**The Fundamental Concept of Crime in International Criminal Law** Nov 29 2019 This book examines the rapid development of the fundamental concept of a crime in international criminal law from a comparative law perspective. In this context, particular thought has been given to the catalyzing impact of the criminal law theory that has developed in major world legal systems upon the crystallization of the substantive part of international criminal law. This study offers a critical overview of international and domestic jurisprudence with regard to the construal of the concept of a crime (actus reus, mens rea, defences, modes of liability) and exposes roots of confusion in international criminal law through a comprehensive comparative analysis of substantive criminal laws in selected legal jurisdictions.

*International Law in a Divided World* Feb 22 2022 This general introduction to international law considers the topic in a political and historical perspective. Throughout, an effort is made to identify the ideological and political motivation underlying international legal rules and institutions, which are examined through the prism of the principal actors in the international community: Western, socialist and developing countries. This book differs from standard textbooks in an important respect: it covers some topics neglected by traditional works, such as the historical evolution of the international community or the law of economic relations and of development, while some traditional topics are dealt with only tangentially, such as international arbitration. The book will thus appeal to lawyers who wish to explore the background and context to this subject and to political scientists who want to know more about the policy pursued by each of the three major groupings of States in international law-making. This replaces the hardback, published in 1986.

**The Human Dimension of International Law** Jun 28 2022 This volume collects the most important papers of Antonio Cassese, one of the pre-eminent figures in international criminal justice. The papers offer the definitive statement of Cassese's thought, and a unique insight into some of the key developments in modern international law.

**The Oxford Handbook of International Criminal Law** Sep 27 2019 In the past twenty years, international criminal law has become one of the main areas of international legal scholarship and practice. Most textbooks in the field describe the evolution of international criminal tribunals, the elements of the core international crimes, the applicable modes of liability and defences, and the role of states in prosecuting international crimes. The Oxford Handbook of International Criminal

Law, however, takes a theoretically informed and refreshingly critical look at the most controversial issues in international criminal law, challenging prevailing practices, orthodoxies, and received wisdoms. Some of the contributions to the Handbook come from scholars within the field, but many come from outside of international criminal law, or indeed from outside law itself. The chapters are grounded in history, geography, philosophy, and international relations. The result is a Handbook that expands the discipline and should fundamentally alter how international criminal law is understood.

**Violence and Law in the Modern Age** Sep 07 2020 This remarkable and thoughtful book examines some of the most shattering events in recent history, from the annihilation of Hiroshima and Nagasaki to mass murder in Sabra and Shatila, from the hijacking of the Achille Lauro to torture and murder by officials of the state. In each case Cassese tries to understand why states--Nietzsche's cold-hearted monsters--acted as they did, and what this bodes for the future. Cassese also raises questions of a more general legal and political kind: why do states use force with impunity? Is the first use of nuclear weapons prohibited by international law? Should one obey superior orders and perform a criminal act, as Abraham was prepared to do, or should one respect the moral laws of one's people, as Antigone did? The picture of world events presented here is vivid, and Cassese's analysis is clear and provocative. This is a book not only for students of politics, law, and international affairs, but also for general readers who wish to observe the actions of the state with as much objectivity as possible.

*Realizing Utopia* Mar 26 2022 Realizing Utopia is a collection of essays by a group of innovative international jurists. Its contributors reflect on some of the major legal problems facing the international community and analyse the inconsistencies or inadequacies of current law. They highlight the elements - even if minor, hidden, or emerging - that are likely to lead to future changes or improvements. Finally, they suggest how these elements can be developed, enhanced, and brought to fruition in the next two or three decades, with a view to achieving an improved architecture of world society or, at a minimum, to reshaping some major aspects of international dealings. Contributions to the book thus try to discern the potential, in the present legal construct of world society, that might one day be brought to light in a better world. As the impact of international law on national legal orders continues to increase, this volume takes stock of how far international law has come and how it should continue to develop. The work features an impressive list of contributors, including many of the leading authorities on international law and several judges of the International Court of Justice.

*Five Masters of International Law* May 16 2021 This book consists of interviews with five distinguished international lawyers from the UK, USA, Uruguay and France, conducted by the editor, Antonio Cassese, between 1993 and 1995. Each interview is preceded by a brief 'intellectual portrait' of the interviewee. In his general introduction Cassese stresses that the interviews, all based on the same questionnaire, were intended to bring out not only the main ideas associated with each scholar in the fields of international law and international relations, but also his intellectual and philosophical background, his general outlook and his views of the prospects for the evolution of the international community. In his final essay, Cassese brings together the main threads of the interviews and points to the parallels and divergences appearing from them. This book offers a unique and important insight into the legal minds and outlook of a select group of prominent scholars of international law and legal institutions during the last years of the twentieth century.

