*Science and Technology Teacher Education in the Anthropocene* *Mar 02 2020* *This unique book compares anthropogenic challenges in science and technology teacher education between the northern and southern contexts of Sweden and South Africa, respectively.*

*Presenting the results of a three-year research collaboration between science and technology teacher education researchers from South Africa and Sweden, the book explores theoretical perspectives and pedagogical experiences in response to challenges in the Anthropocene. It discusses research-informed practice in teacher education to address sustainable development. Chapters in the book collectively investigate the influence of current environmental and societal changes on the education of teachers, answering the question of how science and technology teacher education can adjust to current changes in the world and prepare new teachers for work in their future profession. Touching on issues such as climate change, global warming and pandemic diseases, the book uses a comparative approach and explores opportunities and possibilities for fulfilling the goals of science and technology education for sustainable development. The book offers recommendations and opportunities to implement sustainability issues and develop sustainable teaching strategies. It will be a key reading for researchers, academics and post-graduate students in the fields of teacher education, science and technology education, sustainability education and comparative education.*

*Handbook of Research on Teaching* *Jul 06 2020* *The Fifth Edition of the Handbook of Research on Teaching is an essential resource for students and scholars dedicated to the study of teaching and learning. This volume offers a vast array of topics ranging from the history of teaching to technological and literacy issues. In each authoritative chapter, the authors summarize the state of the field while providing conceptual overviews of critical topics related to research on teaching. Each of the volume's 23 chapters is a canonical piece that will serve as a reference tool for the field. The Handbook provides readers with an unparalleled view of the current state of research on teaching across its multiple facets and related fields.*

*Pedagogy in Poverty* *Jan 30 2020* *As South Africa transitioned from apartheid to democracy, changes in the political landscape, as well as educational agendas and discourse on both a national and international level, shaped successive waves of curriculum reform over a relatively short period of time. Using South Africa as a germane example of how curriculum and pedagogy can interact and affect educational outcomes, Pedagogy in Poverty explores the potential of curricula to improve education in developing and emerging economies worldwide, and, ultimately, to reduce inequality. Incorporating detailed, empirical accounts of life inside South African*

classrooms, this book is a much-needed contribution to international debate surrounding optimal curriculum and pedagogic forms for children in poor schools. Classroom-level responses to curriculum policy reforms reveal some implications of the shifts between a radical, progressive approach and traditional curriculum forms. Hoadley focuses on the crucial role of teachers as mediators between curriculum and pedagogy, and explores key issues related to teacher knowledge by examining the teaching of reading and numeracy at the foundational levels of schooling. Offering a data-rich historical sociology of curriculum and pedagogic change, this book will appeal to academics, researchers and postgraduate students in the fields of education, sociology of education, curriculum studies, educational equality and school reform, and the policy and politics of education.

*Reforming Teaching and Learning* Aug 31 2022 This volume addresses the larger question of the effects of (global) educational reform on teaching and learning as they relate to the context, the policies and politics where reform occurs.

*Public Education, Neoliberalism, and Teachers* Jan 12 2021 From pressure to "teach to the test" and the use of quantitative metrics to define education "quality," to the rise of "school choice" and the shift of principals from colleagues to managers, teachers in New York, Mexico City, and Toronto have experienced strikingly similar challenges to their professional autonomy. By visiting schools and meeting teachers, government officials, and union leaders, Paul Bocking identifies commonalities that are shaping how teachers' work and public schools function. While arguing that neoliberal education policy is a dominant trend transcending the realities of school districts, states, or national governments, Bocking also demonstrates the importance of local context to explain variations in education governance, especially when understanding the role of resistance led by teachers' unions.

*Information, Computer and Application Engineering* Nov 29 2019 This proceedings volume brings together peer-reviewed papers presented at the International Conference on Information Technology and Computer Application Engineering, held 10-11 December 2014, in Hong Kong, China. Specific topics under consideration include Computational Intelligence, Computer Science and its Applications, Intelligent Information Processing and Knowledge Engineering, Intelligent Networks and Instruments, Multimedia Signal Processing and Analysis, Intelligent Computer-Aided Design Systems and other related topics. This book provides readers a state-of-the-art survey of recent innovations and research worldwide in Information Technology and Computer Application Engineering, in so-doing furthering the development and growth of these research fields, strengthening international academic cooperation and communication, and promoting the fruitful exchange of research ideas. This volume will be of interest to professionals and academics alike, serving as a broad overview of the latest advances in the dynamic field of Information Technology and Computer Application Engineering.

