Psychiatry Feb 24 2022 The Mount Sinai Expert Guides, published by Wiley and endorsed by Mount Sinai School of Medicine in New York, provide rapid access, point-of-care clinical information on the most common diseases in a range of different therapeutic areas. Each title focuses on a different speciality and emphasis throughout is on providing rapid-access, clear clinical guidance to aid physicians with point-of-care management of their patients. Each title is edited by a renowned specialist from Mount Sinai, normally the Chair of the department, who is responsible for recruiting key faculty members to author the chapters. A chapter template has been developed to which each chapter author must adhere, so as to ensure complete consistency across all the chapters in each book and also across every book in the series. Accompanying each book is a companion website containing accessory materials such as case studies, video clips, MCQs, patient advice and PQRI/ICD codes. Mount Sinai Expert Guides: Psychiatry will provide specialist trainees and recently qualified specialists in psychiatry with an extremely clinical, affordable and accessible handbook covering the specialty. It will be used as both a point-of-care resource in the hospital and clinical setting, and also as a refresher guide during preparation for board exams and re-certification. Focused on providing 100% clinical guidance on the most common conditions that psychologists encounter, it will present the very best in expert information in an attractive, easy to navigate informative and well-structured manner, with features such as key points, potential pitfalls, management algorithms, and national/international guidelines on treatment.

Quantum Physics is NOT Weird Sep 09 2020 Quantum Physics shows us that we create what we observe. Countless experiments confirm that it is our information which manifests reality. Matter and time are created by our observation. This is not only true when we do experiments in laboratories, but it works the same way in everyday reality. We manifest our own experiences. Science does not prove that our consciousness must be a product of our material brain. On the contrary. Consciousness emerging from the brain is just a belief. This book tells the story how physics did develop from a quest to understand nature into its current highly myopic materialistic paradigm. The profound spiritual message of Quantum Physics is ignored, to our detriment. "A wonderful, very readable book that will convince thousands upon thousands of serious readers, including students of science, why consciousness is necessary to understand quantum physics and why materialist science is not adequate. I give the book my highest recommendation." — Amit Goswami, PhD, author of The Self-Aware Universe. "A monumental book. A masterpiece in disguise" - Prof Emer dr. Dirk K.F Meijer, University of Groningen.

Disability in the Global South Jul 20 2021 This first-of-its kind volume spans the breadth of disability research and practice specifically focusing on the global South. Established and emerging scholars alongside advocates adopt a critical and interdisciplinary stance to probe, challenge and shift common held social understandings of disability in established discourses, epistemologies and practices, including those in prominent areas such as global health, disability studies and international development. Motivated by decolonizing approaches, contributors carefully weave the lived and embodied experiences of disabled people, families and communities through contextual, cultural, spatial, racial, economic, identity and geopolitical complexities and heterogeneities. Dispatches from Ghana, Lebanon, Sri Lanka, Cambodia, Venezuela among many others spotlight the complex uncertainties of modern geopolitics of coloniality; emergent forms of governance including neoliberal globalization, war and conflicts; the interstices of gender, race, ethnicity, space and religion; structural barriers to redistribution and realization of rights; and processes of disability representation. This handbook examines in rigorous depth, established practices and discourses in disability including those on development, rights, policies and practices, opening a space for critical debate on hegemonic and often unquestioned terrains. Highlights of the coverage include: Critical issues in conceptualizing disability across cultures, time and space The challenges of disability models, metrics and statistics Disability, poverty and livelihoods in urban and rural contexts Disability interstices with migration, race, ethnicity, ge nder and sexuality Disabilit y, religion and customary societies and practice · The UNCRPD, disability rights orientations and instrumentalitie · Redistributive systems including budgeting, cash transfer systems and programming. · Global South–North partnerships: intercultural methodologies in disability research. This much awaited handbook provides students, academics, practitioners and policymakers with an authoritative framework for critical thinking and debate about disability, while pushing theoretical and practical frontiers in unprecedented ways.

