[Co-production in the Public Sector](#) Jun 16 2021 This book examines the various ways in which co-production can contribute to the creation, design, and delivery of public services, namely by engaging the expertise of users and their networks, by promoting public services that are better targeted and more responsive to users, by cutting costs against the background of austerity in public finance, by creating a synergy between government and civil society that will impact positively on social capital, and by addressing the challenges resulting from growing democratic and citizenship deficits. Particular attention is paid to local government and the health and social care sector. After definition of the concept of co-production, the critical issues which arise when public services are co-produced are discussed. Various experiences of co-production are presented and analyzed with a view to

highlighting why, how, and with what effect public service co-production may be implemented. Individual chapters focus on the impact of co-production in making cities smarter and the use of ICT in supporting co-production of public services. The book will be of relevance to a wide readership, from students to academics and professionals interested or engaged in public service management.

**Peirce and Religion** Aug 19 2021 Charles Sanders Peirce developed a mature Christian faith under the influence of his father Benjamin Peirce and Frederic Dan Huntington, a teacher and pastor at Harvard. **Landscape as Infrastructure** Jan 24 2022 As ecology becomes the new engineering, the projection of landscape as infrastructure—the contemporary alignment of the disciplines of landscape architecture, civil engineering, and urban planning—has become pressing. Predominant challenges facing urban regions and territories today—including shifting climates, material flows, and population mobilities, are addressed and strategized here. Responding to the under-performance of master planning and over-exertion of technological systems at the end of twentieth century, this book argues for the strategic design of "infrastructural ecologies," describing a synthetic landscape of living, biophysical systems that operate as urban infrastructures to shape and direct the future of urban economies and cultures into the 21st century. Pierre Bélanger is Associate Professor of Landscape Architecture and Co-Director of the Master in Design Studies Program at Harvard University's Graduate School of Design. As part of the Department of Landscape Architecture and the Advanced Studies Program, Bélanger teaches and coordinates graduate courses on the convergence of ecology, infrastructure and urbanism in the interrelated fields of design, planning and engineering. Dr. Bélanger is author of the 35th edition of the Pamphlet Architecture Series from Princeton Architectural Press, GOING LIVE: from States to Systems (pa35.net), co-editor with Jennifer Sigler of the 39th issue of Harvard Design Magazine, Wet Matter, and co-author of the forthcoming volume ECOLOGIES OF POWER: Mapping Military Geographies & Logistical Landscapes of the U.S. Department of Defense. As a landscape architect and urbanist, he is the recipient of the 2008 Canada Prix de Rome in Architecture and the Curator for the Canada Pavilion and Canadian Exhibition, "EXTRACTION," at the 2016 Venice Architecture Biennale (extraction.ca).

Along the way you'll look at lightbulbs, locks, and Apple's iBeacon technology, as well as get an understanding of Bluetooth security-- both how to beat other people's security, and how to make your hardware secure.

**The Work of Art** Aug 26 2019 What art is--its very nature--is the subject of this book by one of the most distinguished continental theorists writing today. Informed by the aesthetics of Nelson Goodman and referring to a wide range of cultures, contexts, and media, *The Work of Art* seeks to discover, explain, and define how art exists and how it works. To this end, Gérard Genette explores the distinction between a work of art's immanence--its physical presence--and transcendence--the experience it induces. That experience may go far beyond the object itself. Genette situates art within the broad realm of human practices, extending from the fine arts of music, painting, sculpture, and literature to humbler but no less fertile fields such as haute couture and the culinary arts. His discussion touches on a rich array of examples and is bolstered by an extensive knowledge of the technology involved in producing and disseminating a work of art, regardless of whether that dissemination is by performance, reproduction, printing, or recording. Moving beyond examples, Genette proposes schemata for thinking about the different manifestations of a work of art. He also addresses the question of the artwork's duration and mutability.

