Provides a clear visual understanding of complex information with high-quality line drawings, photographs, and diagnostic and treatment algorithms.

The Latest in Peritoneal Dialysis Jul 22 2019 This book summarizes the advances and new concepts introduced in the last years on peritoneal dialysis (PD) and its complications. PD therapy is a renal replacement peritoneal membrane using a semi-permeable barrier to liquids and solutes. The abdominal cavity with all its components, mesothelial cells, fat tissue, immune system components and others are activated by the PD fluids that although every time are more biocompatible, induce production of molecules with the local and systemic effects. Locally there is a thickening of the peritoneal membrane leading to the failure of this and where the transdifferentiation of mesothelial cells plays a key role. Systemically activating abdominal cavity appears to be involved in atherosclerosis, diabetes, hypertension, renal bone disease pathway and others.

[Home Dialysis in Japan](#) Sep 16 2021 Presenting the latest advances in research and clinical care Despite the various advantages of home dialysis compared to in-center hemodialysis, only a fraction of patients in Japan currently opt for peritoneal dialysis or home hemodialysis. However, considerable advances in research and technical improvements have been made lately, advancing the practice of home dialysis therapy in Japan. Japanese research is well-known for its ingenuity and creative energy with regard to the development of new

machines and systems for dialysis. New insights regarding peritoneal dialysis and home hemodialysis are presented in the publication at hand: Contributions by leading Japanese experts discuss topics such as educational methods, techniques, tools, novel systems and organization of patients. The book will be of great interest to clinical physicians involved in dialysis care; Moreover, the expertise collected in this volume may contribute to the advancement of home dialysis therapy in a global context.

Informing Clinical Practice in Nephrology Oct 29 2022 Historically, clinical decisions in renal medicine have been challenged by the scarce availability of robust supportive evidence. Not only are the number of randomized controlled trials (RCTs) in Nephrology the third lowest amongst the medical specialties but in many instances the trials themselves are of poor quality. In addition, practice has been further influenced by extrapolation from the outcomes of general population clinical trials which exclude renal patients. The difference between the ideal trial participant and real complex cases encountered in daily practice is well recognized and further compounded in renal patients with complex pathophysiology - this ultimately makes decision making in this subset of patients a real challenge. Recently, there has been a growing interest in conducting well designed RCTs in different areas of renal medicine. However, though clinical guidelines are helpful in providing the clinicians with a frame of best available evidence for a clinical condition, it denies the unique nature of each individual patient. This book offers a thorough and critical appraisal and evaluation of the key published clinical trials that have shaped current practice in nephrology, dialysis and transplantation. It will help the practicing physician close the gap between the inflexible and generalized nature of clinical guidelines and the day-to-day clinical decision-making for individual patients. It will provide the clinician with the tools required to investigate and extract the appropriate guidance to apply to individual cases in daily practice. Moreover, it will help improve the ability of junior colleagues to appraise available evidence in a systematic way when there is lack of local guidelines or when the guidelines are difficult to apply due to logistic constraints or barriers. Lastly, this book will serve as a reference for key clinical trials in different areas of renal medicine together with literature and authors views of these trials and their impact on changing practice.?

This updated textbook includes twenty new chapters and three new sections, covering supportive care and patient-centered care and outcomes. In addition, every chapter that was in the first edition has been extensively updated. This new edition covers epidemiology, acute kidney injury, primary diseases of the kidney, secondary diseases of the kidney, chronic kidney disease and complications, hemodialysis, chronic kidney disease stage 5, peritoneal dialysis, supportive care, transplantation, electrolytes and acid-base disorders, and patient centered care and outcomes for both adult and for pediatric patients. Boasting a new co-editor along with several new chapter authors and section editors, Evidence-based Nephrology is now an even better evidence-based nephrology tool, where each chapter provides a clear foundation of the topic that is supported by the best current evidence. Business and Peace: The Case of La Frutera Plantation in Datu Paglas, Maguindanao, Philippines Sep 04 2020 Mindanao, in the southern Philippines, has been the landscape of religious, social and political conflict for more than 500 years. The Magindanawn people, who embraced Islam after contact with Malay Muslims in the late 1400s, have experienced clan rivalries and other outsider aggressions leading to disenfranchisement and displacement from their ancestral domain in west Central Mindanao. In the activism and rebellion of the late 1960s and early 1970s, Magindanawn people were often caught between Philippine military forces and the Bangsamoro mujahideen. In the 1980s, there was some respite but, until the present-day, the people and the land have been subjected to continual skirmishes and sometimes all-out war. In the mid-1990s, Datu Ibrahim "Toto" Paglas III wanted to fulfill his father's dream of establishing a plantation in their homeland for community benefit. Touted as the "Datu Paglas miracle," the La Frutera banana plantation came into existence in the midst of intercultural disharmony and regional conflict. This, then, is a comprehensive, descriptive case study of La Frutera, Incorporated.

