*Know Better, Do Better* Aug 26 2022 Meredith and David Liben have spent decades transforming education, working as teachers, researchers, leaders, and founders of an alternative public elementary school in Harlem "€"the Family Academy. The Libens have been on the front lines of the reading wars since 1994, when the Family Academy's first cohort of students failed the NYC end of year reading exam and they were confronted with the question: How can a school with plenty of resources, dedication to outstanding instruction, and support for social and emotional learning fail so spectacularly at teaching children how to read? The answers are collected here in *Know Better, Do Better: Teaching the Foundations So Every Child Can Read*. The Libens have poured through the research, pedagogical movements, and deeply entrenched classroom myths to find the literacy practices and instructional materials that actually improve student learning outcomes. Through their work, the Family Academy reading scores rose to the highest of any non "€"gifted school in Harlem. The best of intentions aren't enough to make children literate; educators have to know better so they can do better.

Foundations of Corporate Empire Jan 19 2022 "The Sumerians invented temple capitalism; the Assyrians made it multinational; the Phoenicians evolved controls; the Greeks leapfrogged with an entrepreneurial model that replaced it; the Romans perfected a robust blend of autonomy and regimentation that flourished for four hundred years. Foundations of Corporate Empire puts all this under a microscope." Richard T. Pascale, associate fellow, Templeton College, University of Oxford "Foundations of Corporate Empire is a dreary title for a business book that turns out to be anything but. It is in fact a sweeping, yet remarkably readable history of globalization that marshals impressive evidence..." Report on Business Magazine From the cradles of civilization to the corporations of global economy, business empires have come and gone but the essence of economic enterprise has always been with us. This is a world in which enterprises have been shaped as much by what they are as what they do, and in which an understanding of where we've come from will aid our interpretation of where we can go. Every future has a foundation to be explored. "In this well-researched and highly readable book, Moore and Lewis persuasively argue that many of today's global economic institutions and structures are not as new as often proclaimed but the product of a

long evolutionary process. Their conclusion that a historical perspective provides important clues about the future of globalization is thought provoking and worthy of broad debate." Cornelis A. de Kluyver, Dean, Peter F. Drucker Graduate School of Management "This fascinating book should serve as a timely reminder to those who seem to think that tomorrow can be managed with scarcely a backwards glance to yesterday. Compulsive reading for businessmen and politicians." Sir David Rowland, President, Templeton College, University of Oxford Foundations of Corporate Empire sketches the history of international business from the emergence of ancient Assyria around 2000 BC through the Phoenician, Carthaginian and Grecian periods up to the time of the Roman Imperium under Augustus, and then on to the medieval and modern eras ending with today's post-modern times. The history of these civilisations has developed around different economic models, which have regularly re-emerged across time and are still present today. Foundations of Corporate Empire looks at our past economic foundations to better understand where we are today and where we should be tomorrow. "A fascinating and important work, which deserves to be widely read." Professor Alister McGrath, Oxford University "Foundations of Corporate Empire offered me an eye-opening insight into how we have come to do business as we do. If you truly want to understand capitalism as we know it, read this book. Beyond any reasonable doubt, it proved to me the old saying that the more things change the more things stay the same." Professor D'Aveni, author of Hypercompetition: Managing the dynamics of strategic maneuvering

Here for Good: Community Foundations and the Challenges of the 21st Century Jul 25 2022 Community foundations bring together the resources of individuals, families, and businesses to support effective nonprofits in their communities. Over the years, foundations have come to engage community problem-solving through more than just grant-making. They have added a rich array

of other activities, including programs of community capacity building, active modes of advocacy, and centres for meeting. In 2011, the 700+ institutions in the United States gave an estimated \$4.2 billion to a variety of nonprofit activities in fields that included the arts and education, health and human services, the environment, and disaster relief. The origins of this book stem from conversations among the leadership of community foundations about the challenges they must overcome in order to make such "foundational" contributions to their communities. As community foundations enter the second century of their existence (the first foundation was formed in Cleveland in 1914), the need for knowledge and best practices has never been greater. This book, with expert authors representing the best and the brightest in this important field, fills that need.