*Teacher Education Policy in the United States* May 16 2021 What constitutes a high quality teacher education program and what standards teacher candidates should meet before receiving their teaching credential? This volume advances deep understanding of the nature and sources of policy affecting the preparation of teachers in the U.S. and the conflicts or interconnections of these policies with the broader field of education policy. Contributions from actors in the policy world and experts representing the stakeholders are balanced and based on issues currently facing the field. Policy is viewed as evolving and political. The connection or lack thereof between policy and research is examined. Policy case studies ground the principles developed within specific chapters in practice and illustrate that policy questions and solutions are continually evolving and unsettled. Chapter-end commentaries by the editors relate the focus of each chapter to the overarching themes of the book: policy formation, policy influences, policy paradoxes, and connections to research. This volume is an essential resource for understanding and resolving today's uncertainty and confusion over teacher education policy.

*Quality Teaching and the Capability Approach* Sep 27 2019 This book provides an analytical exploration of the condition of teachers working in expanding school systems across the world, with a particular focus on the lives of women teachers in rural Sub-Saharan Africa. Drawing from award-winning research, it looks beyond the official portrayals of teachers' lives in order to better understand the reality of the contexts in which teachers live and work. Positioning Amartya Sen's capability approach at the heart of the study, each chapter considers documentary evidence alongside ethnographic research from rural, remote and under-resourced schools in Ghana, Nigeria, Kenya, South Africa and Sudan. Interweaving rich narratives from teachers in a variety of contexts, the book proposes a concept of professional capability and examines female teachers' agency to pursue and achieve this in their classrooms. This key examination challenges existing notions of 'quality education' and reveals insights into the broader purpose of schooling for rural communities. *Quality Teaching and the Capability Approach* will be of value to researchers, academics and postgraduate students in education, particularly those concerned with gender, development and teaching, as well as educationalists and policy makers concerned with education and development.

*A Class of Their Own* Apr 02 2020 In this major undertaking, civil rights historian Adam Fairclough chronicles the odyssey of black teachers in the South from emancipation in 1865 to integration one hundred years later. *A Class of Their Own* is indispensable for understanding how blacks and whites interacted after the abolition of slavery, and how black communities coped with the challenges of freedom and oppression.

*Learner-Centered Teaching* Jun 04 2020 In this much needed resource, Maryellen Weimer-one of the nation's most highly regarded authorities on effective college teaching-offers a comprehensive work on the topic of learner-centered teaching in the college and university classroom. As the author explains, learner-centered teaching focuses attention on what the student is learning, how the student is learning, the conditions under which the student is learning, whether the student is retaining and applying the learning, and how current learning positions the student for future learning. To help educators accomplish the goals of learner-centered teaching, this important book presents the meaning, practice, and ramifications of the learner-centered approach, and how this approach transforms

*the college classroom environment. Learner-Centered Teaching shows how to tie teaching and curriculum to the process and objectives of learning rather than to the content delivery alone.*

*Understanding and Teaching Contemporary US History Since Reagan* Jul 30 2022 *Understanding and Teaching Contemporary US History since Reagan* is designed for teachers looking for new perspectives on teaching the recent past, the period of US history often given the least attention in classrooms. Less of a traditional textbook than a pedagogical Swiss Army knife, the volume offers a diversity of voices and approaches to teaching a field that, by its very nature, invites vigorous debate and puts generational differences in stark relief. Older history is likely to feel removed from the lived experiences of both teachers and students, allowing for a certain dispassion of perspective. By contrast, contemporary history creates unique challenges, as individual teachers and students may think they know "what really happened" by virtue of their personal experiences. The volume addresses a wide swath of topics, from social movements around identity and representation to the Supreme Court, law enforcement, migration, climate change, and international relations. Emphasizing critical thinking and primary-source analysis, it will aid teachers in creating an invigorating and democratizing classroom experience. Intended for use in both secondary and postsecondary classrooms, the book's structure allows for a variety of applications and invites a broad audience.