Fatherhood 4.0 Sep 23 2019 Some of Canada's most acclaimed multicultural personalities, public figures, intellectuals, entertainers, athletes, and activists share stories, memories, insights, and revelations about fatherhood, from the comic to the tragic. Through critical essays, first-person musings, interviews, conversations, spoken word, and dub poetry, this collection examines the place where cross-cultural fatherhood intersects with the worlds of technology, hip hop, and hipster culture - a cool diverse dads movement! As an African-Canadian fatherhood advocate, Dalton Higgins also digs around to see how black fathers of this millennium are faring, as academics and pundits have debated for decades what is at the heart of the problem when it comes to the much-publicized shortcomings of black fathers. Fatherhood 4.0 spots trends across a newer generation of media-savvy multi-culti dads influenced by everything from George Lopez and Bill Cosby to the Osbournes and Obama, with keen insights and essays from fatherhood activists. It includes essays on the "baby daddy" phenomenon and Bob Marley, pops in popular culture, technology and parenting, and crucial research on aboriginal fatherhood by Dr. Jessica Ball. Handbook of Research on the Role of Libraries, Archives, and Museums in Achieving Civic Engagement and Social Justice in Smart Cities Jan 28 2020 In achieving civic engagement and social justice in smart cities, literacy programs are offered in the society by three essential information service providers: libraries, archives, and museums. Although the library and museum services are documented in literature, there is little evidence of community-led library or museum services that make a full circle in understanding community-library, community-archive, and community-museum relationships. The Handbook of Research on the Role of Libraries, Archives, and Museums in Achieving Civic Engagement and Social Justice in Smart Cities examines the application of tools and techniques in library and museum literacy in achieving civic engagement and social justice. It also introduces a new outlook in the services of libraries and museums. Covering topics such as countering fake news, human rights literacies, and outreach activities, this book is essential for community-based organizations, librarians, museum administrations, education leaders, information professionals, smart city design planners, digital tool developers, policymakers engaged in diversity, researchers, and academicians.

Progress in Peritoneal Dialysis Mar 22 2022 Progress in Peritoneal Dialysis is based on judgement of a number of abstracts, submitted by interested people involved in various aspects of peritoneal dialysis. The book has a wide scope, ranging from in-vitro experiments, mathematical modelling, and clinical studies. Peritoneal Dialysis Manual Jul 26 2022 Peritoneal dialysis (PD) is a valid renal replacement therapy when incorporated in an overall integrated care programme for end-stage renal disease patients. Despite this fact, PD has not yet been established as a true long-term dialysis modality. This practical handbook offers sensible advice as well as detailed information on virtually all clinical and pathophysiological aspects of PD in a readily accessible format and explains the complexities of PD in a clear but still scientific and comprehensive way. Due to its handy size it fits in a white coat pocket of a nephrologist visiting a PD patient during rounds or in the outpatient ambulatory setting. Nephrologists, residents in nephrology and internal medicine, and all other health care workers – nurses, pharmacists, dieticians, intensivists, and medical students – involved with patients suffering from end-stage renal disease will find this book very helpful for understanding the scientific background of PD.