*Coin Hoards* Feb 10 2021 This, the ninth volume of *Coin Hoards*, is again dedicated solely to hoards of Greek coins. It includes hoards from all areas around the Mediterranean from the sixth century BC to the second century AD. *Coin Hoards IX*, together with the previous volumes in the series, thus forms an essential supplement to the *Inventory of Greek Coin Hoards*, published in 1973 by Thompson, Morkholm and Kraay. Since the last volume, published eight years ago, the number of Greek coin hoards has increased considerably. Not only does this volume list new hoards, but it also updates and often amends information on hoards already published. Overall, the inventory for this volume consists of 744 entries, with detailed references to find-spot (if known), content, approximate burial date and bibliography. In addition to the inventory, *Coin Hoards IX* also contains the detailed publication of a number of significant hoards. An important aspect of this volume is the inclusion of 66 plates of photographs illustrating a large proportion of those coins described. This volume will be an indispensable tool for all future research in the field.

**University of the World** Dec 31 2019 In this book, Dieter Lenzen analyzes the world's three major educational systems: the Continental-European, the Atlantic (Anglo-American) and the East Asian. Distancing himself from the current trend towards the economically driven Anglo-American system of education, the author proposes an alternative model, "a university of the world". Contents: · Three concepts of the university in the globalization process · The dynamics of global social systems · Global challenges in the post-secondary educational sector as springboard for comparing systems · Convergence and divergence: current system dynamics in the post-secondary sector · Can there be fair chances in a world university system? · Conclusion Target readers: · Theorists of higher education · Policy makers of higher education · Administrators of higher education · Social scientists The author: Professor Dr. Dieter Lenzen is the president of Universität Hamburg, vice president of the German Rectors' Conference (HRK) in Germany and the German universities' spokesperson for the HRK.

*Wild Pedagogies* Jun 04 2020 This book explores why the concept of wild pedagogy is an essential aspect of education in these times; a re-negotiated education that acknowledges the necessity of listening to voices in a more than human world, and (re)learning how to dwell in a place. As the geological epoch inexorably shifts to the Anthropocene, the authors argue that learning to live in and engage with the world is increasingly crucial in such times of uncertainty. The editors and contributors examine what wild pedagogy can truly become, and how it can be relevant across disciplinary boundaries: offering six touchstones as working tools to help educators forge an onward path. This collaborative work will be of interest to students and scholars of wild pedagogies, alternative education and the Anthropocene, and for all those engaged in re-wilding education.

**Medievalism** Jan 12 2021 The discipline of medievalism has produced a great deal of scholarship

acknowledging the "makers" of the Middle Ages: those who re-discovered the period from 500 to 1500 by engaging with its cultural works, seeking inspiration from them, or fantasizing about them. Yet such approaches - organized by time period, geography, or theme - often lack an overarching critical framework. This volume aims to provide such a framework, by calling into question the problematic yet commonly accepted vocabulary used in Medievalism Studies. The contributions, by leading scholars in the field, define and exemplify in a lively and accessible style the essential terms used when speaking of the later reception of medieval culture. The terms: Archive, Authenticity, Authority, Christianity, Co-disciplinarity, Continuity, Feast, Genealogy, Gesture, Gothic, Heresy, Humor, Lingua, Love, Memory, Middle, Modernity, Monument, Myth, Play, Presentism, Primitive, Purity, Reenactment, Resonance, Simulacrum, Spectacle, Transfer, Trauma, Troubadour Elizabeth Emery is Professor of French and Graduate Coordinator at Montclair State University (Montclair, NJ, USA); Richard Utz is Chair and Professor of Medievalism Studies in the School of Literature, Media, and Communication at Georgia Tech (Atlanta, GA, USA). Contributors: Nadia Altschul, Martin Arnold, Kathleen Biddick, William C. Calin, Martha Carlin, Pam Clements, Michael Cramer, Louise D'Arcens, Elizabeth Emery, Elizabeth Fay, Vincent Ferré, Matthew Fisher, Karl Fugelso, Jonathan Hsy, Amy S. **The Myth of the Other** Oct 28 2019 Rella came of age as a philosopher in Italy during the period of the "crisis of reason" or more generally the exhaustion of classical rationality in its authority to structure experience. For Rella, unlike many others, the tensions of the crisis are productive. In *The Myth of the Other*, he presents a unique perspective on four seminal French thinkers: Lacan, Foucault, Deleuze, and Bataille. Moe's masterful translation brings this remarkable Italian thinker to American readers for the first time. This slim book may very well change the way American scholars think about the crisis of the other and the self coming out of French poststructuralism.