Hands-On Meta Learning with Python Mar 28 2022 Explore a diverse set of meta-learning algorithms and techniques to enable human-like cognition for your machine learning models using various Python frameworks Key FeaturesUnderstand the foundations of meta learning algorithmsExplore practical examples to explore various one-shot learning algorithms with its applications in TensorFlowMaster state of the art meta learning algorithms like MAML, reptile, meta SGDBook Description Meta learning is an exciting research trend in machine learning, which enables a model to understand the learning process. Unlike other ML paradigms, with meta learning you can learn from small datasets faster. Hands-On Meta Learning with Python starts by explaining the fundamentals of meta learning and helps you understand the concept of learning to learn. You will delve into various one-shot learning algorithms, like siamese, prototypical, relation and memory-augmented networks by implementing them in TensorFlow and Keras. As you make your way through the book, you will dive into state-of-the-art meta learning algorithms such as MAML, Reptile, and CAML. You will then explore how to learn quickly with Meta-SGD and discover how you can perform unsupervised learning using meta learning with CACTUs. In the concluding chapters, you will work through recent trends in meta learning such as adversarial meta learning, task agnostic meta learning, and meta imitation learning. By the end of this book, you will be familiar with state-of-the-art meta learning algorithms and able to enable human-like cognition for your machine learning models. What you will learnUnderstand the basics of meta learning methods, algorithms, and typesBuild voice and face recognition models using a siamese networkLearn the prototypical network along with its variantsBuild relation networks and matching networks from scratchImplement MAML and Reptile algorithms from scratch in PythonWork through imitation learning and adversarial meta learningExplore task agnostic meta learning and deep meta learningWho this book is for Hands-On Meta Learning with Python is for machine learning enthusiasts, AI researchers, and data scientists who want to explore meta learning as an advanced approach for training machine learning models. Working knowledge of machine learning concepts and Python programming is necessary.

Post-Tsunami Reconstruction in Indonesia Aug 21 2021 This book offers a critical analysis of gender mainstreaming initiatives in the post-tsunami context in Indonesia. Aiming to challenge the terms of the debate in gender mainstreaming and disaster reconstruction efforts, Jauhola offers an important contribution for the discussion of what 'feminisms and disasters' could be. The work provides an in-depth analysis of three governmental practices of gender mainstreaming: the use of the concept pair sex/gender; the use of gender analysis and the use of project management tools and local subversion that challenges the potential normative violence of gender mainstreaming. Providing feminist intersectional reading of gender mainstreaming the book aims to illustrate that this framework does not lack political alternatives, but rather, it offers an alternative focus for feminism and for the re-conceptualisation of 'political', and provides tools for practitioners of aid aiming to come to grips with the complexity of gender

equality policy agenda and its potential violent social consequences in global politics. Drawing on extensive field research in Aceh, this text is one of the first book length studies, and thus provides a significant addition to Indonesian literatures on intersectional analysis of gender, religion, heteronormativity, and feminist subversive practice. It is a vital resource for those interested in understanding global interconnections of localised disaster and conflict reconstruction.

Dietary Supplements and Functional Foods May 18 2021 The study of nutritional supplements has become increasingly important within research establishments and universities throughout the world, and as the market for these products continues to grow, so does the need for comprehensive scientifically sound information about the products, their properties and potential health benefits. This second edition of Dietary Supplements & Functional Foods has been fully revised and expanded. The book looks at the accepted uses of dietary supplements and also explores the wider picture, identifying common themes and principles or particular categories of supplements. Much new information across the whole spectrum of this fascinating and expanding field is included, with additional material covering changes in relevant legislation, examples of superfoods, up-to-date information and informed debate concerning vitamin D, folic acid, fish oils and antioxidants Several new sections have been added to this successful and well-received book. This book is now even more user-friendly and ideal for course use, and an invaluable reference for those working in the health sciences, and the supplements industry. Dietitians, nutritionists, food scientists and food technologists will all find much of great use and value within its covers. All universities and research establishments where these subjects are studied and taught should have copies of this excellent new edition on their shelves.

