Managing Your Competencies Aug 23 2022 A competency is a combination of knowledge, skills and attitude that one needs in order to function adequately in any given professional situation – a nurse must know how to give a crying child a vaccination, and a policeman must be able to stop a drunken brawl. Competency orientated teaching has become an important objective in higher education. To meet this objective, an individual personal development plan (PDP) is indispensable. PDPs are based on what one knows about one's own skills and what one needs to acquire for one's future profession. *Managing Your Competencies* shows the reader how to go about drawing up a PDP.

Social learning towards a sustainable world Mar 26 2020 This comprehensive volume - containing 27 chapters and contributions from six continents - presents and discusses key principles, perspectives, and practices of social learning in the context of sustainability. Social learning is explored from a range of fields challenged by sustainability including: organizational learning, environmental management and corporate social responsibility; multi-stakeholder governance; education, learning and educational psychology; multiple land-use and integrated rural development; and consumerism and critical consumer education. An entire section of the book is devoted to a number of reflective case studies of people, organizations and communities using forms of social learning in moving towards sustainability. 'This book brings together a range of ideas, stories, and discussions about purposeful learning in communities aimed at creating a world that is more sustainable than the one currently in prospect. ...The book is designed to expand the network of conversations through which our society can confront various perspectives, discover emerging patterns, and apply learning to a variety of emotional and social contexts.' From the Foreword by Fritjof Capra, co-founder of the Center of Ecoliteracy. 'Joining what is so clear and refreshing in this book with the larger movements toward a critically democratic and activist education that is worthy of its name, is but one step in the struggle for sustainability. But it is an essential step if we are to use the insights that are included in this book.' From the Afterword by Michael Apple, author of 'Educating the "Right" Way: Markets, Standards, God, and Inequality'.

Expectations and Aspirations Feb 23 2020 Education, which has been at the heart of the Middle East and North Africa (MENA) region's history and civilizations for centuries, has a large untapped potential to contribute to human capital, well-being, and wealth. The region has invested heavily in education for decades, but it has not been able to reap the benefits of its investments. Despite a series of reforms, MENA has remained stuck in a low-learning, low-skills level. *Expectations and Aspirations: A New Framework for Education in the Middle East and North Africa* identifies four key sets of tensions that are holding back education in the region: credentials and skills, discipline and inquiry, control and autonomy, and tradition and modernity. These tensions are shaped by society and are reflected in classrooms. If they are not addressed, MENA will continue to operate at a level below its potential. This report outlines a new framework with a three-pronged approach that can help address these tensions and unleash the

potential of education in MENA: • A concerted push for learning that starts early for all children regardless of background, with qualified and motivated educators, and that leverages technology, uses modern approaches, and monitors learning outcomes • A stronger pull for skills by all stakeholders in the labor market and society that involves coordinated multisystem reforms within and beyond the education system • A new pact for education at the national level with a unified vision, shared responsibilities, and accountabilities. Education is not just the responsibility of the education system—it is everyone's business. The push, pull, and pact framework offers an opportunity for MENA to move forward to reclaim its heritage of a learned region and to meet the expectations and aspirations of its people. The current situation in MENA requires a renewed focus on education, not just as a national priority for economic growth and social development, but as a national emergency for stability, peace, and prosperity.

Logics for Databases and Information Systems Mar 06 2021 Time is ubiquitous in information systems. Almost every enterprise faces the problem of its data becoming out of date. However, such data is often valuable, so it should be archived and some means to access it should be provided. Also, some data may be inherently historical, e.g., medical, cadastral, or judicial records. Temporal databases provide a uniform and systematic way of dealing with historical data. Many languages have been proposed for temporal databases, among others temporal logic. Temporal logic combines abstract, formal semantics with the amenability to efficient implementation. This chapter shows how temporal logic can be used in temporal database applications. Rather than presenting new results, we report on recent developments and survey the field in a systematic way using a unified formal framework [GHR94; Ch094]. The handbook [GHR94] is a comprehensive reference on mathematical foundations of temporal logic. In this chapter we study how temporal logic is used as a query and integrity constraint language. Consequently, model-theoretic notions, particularly for model satisfaction, are of primary interest. Axiomatic systems and proof methods for temporal logic [GHR94] have found so far relatively few applications in the context of information systems. Moreover, one needs to bear in mind that for the standard linearly-ordered time domains temporal logic is not recursively axiomatizable [GHR94] so recursive axiomatizations are by necessity incomplete.