*International Criminal Law* Apr 14 2021 'International Criminal Law' presents a full and systematic overview of the field, placing it in the context of wider international law. It offers a high-level, analytical examination with particular reference to the concept of an international crime and the role of domestic courts in prosecuting international crimes.--

**International Criminal Law** Oct 09 2020 Critical Concepts in Law, addresses the acute need for an authoritative reference work that traces the evolution of the emerging discipline of international criminal law. The editors aver that now is the time to take stock and make some sense of the subject's dauntingly vast literature, to identify a canon, and to engage with its key concepts. This four-volume collection assembles the best scholarship from the time of Nuremberg and Tokyo to the present day.

*Man's Inhumanity to Man* Nov 21 2021 This volume contains a unique collection of essays on various aspects of current interest within the field of public international law, international criminal law, human rights and humanitarian law. The wide range and topicality of the issues covered bears witness to the vast professional experience of Antonio Cassese, the first President of the ICTY, in whose honour this collection has been compiled, and to the many fields of scholarship in which he has left a permanent mark. Written by a selection of renowned academics and practitioners, Man's Inhumanity to Man offers the reader thought-provoking discussion on the International Criminal Court, the ICTY and International Criminal Tribunal for Rwanda and other aspects of international criminal justice; on truth commissions and amnesties in the aftermath of armed conflicts; on military humanitarian intervention and the development of human rights protection.

*Surrendering to International Criminal Courts: Contemporary Practice and Procedures* Jan 12 2021 This innovative book provides an incisive, knowledgeable and comprehensive study of the promises and limitations of the emerging phenomenon of surrender of individuals to international criminal courts, such as the International Criminal Court of the

Former Yugoslavia (ICTY), the International Criminal Court of Rwanda (ICTR), and the International Criminal Court (ICC). It is the first study on this area. The author analyses the distinctions and similarities with international extradition norms and persuasively establishes the international legal confinements of the surrender concept and the role of states and NATO-forces within this concept. In developing an international uniform framework for the surrender of individuals to international criminal courts, the author meticulously examines the Statutes of the ICTY, ICTR and ICC as well as their case law on this subject in conjunction with that of the European Court of Human Rights. Published under the Transnational Publishers imprint.

State Sovereignty and International Criminal Law Jan 30 2020 'State sovereignty' is often referred to as an obstacle to criminal justice for core international crimes by members of the international criminal justice movement. The exercise of State sovereignty is seen as a shield against effective implementation of such crimes. But it is sovereign States that create and become parties to international criminal law treaties and jurisdictions. They are the principal enforcers of criminal responsibility for international crimes, as reaffirmed by the complementarity principle on which the International Criminal Court (ICC) is based. Criminal justice for atrocities depends entirely on the ability of States to act. This volume revisits the relationship between State sovereignty and international criminal law along three main lines of inquiry. First, it considers the immunity of State officials from the exercise of foreign or international criminal jurisdiction. Secondly, with the closing down of the ad hoc international criminal tribunals, attention shifts to the exercise of national jurisdiction over core international crimes, making the scope of universal jurisdiction more relevant to perceptions of State sovereignty. Thirdly, could the amendments to the ICC Statute on the crime of aggression exacerbate tensions between the interests of State sovereignty and accountability? The book contains contributions by prominent international lawyers including Professor Christian Tomuschat, Judge Erkki Kourula, Judge LIU Daqun, Ambassador WANG Houli, Dr. ZHOU Lulu, Professor Claus Kre, Professor MA Chengyuan, Professor JIA Bingbing, Professor ZHU Lijiang and Mr. GUO Yang.

The Oxford Handbook of the History of International Law Jul 26 2019 The Oxford Handbook of the History of International Law provides an authoritative and original overview of the origins, concepts, and core issues of international law. The first comprehensive Handbook on the history of international law, it is a truly unique contribution to the literature of international law and relations. Pursuing both a global and an interdisciplinary approach, the Handbook brings together some sixty eminent scholars of international law, legal history, and global history from all parts of the world. Covering international legal developments from the 15th century until the end of World War II, the Handbook consists of over sixty individual chapters which are arranged in six parts. The book opens with an analysis of the principal actors in the history of international law, namely states, peoples and nations, international organisations and courts, and civil society actors. Part Two is devoted to a number of key themes of the history of international law, such as peace and war, the sovereignty of states, hegemony, religion, and the protection of the individual person. Part Three addresses the history of international law in the different regions of the world (Africa and Arabia, Asia, the Americas and the Caribbean, Europe), as well as 'encounters' between non-European legal cultures (like those of China, Japan, and India) and Europe which had a lasting impact on the body of international law. Part Four examines certain forms of 'interaction or imposition' in international law, such as diplomacy (as an example of interaction) or colonization and domination (as an example of imposition of law). The classical juxtaposition of the civilized and the uncivilized is also critically studied. Part Five is concerned with problems of the method and theory of history writing in international law, for instance the periodisation of international law, or Eurocentrism in the traditional historiography of international law. The Handbook concludes with a Part Six, entitled "People in Portrait", which explores the life and work of twenty prominent scholars and thinkers of international law, ranging from Muhammad al-Shaybani to Sir Hersch Lauterpacht. The Handbook will be an invaluable resource for students and scholars of international law. It provides historians with new perspectives on international law, and increases the historical and cultural awareness of scholars of international law. It is the standard reference work for the global history of international law.