**Psychoanalysis and Neuroscience** Mar 02 2020 Recent scientific studies have brought significant advances in

the understanding of basic mental functions such as memory, dreams, identification, repression, which constitute the basis of the psychoanalytical theory. This book focuses on the possibility of interactions between psychoanalysis and neuroscience: emotions and the right hemisphere, serotonin and depression. It is a unique tool for professionals and students in these fields, and for operators of allied disciplines, such as psychology and psychotherapy.

**Polish Scientific Philosophy** Jun 24 2019 One can often encounter an opinion that Polish scientific (or analytic) philosophy (or the Lvov-Warsaw School) deserves to be much better known than actually is. This book is thought as a response to such a claim. The papers collected in this volume are divided into two parts: Background and Influence and History and Systematics. However, there is no sharp borderline between themes which are touched in both parts. Generally speaking, all papers of the first part relate the Lvov-Warsaw School to some philosophical movements (Brentanism, phenomenology and Marxism) external to it whereas the papers collected in the second one focus on internal issues connected with the school (only Roberto Poli takes into account Brentano's views in his discussion of reism). Since the Polish school of mathematical logic is much better known than the Polish analytic philosophy we decided to omit here any treatment of the former. Thus, this collection centers on purely philosophical matters. We projected this volume not as an exhaustive panorama of Polish analytic philosophy but rather as a series of essays on particular persons or topic. As a result one can find here papers on Twardowski, Ajdukiewicz, Kotarbinski, Tarski and Lukasiewicz as well as on ethics on science, nominalism, and the methodology of psychology. We hope that this book will contribute to a better knowledge and evaluation of Polish achievements in analytic philosophy. We would like to express our gratitude to Professor Leszek Nowak, the editor-in-chief of Poznan Studies in the Philosophy of the Sciences and the Humanities, who initiated the idea of the collection and helped in its preparation.

**International Classification of Functioning, Disability, and Health** Mar 14 2021 This publication is a derived version of the International Classification of Functioning, Disability and Health (ICF, WHO, 2001) designed to record characteristics of the developing child and the influence of environments surrounding the child. This derived version of the ICF can be used by providers, consumers and all those concerned with the health, education, and well being of children and youth. It provides a common and universal language for clinical, public health, and research applications to facilitate the documentation and measurement of health and disability in child and youth populations.--Publisher's description.

**Prefaces to the Diaphora** Jan 30 2020 The central concern of these eight studies and essays is the understanding and critique of culture at the shifty boundaries between the Modern and the Postmodern epochs. The author contends that what needs to be addressed is the very abyss, the "spacetime" between the Modern and the Postmodern worldviews, as well as the tension between aesthetics and ethics, critical discourse and the creative arts, in an effort to rethink multireferential processes of signification. The keystone of the book is Carravetta's notion of Diaphoristics, a theory of interpretation as dialogue. Diaphora, or difference, refers to the ancient quarrel between poetry and philosophy and signifies the movement between asymmetrical or heterogeneous forms of discourse that have, both historically and speculatively, borne the transfer of meaning from one semantic/hermeneutic field to another. The author focuses on the necessary risk and duplicity of criticism and develops nonagonistic models based on figuration and rhetorical dynamics. In two other chapters, the author steps back to reassess, in terms of the diaphora, the diverging notions of Postmodernity by the continental philosophers Lyotard and Vattimo. The collection ends with an essay on the long-overdue conversation between Vico and Heidegger.