DayWater Jun 09 2021 The European DayWater project has developed a prototype of an Adaptive Decision Support System (ADSS) related to urban stormwater pollution source control. The DayWater ADSS greatly facilitates decision-making for stormwater source control, which is currently impeded by the large number of stakeholders involved and by the necessary multidisciplinary knowledge. This book presents the results of this project, providing new insights into both technical and management issues. The main objectives of its technical chapters are pollution source control modelling, risk and impact assessment, and evaluation and comparison of best management practices. It also covers management aspects, such as the analysis of the decision-making processes in stormwater source control, at a European scale, and stormwater management strategies in general. The combination of scientific-technical and socio-managerial knowledge, with the strong cooperation of numerous end-users, reflects the innovative character of this book which includes actual applications of the ADSS prototype in significant case studies. DayWater: an Adaptive Decision Support System for Urban Stormwater Management contains 26 chapters collectively prepared by DayWater scientific partners and end-users associated with this European Research and Development project. It includes: A general presentation of the DayWater Adaptive Decision Support System (ADSS) structure and operation modes A detailed description of the major components of this ADSS prototype The assessment of its components in significant case studies in France, Germany and Sweden The proceedings of the International Conference on Decision Support Systems for Integrated Urban Water Management, held in Paris on 3-4 November 2005. The book presents the ADSS prototype including a combination of freely accessible on-line databases, guidance documents, "road maps" and modelling or multi-criteria analysis tools. As demonstrated in several significant case studies the challenge for stormwater managers is to make the benefits of urban stormwater management visible to society, resulting in active co-operation of a diversity of stakeholders. Only then, will sustainable management succeed. DayWater: an Adaptive Decision Support System for Urban Stormwater Management advances this cause of sustainable urban management through Urban stormwater management, and makes achievable (by means of risk and vulnerability tools which are included) the goal of integrated urban water management (IUWM).

Remotely Rich Jan 04 2021 Web developers who work as employees of companies are limited in their potential earnings and subject to all of the typical issues of working for someone else. I've been there and done that. I wanted more income, more freedom and more variety of projects. Remote contract-based Web developer work offers all of these benefits to programmers who are willing to run their own business and work hard. I've created and tested a unique strategy to build a very high revenue business. It's the only method I've found that allows reasonably skilled developers to earn mid-six figure incomes. If you are a relatively new developer, I truly believe that you can build the core skills to accomplish what I have done. For more seasoned developers, I have no doubt that you can use my strategy to earn the income that you dream about.

A Year with Swollen Appendices May 08 2021 The diary and essays of Brian Eno republished twenty-five years on with a new introduction by the artist in a beautiful hardback edition. 'A cranium tour of one of the most creative minds of our age . . . [Eno] delivers razor-sharp commentary with devilish snarkiness and brutal honesty.' Wired At the end of 1994, Brian Eno resolved to keep a diary. His plans to go to the cinema, theatre and galleries fell quickly to the wayside. What he did do - and write - however, was astonishing: ruminations on his collaborative work with David Bowie, U2, James and Jah Wobble, interspersed with correspondence and essays dating back to 1978. These 'appendices' covered topics from the generative and ambient music Eno pioneered to what he believed the role of an artist and their art to be, alongside adroit commentary on quotidian tribulations and happenings around the world. An intimate insight into one of the most influential creative artists of our time, *A Year with Swollen Appendices* is an essential classic.