Mark. Plan. Teach. 2.0 Apr 16 2021 Fully updated edition of Ross Morrison McGill's bestselling Mark. Plan. Teach., now complete with a visual guide to the key ideas, illustrated by Oliver Caviglioli. Mark. Plan. Teach. 2.0 includes an illustrated visual booklet, a foreword by Professor Andy Hargreaves and exciting new ideas in line with current best practice, recent thinking and developments around marking and feedback. There are three things that every teacher must do: mark work, plan lessons and teach students well. This refreshed guide from Ross, bestselling author of 100 Ideas for Secondary Teachers: Outstanding Lessons, Teacher Toolkit and Just Great Teaching, is packed full of practical ideas that will help teachers refine the key elements of their profession. Mark. Plan. Teach. 2.0 shows how each stage of the teaching process informs the next, building a cyclical framework that underpins everything that teachers do. With teachers' workload still at record levels and teacher recruitment and retention the number one issue in education, ideas that really work and will help teachers not only survive but thrive in the classroom are in demand. Every idea in Mark. Plan. Teach. 2.0 can be implemented by all primary and secondary teachers at any stage of their career and will genuinely improve practice. The ideas have been tried and tested and are supported by evidence that explains why they work, including current educational research and psychological insights from Professor Tim O'Brien, leading psychologist and Honorary Professor at UCL Institute of Education.

Human Rights Issues in Tourism Apr 28 2022 This book uniquely focuses on human rights issues associated with tourism development and tourism businesses. Tourism is a manifestation of globalization and it intersects with human rights on so many levels. These implications are increasingly relevant in light of the COVID-19 pandemic and subsequent global economic hardship. Split into two main sections, the first establishes a background to human rights issues with reference to tourism, and the second provides a multi-disciplinary analysis of a range of selected human rights issues in tourism; these include displacement, security, privacy, discrimination, freedom of movement, the rights of Indigenous people, sex tourism and labour conditions. All chapters include case studies to showcase specific issues such as legal rulings or tourism policies/regulations. This book is written by a highly regarded team of authors specializing in tourism studies and human rights law. This significant volume on the interaction between tourism development and the safeguarding of human rights will be of interest to a variety of disciplines, in the fields of tourism, political science and tourism/human rights.

e-HRM Apr 04 2020 As with other parts of business, technology is having a profound effect on the world of work and management of human resources. Technology is a key enabler for faster, cheaper and better delivery of e-HR services and in some cases can have a transformational as well as unintended negative effect. Designed for the digital era, e-HRM is one of the first textbooks on these developments. It incorporates the most current and important HR technology related topics in four distinct parts under one umbrella, written by leading scholars and practitioners drawn from across the world. All the chapters have a uniform structure and pay equal attention to theory and practice with an applied focus. Learning resources of the book include chapter-wide learning objectives, case studies, debates on related burning issues, and the companion website includes lecture slides and a question bank.

Fundamentals of Human Resource Management Jul 28 2019 Fundamentals of Human Resource Management: People, Data, and Analytics provides a current, succinct, and interesting introduction to the world of HRM with a special emphasis on how data can help managers make better decisions about the people in their organizations. Authors Talya Bauer, Berrin Erdogan, David Caughlin, and Donald Truxillo use cutting-edge case studies and contemporary examples to illustrate key concepts and trends. A variety of exercises give students hands-on opportunities to practice their problem-solving, ethical decision-making, and data literacy skills. Non-HR majors and HR majors alike will learn best practices for managing talent in today's ever-evolving workplace.

Handbook of Research on Teacher Education Dec 01 2019 This comprehensive book presents emergent findings and promising results in teacher education, curriculum, assessment, teaching and learning approaches, pedagogical innovations and practices, and professional development in educating the next generation of students. What's Your Creative Type? Dec 25 2021 The greatest creators in human history -- from Mozart to Meryl Streep, Jackson Pollock to Jay-Z -- don't just have talent -- they also understand their motivations for pursuing art. What's Your Creative Type? helps artists do the same in a fun and witty way. Stepping away from the hyper-focus on how people create, What's Your Creative Type? instead explores why. By identifying your creative motivation type, you'll be able to find renewed energy, overcome creative blocks, and release the artist within. Drawing from creativity theory and personality typology, each chapter of the book is devoted to a creative type, from the A-Lister seeking recognition to the Activist who wants to change the world. What's Your Creative Type? is peppered with pop-culture studies of famous artists and illustrates each type with entertaining examples from legendary figures. Whether you're a seasoned artist or writer in search of inspiration or simply looking to explore your budding creative talents and motivations, What's Your Creative Type? has fresh and reliable advice and insight for you.