Applied Peritoneal Dialysis Jun 25 2022 This book offers a comprehensive guide to peritoneal dialysis (PD). Home dialysis, and more specifically PD, is growing in popularity in the US. By conservative estimates, experts suggest that 45 percent of dialysis patients in the US can be on home dialysis. However, the current penetration rate is only 10 percent. This is changing with an expected major increase in the next 5 years. One of the reasons for the low uptake is that many nephrologists lack comfort and confidence in using PD as a dialysis modality. This book addresses those concerns by covering all aspects of PD. Chapters include its history, patient selection, implementation options, comorbidities, quality of life concerns, and developing approaches to treatment. This comprehensive resource fills the unmet need for a practical, hands-on book that is both detailed and can work as a quick reference. This is an ideal guide for academic nephrologists, private practice nephrologists, NPs, PAs, nurses, fellows, and residents.

Handbuch Peritonealdialyse May 24 2022 Die Peritonealdialyse (PD) ist eine valide Nierenersatztherapie, wenn sie in ein Gesamtversorgungskonzept für Patienten mit terminaler Niereninsuffizienz eingebettet ist. Dennoch hat sich die PD bisher noch nicht als echte Langzeitdialyse-Modalität etabliert. Dieses praktische Handbuch enthält neben praktischen Ratschlägen auch ausführliche Informationen über so gut wie alle klinischen und pathophysiologischen Aspekte der PD in einem einfach zugänglichen Format. Es erklärt die komplexen Zusammenhänge der PD klar und dennoch wissenschaftlich fundiert. Dank seiner handlichen Größe passt es in die Kitteltasche jedes Nephrologen, der auf der Station oder im ambulanten Umfeld mit PD-Patienten zu tun hat. Dieses Buch hilft Nephrologen und in der Nephrologie oder Inneren Medizin tätigen Ärzten, aber auch allen anderen, die an der Versorgung von Patienten mit terminaler Nierenerkrankung beteiligt sind, wie Pflegekräften, Apothekern, Ernährungsberatern, Intensivmedizinern und Medizinstudenten, den wissenschaftlichen Hintergrund der PD zu verstehen.

Archipelagic American Studies Oct 05 2020 Departing from conventional narratives of the United States and the Americas as fundamentally continental spaces, the contributors to *Archipelagic American Studies* theorize America as constituted by and accountable to an assemblage of interconnected islands, archipelagoes, shorelines, continents, seas, and oceans. They trace these planet-spanning archipelagic connections in essays on topics ranging from Indigenous sovereignty to the work of Édouard Glissant, from Philippine call centers to US militarization in the Caribbean, and from the great Pacific garbage patch to enduring overlaps between US imperialism and a colonial Mexican archipelago. Shaking loose the straitjacket of continental exceptionalism that hinders and permeates Americanist scholarship, *Archipelagic American Studies* asserts a more relevant and dynamic approach for thinking about the geographic, cultural, and political claims of the United States within broader notions of America. Contributors Birte Blascheck, J. Michael Dash, Paul Giles, Susan Gillman, Matthew Pratt Guterl, Hsinya Huang, Allan Punzalan Isaac, Joseph Keith, Yolanda Martínez-San Miguel, Brandy Nalani McDougall, Ifeoma Kiddoe Nwankwo, Craig Santos Perez, Brian Russell Roberts, John Carlos Rowe, Cherene Sherrard-Johnson, Ramón E. Filipino Time Mar 30 2020 From spectacular deaths in a drag musical to competing futures in a call center, *Filipino Time* examines how contracted service labor performed by Filipinos in the Philippines, Europe, the Middle East, and the United States generates vital affects, multiple networks, and other lifeworlds as much as it disrupts and dislocates human relations. Affective labor and time are re-articulated in a capacious archive of storytelling about the Filipino labor diaspora in fiction, musical performance, ethnography, and

documentary film. Exploring these cultural practices, Filipino Time traces other ways of sensing, making sense of, and feeling time with others, by weaving narratives of place and belonging out of the hostile but habitable textures of labortime. Migrant subjects harness time and the imagination in their creative, life making capacities to make communal worlds out of one steeped in the temporalities and logics of capital.