The Oxford Companion to International Criminal Justice Oct 21 2021 The move to end impunity for human rights atrocities has seen the creation of international and hybrid tribunals and increased prosecutions in domestic courts. The Oxford Companion to International Criminal Justice is the first major reference work to provide a complete overview of this emerging field. Its nearly 1100 pages are divided into three sections. In the first part, 21 essays by leading thinkers offer a comprehensive survey of issues and debates surrounding international humanitarian law, international criminal law, and their enforcement. The second part is arranged alphabetically, containing 320 entries on doctrines, procedures, institutions and personalities. The final part contains over 400 case summaries on different trials from international and domestic courts dealing with war crimes, crimes against humanity, genocide, torture, and terrorism. With analysis and commentary on every aspect of international criminal justice, this Companion is designed to be the first port of call for scholars and practitioners interested in current developments in international justice.

**The Defence of Mistake of Law in International Criminal Law** Mar 14 2021 The adage 'ignorance of the law is no excuse' is significantly inaccurate. Ignorance and mistake of law do, under certain circumstances, exclude responsibility both in national and international criminal law. This monograph updates the existing reviews of law and practice on the topic, aiming to go a step further: it takes the analysis of mistake of law as a starting point for systematic observations about international criminal law in general. First, the volume defines the contours of the defence of mistake of law in general theory of criminal law, distinguishing it from cognate defences and highlighting, most notably, its connection with superior orders. Secondly, it gives an overview of the possible approaches to the defence, offering examples from national law as terms of reference for the subsequent analysis of international criminal law. Thirdly, it surveys the relevant law and

practice of international criminal tribunals, with a focus on the International Criminal Court, and it contemplates offences for which a defence of mistake of law may potentially succeed. Finally, the author tries to interpret what the rules on mistake of law applicable before international criminal tribunals imply about the purpose of punishing individuals and to the legitimacy of such punishment. Whilst the discourse on international criminal law is more and more concerned with global politics, *The Defence of Mistake of Law in International Criminal Law* brings back the focus on the appropriateness of imposing a guilty verdict on the individual defendant, a human being constituting the basic unit of each society.

**International Criminal Law: Cases and Commentary** Aug 31 2022 The decisions presented in the book are helpfully accompanied by short introductions setting out the circumstances of each case and brief commentaries on the importance of the decision and principles illustrated. --Book Jacket.

*Cassese's International Law* Apr 26 2022 Cassese's *International Law* is a new edition of an established classic. Authors Gaeta, Villalón, and Zappalà have built on the legacy of international law luminary Antonio Cassese to offer a thought-provoking and lucid account for today's undergraduates and postgraduates. The authors have refreshed Cassese's original approach, ensuring the book continues to compare the traditional legal position with the developing and evolving law. Advancing areas such as the law of the sea, territorial matters, and international environmental law have been expanded to give proper place to their evolving development, while brand new chapters on international trade and foreign investment have been written to reflect the advancements of these areas. In maintaining the broad structure and approach but providing new material, the authors bring fresh context to Cassese's thinking and provide students with an up-to-date, compelling account of the landscape of international legal thinking.

**Commentary on the Law of the International Criminal Court** Dec 31 2019

**International Law** Nov 02 2022 Previous edition, 1st, published in 2001.

*Law, War and Crime* Nov 09 2020 From events at Nuremberg and Tokyo after World War II, to the recent trials of Slobodan Milošević and Saddam Hussein, war crimes trials are an increasingly pervasive feature of the aftermath of conflict. In his new book, *Law, War and Crime*, Gerry Simpson explores the meaning and effect of such trials, and places them in their broader political and cultural contexts. The book traces the development of the war crimes field from its origins in the outlawing of piracy to its contemporary manifestation in the establishment of the International Criminal Court in The Hague. Simpson argues that the field of war crimes is constituted by a number of tensions between, for example, politics and law, local justice and cosmopolitan reckoning, collective guilt and individual responsibility, and between the instinct that war, at worst, is an error and the conviction that war is a crime. Written in the wake of an extraordinary period in the life of the law, the book asks a number of critical questions. What does it mean to talk about war in the language of the criminal law? What are the consequences of seeking to criminalise the conduct of one's enemies? How did this relatively new phenomenon of putting on trial perpetrators of mass atrocity and defeated enemies come into existence? This book seeks to answer these important questions whilst shedding new light on the complex relationship between law, war and crime.