Media Management and Artificial Intelligence Sep 21 2021 This cutting-edge textbook examines contemporary media business models in the context of Artificial Intelligence (AI) and digital transformation. AI has dramatically impacted media production and distribution, from recommendation engines to synthetic humans, from video-to-text tools to natural language models. "AI is really the change agent of the media industry," answered a natural language generation model when AI was 'asked' about the subject of this book. "It will open incredible opportunities." This book seeks to explore them. The media is examined through four sections. 'Principles' maps business models and the key tools of AI. 'Platforms' covers distribution channels in Games, Streamers, Social Networks, Broadcast and Digital Publishing. 'Producers' covers the engines of content-making, including Scripted, Entertainment, Factual, Content Marketing, Creators and Music. Finally, 'Pioneers' covers emerging sectors of Podcasting, Esports, the Metaverse and other AI-driven developments. Then in each chapter, a standard value creation model is applied, mapping a single sector through development, production, distribution and monetisation. Diverse case studies are analysed from India, Nigeria, South Korea, South Africa, France, the Netherlands, the US, the UK, Denmark and China – around creative entrepreneurship, revenue models, profit drivers, rights and emerging AI tools. Questions are provided for each case, whilst chapter summaries cement learning. Applied and technology-focused, this text offers core reading for advanced undergraduate and postgraduates studying Media Management – or the relationship between Entertainment, Media and Technology. Online resources include chapter-by-chapter PowerPoint slides and an Instructor's Manual with further exercises and case studies.

The Performance of Socially Responsible Investment Funds in Europe Aug 28 2019 Socially responsible investing (SRI) is an investment approach that combines investors' financial as well as nonfinancial goals in the security selection process. Technically, investors can engage in SRI either by directly investing in companies that implement corporate social activities or by investing their money in SRI funds, which apply screening criteria to select securities. The screening process applied by the SRI funds has led to controversy among academics regarding whether the use of SRI screens in the security selection process influences the financial performance of the funds. The empirical study analyzes whether or not the screening process applied by such funds influences their financial performance. Previous research mostly has focused on analyzing the performance of SRI equity funds established in the United States. The study at hand not only includes SRI equity funds, but also SRI balanced and fixed income funds established in Europe, the biggest market for SRI globally. The study provides unexpected results that are not only of interest for investors, who want to get a better understanding of the effect on the financial performance of their portfolios in case SRI funds are added. The results are also relevant for SRI fund managers, who are interested in promoting their funds and attracting (new) investors, and for academics, whose research interests are e. g., located in the fields of SRI, fund portfolio performances and market efficiencies.

Sociology Oct 30 2019 In Sociology: Exploring the Architecture of Everyday Life, David M. Newman shows students how to see the "unfamiliar in the familiar"—to step back and see organization and predictability in their take-for-granted personal experiences. With his approachable writing style and lively personal anecdotes, the author's goal from the first edition has always been the same: to write a textbook that, in his words, "reads like a real book." Newman uses the metaphors of "architecture" and "construction," to help students understand that society is not something that just exists "out there," independently of themselves; it is a human creation that is planned, maintained, or altered by individuals. Using vivid prose, examples from current events, and the latest research findings, this fully updated Twelfth Edition presents a unique and thought-provoking overview of how society is constructed and experienced. Instead of surveying every subfield in sociology, the more streamlined coverage focuses on the individual and society, the construction of self and society, and social inequality in the context of social structures.

Corporal Punishment in Rural Schools May 30 2022 This book presents an analysis of corporal punishment practices in rural schools. It examines trends in corporal punishment at rural schools for school years from 1999-2000, 2003-2004, 2005-2006 and 2007-2008, multiple stakeholders' perspectives on corporal punishment (e.g., school staff, student and parents), and various school-specific factors including alternative discipline practices, school safety efforts, problematic student behaviours, and academic outcomes. In addition to drawing attention to the issue of corporal punishment in rural schools, it equips readers with an in-depth understanding of these practices.