Social Entrepreneurship and Social Innovation Sep 19 2019 This book provides comprehensive and advanced analysis of the characteristics of social entrepreneurship in Europe. It offers innovative, up-to-date research on the ecosystems of social entrepreneurship, the behavior of social entrepreneurs, their ability to produce social innovation, social capital and social inclusion, and the role of stakeholders in fostering socially oriented businesses. Moreover, it addresses the diversity of the European social enterprise sector from an evolutionary perspective, with particular reference to the rise of social entrepreneurship and the role of new-generation social entrepreneurs throughout Europe. Multidisciplinary contributions authored by experts from business and accounting, economics, and sociology serve the purpose of delivering a holistic study of social entrepreneurship, also providing the necessary data for delivering policy implications on the features of the most effective enabling social and institutional ecosystems. The broad approach, based on different theoretical frameworks and methodologies across numerous disciplines, enables the authors to tackle all of the complex research issues connected to social entrepreneurship in the region. The book builds on the results of the European Union 7FP (European Union's Research and Innovation funding program for 2007–2013)-funded "EFESSEIS – Enabling the flourishing and evolution of social entrepreneurship for innovative and inclusive societies" research project. The central theme of the book is an evolutionary perspective on the dynamics and the rise of the social enterprise in Europe. This

evolutionary perspective can be used in an economic as well as a social longitudinal analysis of changing contexts and entrepreneurial practices. The evolutionary perspective will be used as a tool to account for the specificity of developmental pathways in different contexts and countries.

Making the DSM-5 Oct 01 2020 In 2013, the American Psychiatric Association published the 5th edition of its Diagnostic and Statistical Manual of Mental Disorders (DSM-5). Often referred to as the “bible” of psychiatry, the manual only classifies mental disorders and does not explain them or guide their treatment. While science should be the basis of any diagnostic system, to date, there is no knowledge on whether most conditions listed in the manual are true diseases. Moreover, in DSM-5 the overall definition of mental disorder is weak, failing to distinguish psychopathology from normality. In spite of all the progress that has been made in neuroscience over the last few decades, the psychiatric community is no closer to understanding the etiology and pathogenesis of mental disorders than it was fifty years ago. In *Making the DSM-5*, prominent experts delve into the debate about psychiatric nosology and examine the conceptual and pragmatic issues underlying the new manual. While retracing the historic controversy over DSM, considering the political context and economic impact of the manual, and focusing on what was revised or left unchanged in the new edition, this timely volume addresses the main concerns of the future of psychiatry and questions whether the DSM legacy can truly improve the specialty and advance its goals.

No Medium Jun 28 2020 Close readings of ostensibly “blank” works—from unprinted pages to silent music—that point to a new understanding of media. In *No Medium*, Craig Dworkin looks at works that are blank, erased, clear, or silent, writing critically and substantively about works for which there would seem to be not only nothing to see but nothing to say. Examined closely, these ostensibly contentless works of art, literature, and music point to a new understanding of media and the limits of the artistic object. Dworkin considers works predicated on blank sheets of paper, from a fictional collection of poems in Jean Cocteau's *Orphée* to the actual publication of a ream of typing paper as a book of poetry; he compares Robert Rauschenberg's *Erased De Kooning Drawing* to the artist Nick Thurston's erased copy of Maurice Blanchot's *The Space of Literature* (in which only Thurston's marginalia were visible); and he scrutinizes the sexual politics of photographic representation and the implications of obscured or obliterated subjects of photographs. Reexamining the famous case of John Cage's *4'33"*, Dworkin links Cage's composition to Rauschenberg's *White Paintings*, Ken Friedman's *Zen for Record* (and Nam June Paik's *Zen for Film*), and other works, offering also a “guide to further listening” that surveys more than 100 scores and recordings of “silent” music. Dworkin argues that we should understand media not as blank, base things but as social events, and that there is no medium, understood in isolation, but only and always a plurality of media: interpretive activities taking place in socially inscribed space.