*Becoming Critical Teacher Educators* Sep 07 2020 The personal and professional are woven together in this collection of scholarly narratives by teacher educators who share their early critical experiences and model teaching practices to support continued resistance and possibilities in teacher education. Representing myriad contexts where teacher education takes place, the range of scholars included represent diverse racial, gendered, linguistic, economic, and ethnic intersectional perspectives. Each chapter suggests practical tools and encourages readers to reflect on their own journeys of becoming transformational teacher educators. This book adds an important dimension to the field with a new and generative approach to the introduction of critical literacies and pedagogies, and offers a potentially powerful way to explore theory, methodology, and social issues. Readers will enjoy the compelling storytelling of these powerful and vulnerable memoirs.

*FASNY Fire Service Laws of the State of New York 2022 Edition* Mar 14 2021 Produced in cooperation with the Firemen's Association of the State of New York, this all-in-one reference guide combines Fire and Emergency Services related Statutes, Rules, and Regulations. *Fire Service Laws of the State of New York* gathers a diverse and wide-ranging area of law covering penal law, environmental conservation, municipal law, insurance law, and much more. *Secrets of Great Teachers* Aug 26 2019 You can abandon rote learning with this middle and high school teaching guide. Encouraging both students and teachers to unlock their creativity, the authors provide guidance in lesson planning and ideas for creating unconventional homework, projects and tests that are cost-free and easy to implement. This book leads teachers away from endorsing

competition and teacher-pleasing behavior, and offers ideas for independent thinking that will strengthen students' decision-making, deductive reasoning and emotional intelligence.

"A Visible Company of Professionals" Jul 18 2021 African American educators shaped a role for themselves in the larger civil rights movement by striving for inclusion, on equal footing, in the National Education Association (NEA). This book explores the relationship between the NEA, the nation's largest teacher organization, and the predominately black American Teachers Association, and illustrates how African American educators helped to redefine the NEA's core ideology to include the support of policies, practice, and politics that promoted educational equity for children and educators who have been historically marginalized. Examining heated debates in African American communities and in the NEA, and the immediate and long-term effects of inclusion on educators and public school children, this book reveals teacher associations as something more than labor unions and educators as activists for educational equity, while it documents the perils, disappointments, and advantages of professional cohesion. The book's documentation of leadership in particularly challenging settings fills a void in literature for teacher preparation and educational leadership programs.

Ohio Educational Monthly and the National Teacher Apr 26 2022

Academy Method: Introduction to Teacher Training Oct 28 2019 The Academy Method was designed by Dame Margot Fonteyn and Ken Ludden over 12 years. The instructor certification program gives them international certification to teach in this method. This book covers the basic principles of the Academy Method. Review: ""Ken Ludden's teaches the fundamentals of ballet and all movement, and is groundbreaking and life changing! He works with the truth of movement...teaches to express through movement. He covers the step and how to execute it, then clearly explains the WHY for each exercise as it relates to center work and choreography. This book lays out how to build a dancer from the moment they enter the studio until they hit the stage as a professional. Try to see Ken's live lectures as well and study with him. He is a Master!"" -Autumn Mathisen

The Teaching Instinct Feb 22 2022 How we select, prepare, and support teachers has become a surprisingly common topic among journalists, politicians, and policymakers. Contemporary recommendations on teaching and teachers, whatever their intentions, fail to assess this deeply human activity from its historical roots. In *The Teaching Instinct: Explorations Into What Makes Us Human*, Kip Téllez invites us to reappraise teaching through a wide lens and argues that our capacity to teach is one part culture, two parts genetic. By rescuing the field of instinct psychology from the margins, this challenging book explores topics as diverse as teaching in other species, teaching across human cultures, and the development of teaching in young children, finally drawing readers into a discussion about how our teaching instinct influences modern teacher learning, selection, and preparation. Drawing on disciplines as diverse as comparative biology, evolutionary psychology, and teacher education policy, Téllez warns us that ignoring or contradicting our teaching instinct results in unhappy teachers and dysfunctional school systems.

A People's History of the United States Jun 16 2021 A classic since its original landmark publication in 1980, Howard Zinn's *A People's History of the United States* is the first scholarly work to tell America's story from the bottom up—from the point of view of, and in the words of, America's women, factory workers, African Americans, Native Americans, working poor, and immigrant labourers. From Columbus to the Revolution to slavery and the Civil War—from World War II to the election of George W. Bush and the "War on Terror"—*A People's History of the United States* is an important and necessary contribution to a complete and balanced understanding of American history.