Oxford Textbook of Migrant Psychiatry Jun 06 2020 Migrant psychiatry is an evolving subdiscipline within cultural psychiatry that deals with the impact of migration on the mental health of those who have migrated and those who work with these groups and provide services to them. Stress related to migration affects migrants and their extended families either directly or indirectly. The process of migration is not just a phase, but leads on to a series of adjustments, including acculturation, which may occur across generations. Factors such as changes in diet, attitudes and beliefs, and overall adjustment are important in settling down and making the individuals feel secure. This period of adjustment will depend upon the individual migrant's pre-migration experiences, migration process and post-migration experiences, but also upon an individual's personality, social support and emotional response to migration. Socio-demographic factors, such as age, gender, educational, and economic status will all play a role in post-migration adjustment. In order to understand the impact on individuals, not only the type of migration and different stressors, but also the types of psychological mechanisms at a personal level and the resources and processes at a societal level need to be explored. Despite the number of refugees and asylum seekers around the world increasing at an astonishing rate, the mental health needs of migrants are often ignored by policy makers and clinicians. The Oxford Textbook of Migrant Psychiatry is designed to serve as the comprehensive reference resource on the mental health of migrants, bringing together both theoretical and practical aspects of the mental health needs of refugees and asylum seekers for researchers and professionals. Individual chapters summarise theoretical constructs related to theories of migration, the impact of migration on mental health and adjustment, collective trauma, individual identity and diagnostic fallacies. The book also covers the practical aspects of patient management including cultural factors, ethnopsychopharmacology, therapeutic interaction and therapeutic expectation, and psychotherapy. Finally, the book will examine special clinical problems and special patient groups. Part of the authoritative Oxford Textbooks in Psychiatry series, this resource will serve as an essential reference for psychiatrists, mental health professionals, general practitioners/primary care physicians, social workers, policy makers and voluntary agencies dealing with refugees and asylum seekers.

A Faithful Guide to Philosophy Dec 13 2020 A major new introduction to Philosophy from a Christian viewpoint. A Faithful Guide to Philosophy is the only British Christian introduction to Philosophy, a book that will be used as a course textbook and by church study groups and individual readers alike. It covers subjects of central importance to the Christian worldview - the relationship between faith and reason, the objective reality or truth, goodness and beauty, the existence and nature of God, the existence of the human soul and of free will, and so on - from a philosophical viewpoint. This is the broadest range of topics covered by any Christian introduction to Philosophy and will be prized by many.

The Routledge Reviewer's Guide to Mixed Methods Analysis Nov 11 2020 The Routledge Reviewer's Guide to Mixed Methods Analysis is a groundbreaking edited book – the first devoted solely to mixed methods research analysis. The analyses, or mixed analyses. Each of the 30 seminal chapters, authored by internationally renowned scholars, provides a simple and practical introduction to a method of mixed analysis. Each chapter demonstrates "how to conduct the analysis" in easy-to-understand language. Many of the chapters present new topics that have never been written before, and all chapters offer cutting-edge approaches to analysis. The book contains the following four sections: Part I Quantitative Approaches to Qualitative Data (e.g., factor analysis of text, multidimensional scaling of qualitative data); Part II Qualitative Approaches to Quantitative Data (e.g., qualitizing data, mixed methodological discourse analysis); Part III "Inherently" Mixed Analysis Approaches (e.g., qualitative comparative analysis, mixed methods social network analysis, social media analytics as mixed analysis, GIS as mixed analysis); and Part IV Use of Software for Mixed Data Analysis (e.g., QDA Miner, WordStat, MAXQDA, NVivo, SPSS). The audience for this book includes (a) researchers, evaluators, and practitioners who conduct a variety of research projects and who are interested in using innovative analyses that will allow them to extract more from their data; (b) academics, including faculty who would use this book in their scholarship, as well as in their graduate-level courses, and graduate students who need access to a comprehensive set of mixed analysis tools for their dissertations/theses and other research assignments and projects; and (c) computer-assisted data analysis software developers who are seeking additional mixed analyses to include within their software programs.