## **The Health of Lesbian, Gay, Bisexual, and Transgender People**

Aug 14 2021 At a time when lesbian, gay, bisexual, and transgender individuals--often referred to under the umbrella acronym LGBT--are becoming more visible in society and more socially acknowledged, clinicians and researchers are faced with incomplete information about their health status. While LGBT populations often are combined as a single entity for research and advocacy purposes, each is a distinct population group with its own specific health needs. Furthermore, the experiences of LGBT individuals are not uniform and are shaped by factors of race, ethnicity, socioeconomic status, geographical location, and age, any of which can have an effect on health-related concerns and needs. The Health of Lesbian, Gay, Bisexual, and Transgender People assesses the state of science on the health status of LGBT populations, identifies research gaps and opportunities, and outlines a research agenda for the National Institute of Health. The report examines the health status of these populations in three life stages: childhood and adolescence, early/middle adulthood, and later adulthood. At each life stage, the committee studied mental health, physical health, risks and protective factors, health services, and contextual influences. To advance understanding of the health needs of all LGBT individuals, the report finds that researchers need more data about the demographics of these populations, improved methods for collecting and analyzing data, and an increased participation of sexual and gender minorities in research. The Health of Lesbian, Gay, Bisexual, and Transgender People is a valuable resource for policymakers, federal agencies including the National Institute of Health (NIH), LGBT advocacy groups, clinicians, and service providers.

Learning to Improve Apr 10 2021 As a field, education has largely failed to learn from experience. Time after time, promising education reforms fall short of their goals and are abandoned as other promising ideas take their place. In *Learning to Improve*, the authors argue for a new approach. Rather than “implementing fast

and learning slow,” they believe educators should adopt a more rigorous approach to improvement that allows the field to “learn fast to implement well.” Using ideas borrowed from improvement science, the authors show how a process of disciplined inquiry can be combined with the use of networks to identify, adapt, and successfully scale up promising interventions in education. Organized around six core principles, the book shows how “networked improvement communities” can bring together researchers and practitioners to accelerate learning in key areas of education. Examples include efforts to address the high rates of failure among students in community college remedial math courses and strategies for improving feedback to novice teachers. Learning to Improve offers a new paradigm for research and development in education that promises to be a powerful driver of improvement for the nation’s schools and colleges.

**Just Giving** Aug 22 2019 The troubling ethics and politics of philanthropy Is philanthropy, by its very nature, a threat to today’s democracy? Though we may laud wealthy individuals who give away their money for society’s benefit, Just Giving shows how such generosity not only isn’t the unassailable good we think it to be but might also undermine democratic values. Big philanthropy is often an exercise of power, the conversion of private assets into public influence. And it is a form of power that is largely unaccountable and lavishly tax-advantaged. Philanthropy currently fails democracy, but Rob Reich argues that it can be redeemed. Just Giving investigates the ethical and political dimensions of

philanthropy and considers how giving might better support democratic values and promote justice.

**Foundations of Sociology** Sep 27 2022 This book argues that the foundations of sociology - key concepts which are necessary to all sociology, from whatever perspective - have become taken-for-

granted and require re-assessment. Focusing on society, culture, the individual, and collectivity, the author builds a powerful case for an overhaul of these basic concepts, offering a unified model of the subject matter of sociology as 'the human world' - understood as individual, interactional and institutional orders - which is part of the 'natural world'. Written in a straightforward and accessible style, this is a powerful restatement of the value of sociological sense as a necessary critique of common sense, and its relevance to an audience far beyond academia.

*Foundation's Triumph* Jan 07 2021 Isaac Asimov's Foundation Trilogy is one of the highwater marks of science fiction. The monumental story of a Galactic Empire in decline and a secret society of scientists who seek to shorten the coming Dark Age with tools of Psychohistory, Foundation pioneered many themes of modern science fiction. Now, with the approval of the Asimov estate, three of today's most acclaimed authors have completed the epic the Grand Master left unfinished. The Second Foundation Trilogy begins with Gregory Benford's *Foundation's Fear*, telling the origins of Hari Seldon, the Foundation's creator. Greg Bear's *Foundation and Chaos* relates the epic tale of Seldon's downfall and the first stirrings of robotic rebellion. Now, in David Brin's *Foundation's Triumph*, Seldon is about to escape exile and risk everything for one final quest—a search for knowledge and the power it bestows. The outcome of this final journey may secure humankind's future—or witness its final downfall...
