"Why Won't You Just Tell Us the Answer?" Nov 23 2021 Every major measure of students' historical understanding since 1917 has demonstrated that students do not retain, understand, or enjoy their school experiences with history. Bruce Lesh believes that this is due to the way we teach history -- lecture and memorization. Over the last fifteen years, Bruce has refined a method of teaching history that mirrors the process used by historians, where students are taught to ask questions of evidence and develop historical explanations. --from publisher description.

The Leader in Me Jun 26 2019 Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

Teaching and Learning God's Love Jan 26 2022 This inspiring collection of homilies delivered by Joseph Ratzinger (Benedict XVI) over six decades offers deep theological and historical insights on the meaning of the life and the witness of a Catholic priest. When

Pope Benedict XVI inaugurated the Year for Priests in 2009, he did so in conjunction with celebrating the 150th anniversary of the death of John Vianney, the patron saint of all parish priests. Benedict's purpose for that special year is the same purpose of this book of homilies—to deepen the commitment of all priests to interior renewal for the sake of a stronger and more incisive witness to the Gospel in today's world. As St. John Vianney would often say, "The priesthood is the love of the heart of Jesus." This touching expression makes us reflect on the immense gift that priests represent, not only for the Church but for all mankind. Contemporary men and women need priests to be distinguished by their determined witness to Christ. These homilies are meant to illuminate and to inspire priests to renew their commitment to "teaching and learning the love of God". The homilies cover a wide variety of important topics on the priesthood, all deeply rooted in Scripture, including acting in persona Christi, becoming an offering with Christ for the salvation of mankind, being there for God's mercy, and witnessing Christian joy.

The Drive to Learn Jun 18 2021 Countless books and articles have offered remedies for the poor learning outcomes of American schoolchildren. Virtually all of these publications share one thing in common: They propose improvements in the policies and practices controlled by adult educators. Grove believes that our children's poor learning cannot be totally the fault of educators. Our children are active participants in classrooms, so if there's a problem with how well our children are learning, then we as parents might be at fault. To discover what our part is and explore what can be done about it, Grove draws on over 100 anthropological studies of children's learning and child-rearing in China, Japan, and Korea. They reveal that those children, even the youngest ones, are highly receptive to classroom learning. Why do they come into classrooms with attentive and engaged attitudes? How did they acquire the drive to learn? Can American parents benefit from knowing how Chinese, Japanese, and Korean parents think about and carry out child-rearing? The Drive to Learn explores these questions.

Discovering A Better Way To Pray Jul 08 2020 Prayer Is the most exciting and most misunderstood aspect of human experience! Learning the power of prayer can open heaven on earth, most people say it as cliché but prayer is powerful when you understand and use it in the proper way. Prayer simply put is relationship and communion with God. Most of us were never taught how to pray, we always just thought it was talking to God. Yes prayer is talking to God, bringing God back the promises he has already promised us. Learning the scriptures to learn God's will for your life is vital to build a strong prayer life. Steps to answered prayer breaks down the steps to pray effectively, it's not a punch of prayers to remember. It's teaching you to pray your self and get your prayers answered. The only thing the

disciples asked Jesus to do was to teach them how to pray. After years in my own life of struggling with praying wondering if God heard my prayers, lead me to ask God to teach me and i began to study the scriptures along with the principles. I found that it was a better way to pray and that all answers to our prayer is not simply God answering us. God has given us authority to move mountains, learning to pray with authority is a key to most of the problems we pray about. God is concerned with every little aspect of your life and he wants to give you all the things you want in your life according to his will. Your prayer life will grow when you pray according to scripture and mediation. this book will teach you in a simple way to pray and get the results your looking for according to Gods will.

Online Education May 06 2020 In "Online Education: Global Questions, Local Answers", 24 college educators focus on the most important questions to be addressed by all scholar-teachers and administrators committed to developing high-quality online education programs. We describe these questions as "global" because they transcend the particular situations of individual institutions. They are questions that everyone involved in online education needs to address: What are the issues to consider when first developing and then sustaining an online education program? How do we create interactive, pedagogically sound online courses and classroom communities? How should we monitor and assess the quality of online courses and programs? And how should recent developments and innovations in online education cause us to reexamine our roles and responsibilities as educators in technical communication? While these global questions affect all of us in one way or another, they demand different local answers, such as those presented by the contributors to this text. Readers will need to consider which of these local answers might apply to their own situations and how these answers might need to be adapted to reflect the particular needs of their own institutions.

Project Based Learning Jul 28 2019 Countless educators from across the globe would love to leverage project based learning to create learner-centered opportunities for their students, but, believe it or not, PBL has yet to go mainstream. Project Based Learning is Cooper's and Murphy's response to the most common, and most complex, questions educators ask about PBL and inquiry, including: How do I structure a PBL experience? What do I do while the kids are working? How do I get grades? How do I include direct instruction? What happens when kids don't work well together? How do I manage the chaos? Project Based Learning answers these questions, and more, to show you how to do PBL and inquiry, and all school projects the right way, in any subject or grade. Order yours today, and launch PBL in your class tomorrow.