Leaving Breezy Street Aug 11 2021 Told in an inimitable voice, *Leaving Breezy Street* is the stunning account of Brenda Myers-Powell's brutal and beautiful life. “Careful—don't think prostitution is just about money. It's never just the money. It's about slipping in at all the wrong places. Getting into dangerous situations and getting out of them. That's exciting. That's what you want. But you want something else, too.” What did Brenda Myers-Powell want? When she turned to prostitution at the age of fifteen, she wanted to support her two baby daughters and have a little money for herself. She was pretty and funny as hell, and although she called herself “Breezy,” she was also tough—a survivor in every sense of the word. Over the next twenty-five years, she would move across the country, finding new pimps, parties, drugs, and endless, profound heartache. And she would begin to want something else, something huge: a life of dignity, self-acceptance, and love. Astonishingly, she managed to find the strength to break from an unsparing world and save not only herself but also future Breezys. We have no say into which worlds we are born. But sometimes we can find a way out.

Entertainment-Education Behind the Scenes Sep 12 2021 This Open Access book tracks the latest trends in the theory, research, and practice of entertainment-education, the field of communication that incorporates social change

messaging into entertaining media. Sometimes called edutainment, social impact television, narrative persuasion, or cultural strategy, this approach to social and behavior change communication offers new opportunities including transmedia and digital formats. However, making media can be a chaotic process. The realities of working in the field and the rigid structures of scholarly evaluation often act as barriers to honest accounts of entertainment-education practice. In this collection of essays, experienced practitioners offer unique insight into how entertainment-education works and present a balanced view of its potential pitfalls. This book gives readers an opportunity to learn from the successes and mistakes of the experts, taking a behind-the-scenes look at the business of making entertainment-education media.

Learn Better Feb 05 2021 For centuries, experts have argued that learning was about memorizing information: You're supposed to study facts, dates, and details; burn them into your memory; and then apply that knowledge at opportune times. But this approach to learning isn't nearly enough for the world that we live in today, and in *Learn Better* journalist and education researcher Ulrich Boser demonstrates that how we learn can matter just as much as what we learn. In this brilliantly researched book, Boser maps out the new science of learning, showing how simple techniques like comprehension check-ins and making material personally relatable can help people gain expertise in dramatically better ways. He covers six key steps to help you "learn how to learn," all illuminated with fascinating stories like how Jackson Pollock developed his unique painting style and why an ancient Japanese counting device allows kids to do math at superhuman speeds. Boser's witty, engaging writing makes this book feel like a guilty pleasure, not homework. *Learn Better* will revolutionize the way students and society alike approach learning and makes the case that being smart is not an innate ability—learning is a skill everyone can master. With Boser as your guide, you will be able to fully capitalize on your brain's remarkable ability to gain new skills and open up a whole new world of possibilities.

World Development Report 2019 Nov 21 2019 Work is constantly reshaped by technological progress. New ways of production are adopted, markets expand, and societies evolve. But some changes provoke more attention than others, in part due to the vast uncertainty involved in making predictions about the future. The 2019 World Development Report will study how the nature of work is changing as a result of advances in technology today. Technological progress disrupts existing systems. A new social contract is needed to smooth the transition and guard against rising inequality. Significant investments in human capital throughout a person's lifecycle are vital to this effort. If workers are to stay competitive against machines they need to train or retool existing skills. A social protection system that includes a minimum basic level of protection for workers and citizens can complement new forms of employment. Improved private sector policies to encourage startup activity and competition can help countries compete in the digital age. Governments also need to ensure that firms pay their fair share of taxes, in part to fund this new social contract. The 2019 World Development Report presents an analysis of these issues based

upon the available evidence.

Numerical Polynomial Algebra Feb 17 2022 In many important areas of scientific computing, polynomials in one or more variables are employed in the mathematical modeling of real-life phenomena; yet most of classical computer algebra assumes exact rational data. This book is the first comprehensive treatment of the emerging area of numerical polynomial algebra, an area that falls between classical numerical analysis and classical computer algebra but, surprisingly, has received little attention so far. The author introduces a conceptual framework that permits the meaningful solution of various algebraic problems with multivariate polynomial equations whose coefficients have some indeterminacy; for this purpose, he combines approaches of both numerical linear algebra and commutative algebra. For the application scientist, Numerical Polynomial Algebra provides both a survey of polynomial problems in scientific computing that may be solved numerically and a guide to their numerical treatment. In addition, the book provides both introductory sections and novel extensions of numerical analysis and computer algebra, making it accessible to the reader with expertise in either one of these areas.