*The Law of Non-International Armed Conflict* Aug 26 2019 Non-international armed conflicts now far outnumber international ones, but the protection afforded by international law to combatants and civilian is not always clear. This book will set out the legal rules and state practice applicable to internal armed conflicts, drawing on armed conflicts from the US civil war to present day.

**Looking to the Future** Aug 07 2020 Throughout his career, Michael Reisman emphasized law's function in shaping the future. In this wide-ranging collection of essays, major thinkers in the international legal field address the goals of the twenty-first century and how international law can address the needs of the world community.

*Self-Determination of Peoples* Jan 24 2022 The self-determination of peoples is a major issue in the world community: both radical and subversive, it serves to grant statehood to oppressed peoples, but also to disrupt existing State structures. This book, the first comprehensive legal account, sets out to trace how this political ideal has turned into an international legal standard. Scrutinising State practice through national digests and UN proceedings the author pinpoints the limits within which this political postulate has gained a foothold in the body of international law and assesses the extent to which it has had an impact on existing legal norms. This is primarily a legal inquiry which, however, looks at law within its historical and political context and, given its judicial underpinning, makes an important contribution to the study of the interplay of law, history, and politics in international relations.

*International Law* Apr 02 2020 The definitive and authoritative international law text, updated to reflect key case law, international practice and treaty developments.

*International Law in a Divided World* Dec 23 2021 A general introduction to international law in its political and historical context, this work identifies the ideological motivations behind legal rules and institutions. Covering several issues seldom explored by other commentators, such as the historical evolution of the international community and the fundamental principles governing international laws of economic interaction, the book provides an informative introduction to the complexities of this topic.

*Change and Stability in International Law-Making* Aug 19 2021

*Principles of International Criminal Law* Jul 06 2020 *Principles of International Criminal Law* is one of the leading textbooks in the field. This third edition builds on the highly-successful work of the previous editions, setting out the general principles governing international crimes as well as the fundamentals of both substantive and procedural international criminal law.

*An Introduction to International Criminal Law and Procedure* Mar 02 2020 This market-leading textbook gives an authoritative account of international criminal law, and focuses on what the student needs to know - the crimes that are dealt with by international courts and tribunals as well as the procedures that police the investigation and prosecution of

those crimes. The reader is guided through controversies with an accessible, yet sophisticated approach by the author team of four international lawyers, with experience both of teaching the subject, and as negotiators at the foundation of the International Criminal Court and the Rome conference. It is an invaluable introduction for all students of international criminal law and international relations, and now covers developments in the ICC, victims' rights, and alternatives to international criminal justice, as well as including extended coverage of terrorism. Short, well chosen excerpts allow students to familiarise themselves with primary material from a wide range of sources. An extensive package of online resources is also available.

**International Criminal Law** May 04 2020 *Critical Concepts in Law*, addresses the acute need for an authoritative reference work that traces the evolution of the emerging discipline of international criminal law. The editors aver that now is the time to take stock and make some sense of the subject's dauntingly vast literature, to identify a canon, and to engage with its key concepts. This four-volume collection assembles the best scholarship from the time of Nuremberg and Tokyo to the present day.

This book offers a unique and important insight into the legal minds and outlook of a select group of prominent scholars of international law and legal institutions during the last years of the twentieth century.

**The Prosecutor and the Judge** Jun 16 2021 Earlier this year, the Praemium Erasmianum Foundation bestowed its annual award—the Erasmus Prize—on Benjamin Ferencz and Antonio Cassese, two pioneers in the field of international law. Ferencz, a leading American prosecutor, author, and lecturer, was present at the American war crimes trials in Dachau and was the chief prosecutor in the Einsatzgruppen trials in Nuremberg. Like Ferencz, Cassese was a key figure in the development of international criminal law, serving as the first president of the International Criminal Tribunal for the former Yugoslavia and president of the European Committee for the Prevention of Torture, and chairman of the UN Commission of Inquiry into Violation of Human Rights and Humanitarian Law in Darfur. Cassese is currently the president of the Special Court for Lebanon. In *The Prosecutor and the Judge*, Heikelina Verrijn Stuart and Marlise Simons provide in-depth, revealing interviews with these two advocates of international law. Supplementing the interviews are several key articles written by Ferencz and Cassese that highlight the two men's achievements and set the development of international law in context.
