesia. The second part discusses the ways in which these international systems were brought into contact with each other through the agency of Mongols in Central Asia, Arabs in the Mediterranean and the Indian Ocean, Indic and Sinic societies in South East Asia, and the Europeans through their travels and colonial expansion. The concluding section concerns contemporary issues: the processes of decolonization, neo-colonialism and globalization – and their consequences on contemporary society. *History of International Relations* provides a unique textbook for undergraduate and graduate students of international relations, and anybody interested in international relations theory, history, and contemporary politics.

**Designing History in East Asian Textbooks** Mar 27 2022 This book analyses the efforts throughout East Asia to deploy education for purposes of political socialization, and in particular in order to shape notions of identity. The chapters also examine the trend of 'common textbook initiatives', which have recently emerged in East Asia with the aim of helping to defuse tensions arguably fuelled by existing practices of mutual (mis)representation. These are analysed in relation to the East Asian political context, and compared with previous and ongoing endeavours in other parts of the world, particularly Europe, which have been keenly observed by East Asian practitioners. Written by a group of international education experts, chapters discuss the enduring focus on the role of curricula in inculcating homogenous visions of the national self, and indeed homogenized visions of significant 'others'. Including contributions from scholars and curriculum developers involved personally in the writing of national and multi-national history textbooks this book will be of interest to students and scholars of Asian education, Asian history and comparative education studies. Götzel Müller is Professor of Chinese Studies, University of Heidelberg, Germany

*Consumer Culture Theory in Asia* Jan 13 2021 We live in times of increasing world uncertainty. Consumer culture in Asia has embodied such precariousness, with their unprecedented states of both prosperity and vulnerability. Works in this volume examine the consumer cultures that exist in today's precarious Asia. They do this through culturally oriented, critical consumer research. How deeply has the consumer precariousness in Asia been intertwined with the sociohistorical patterning of consumption including class, gender, and other social categories? How do these problematics affect consumers' identity projects, consumer rituals, and marketplace cultures? How is consumer precariousness aggravated by the governmentality of the superpower? How does the changing landscape of inter-Asian and global popular culture impact consumer culture in these nations? Together, the authors in this volume attempt to answer these questions through consumer research within the paradigm known as consumer culture theory (CCT). Since most CCT inquiry has been in Western contexts, this volume augments the existing knowledge. It presents the most current, critical, historical, and material consumer studies focused on Asia. This volume will be of interest to seasoned CCT researchers and academics, for anyone new to CCT, and for postgraduate students interested in CCT or writing a consumer culture-related thesis.

**Russia & Asia** May 05 2020 A new approach to the study of Russian history. Traditionally the history of Russia has been interpreted from the European standpoint, and has more often than not been based on European sources and methods. However, Edgar Knobloch takes a completely new and unconventional scholarly approach to the history of Russia. Using economic and legal analyses, archeology and the history of art, as well as analogies with other countries and cultures, he charts the influence and traditions of the Eastern civilizations in Russian history—an element of exceptional importance that, until now, has been largely neglected by historians. This new treatment, which takes into full account the effect of Persian, Turkish, Byzantine and nomadic influences—rather than just the European—enables the author to elucidate and explain many controversial events and to draft a continuous line of development from the earliest past right down to our own times. 30 maps and diagrams.

**Banking on the Future of Asia and the Pacific** Apr 15 2021 This book is a history of the Asian Development Bank (ADB), a multilateral development bank established 50 years ago to serve Asia and the Pacific. Focusing on the region's economic development, the evolution of the international development agenda, and the story of ADB itself, this book raises several key questions: What are the outstanding features of regional development to which ADB had to respond? How has the bank grown and evolved in changing circumstances? How did ADB's successive leaders promote reforms while preserving continuity with the efforts of their predecessors? ADB has played an important role in the transformation of Asia and the Pacific the past 50 years. As ADB continues to evolve and adapt to the region's changing development landscape, the experiences highlighted in this book can provide valuable insight on how best to serve Asia and the Pacific in the future.

**How China Escaped Shock Therapy** Sep 20 2021 China has become deeply integrated into the world economy. Yet, gradual marketization has facilitated the country's rise without leading to its wholesale assimilation to global neoliberalism. This book uncovers the fierce contest about economic reforms that shaped China's path. In the first post-Mao decade, China's reformers were sharply divided. They agreed that China had to reform its economic system and move toward more marketization—but struggled over how to go about it. Should China destroy the core of the socialist system through shock therapy, or should it use the institutions of the planned economy as market creators? With hindsight, the historical record proves the high stakes behind the question: China embarked on an economic expansion commonly described as unprecedented in scope and pace, whereas Russia's economy collapsed under shock therapy. Based on extensive research, including interviews with key Chinese and international participants and World Bank officials as well as insights gleaned from unpublished documents, the book charts the debate that ultimately enabled China to follow a path to gradual reindustrialization. Beyond shedding light on the crossroads of the 1980s, it reveals the intellectual foundations of state-market relations in reform-era China through a *longue durée* lens. Overall, the book delivers an original perspective on China's economic model and its continuing contestations from within and from without.

**Ready Seapower** Oct 10 2020 No naval command has done more than the Seventh Fleet to defend and promote American interests in Asia. This "fighting fleet" was in the forefront of U.S. forces involved in the Pacific campaigns of World War II and the conflicts in Korea, Vietnam, and the Arabian Gulf. In the last half of the 20th century and the first decade of the 21st century, the Seventh Fleet has stood as a bulwark against aggression and partnered with America's Asian allies to maintain peace and stability in this vital region. Whether combating conventional forces, guerrillas, insurgents, pirates, or terrorists, Seventh Fleet Sailors have routinely displayed exceptional courage and dedication, serving also as ambassadors for America's core values of freedom, democracy, free market enterprise, and respect for human rights.

**Middle Kingdom and Empire of the Rising Sun** Jul 27 2019 "Japan and China have been rivals for more than a millennium. Until the late nineteenth century, China was the more powerful, while Japan took the upper hand in the twentieth century. Now, China's resurgence has emboldened it as Japan perceives itself falling behind, exacerbating long-standing historical frictions ... Dreyer argues that recent disputes should be seen as manifestations of embedded rivalries rather than as issues whose resolution would provide a lasting solution to deep-standing disputes"--Jacket.

**Querying the Medieval** Nov 30 2019 "Drawing on thinkers as diverse as V. N. Volosinov, R. G. Collingwood, and E. Laclau, this volume challenges the predominant idea of a text as "monological" both in its "authorist" and "contextualist" versions. The authors instead seek to understand texts as "dialogical" moments in the relations that agents have with themselves and with other agents. From this perspective, each author is able to pry open a particular text and reveal the articulative relation that each has had with the world in which it was situated. The result is a revised look at the relationship between history, national identity, and religion in medieval South Asia."--BOOK JACKET.