Rapid Perioperative Care Sep 29 2019 Rapid Perioperative Care is an essential text for students and practitioners requiring up-to-date fundamental information on the perioperative environment. Covering a wide range of subjects related to perioperative practice and care, each chapter is concise and focused to guide the reader to find information quickly and effectively. This book uses a structured approach to perioperative care, starting with an introduction to the perioperative environment, anaesthetics, surgery and recovery, followed by postoperative problems and finally the roles of the Surgical Care Practitioner (SCP). Covering all the key topics in the perioperative environment, this concise and easy-to-read title is the perfect quick-reference book for students and theatre practitioners to support them in their work in clinical practice, and enable them to deliver the best possible care.

The Development Dimension Strengthening Accountability in Aid for Trade Feb 12 2021 This book looks at what the trade and development community needs to know about aid-for-trade results, what past evaluations of programmes and projects reveal about trade outcomes and impacts, and how the trade and development community could improve the performance of aid for trade interventions.

Digital Storytelling in Higher Education Nov 23 2021 This book broadens the scope and impact of digital storytelling in higher education. It outlines how to teach, research and build communities in tertiary institutions through the particular form of audio-visual communication known as digital storytelling by developing relationships across professions, workplaces and civil society. The book is framed within the context of 'The Four Scholarships' developed by the Carnegie Foundation for the advancement and redefining of teaching, including the scholarships of discovery, integration, application, and teaching and learning. Across four sections, this volume considers the potential of digital storytelling to improve, enhance and expand teaching, learning, research, and interactions with society. Written by an international range of academics, researchers and practitioners, from disciplines spanning medicine, anthropology, education, social work, film and media studies, rhetoric and the humanities, the book demonstrates the variety of ways in which digital storytelling offers solutions to key challenges within higher education for students, academics and citizens. It will be compelling reading for students and researchers working in education and sociology.

Critical Reflections on Evidence-Based Policing Jan 14 2021 Evidence-Based Practice (EBP) has over the last decade made an increasing mark in several fields, notably health and medicine, education and social welfare. In recent years it has begun to make its mark in criminal justice. As engagement with EBP has spread, it has begun to evolve from what might be regarded as a somewhat narrow doctrine and orthodoxy to something more complex and various. Often criminological research has been at odds with the assumptions, conventions and methodologies associated with first generation EBP. In that context EBP poses a challenge to the research community and existing evidence base and is, accordingly, hotly controversial. This book is a welcome and timely contribution to current debates on evidence-based practice in policing. With a sharp conceptual focus, the chapters provide a critical examination of the recent history of EBP in academic, policy and practitioner communities, evaluate key dimensions of its application to policing, challenge established understandings and pave the way for a much needed change in how research 'evidence' is perceived, generated, transferred, implemented and evaluated.

Communicating National Image through Development and Diplomacy Jun 26 2019 This edited collection draws upon interdisciplinary research to explore new dimensions in the politics of image and aid. While development communication and public diplomacy are established research fields, there is little scholarship that seeks to understand how the two areas relate to one another. However, international development doctrine in the US, UK and elsewhere increasingly suggests that they are integrated–or at the very least should be–at the level of national strategy. This timely volume considers a variety of cases in diverse regions, drawing upon a combination of theoretical and conceptual lenses that combine a focus on both aid and image. The result is a text that seeks to establish a new body of knowledge on how contemporary debates into public diplomacy, soft power and the national image are fundamentally changing not just the communication of aid, but its wider strategies, modalities and practices.

Bleeding Out Jan 02 2020 From a Harvard scholar and former Obama official, a powerful proposal for curtailing violent crime in America Urban violence is one of the most divisive and allegedly intractable issues of our time. But as Harvard scholar Thomas Abt shows in Bleeding Out, we actually possess all the tools necessary to stem violence in our cities. Coupling the latest social science with firsthand experience as a crime-fighter, Abt proposes a relentless focus on violence itself -- not drugs, gangs, or guns. Because violence is "sticky," clustering among small groups of people and places, it can be predicted and prevented using a series of smart-on-crime strategies that do not require new laws or big budgets. Bringing these strategies together, Abt offers a concrete, cost-effective plan to reduce homicides by over 50 percent in eight years, saving more than 12,000 lives nationally. Violence acts as a linchpin for urban poverty, so curbing such crime can unlock the untapped potential of our cities' most disadvantaged communities and help us to bridge the nation's larger economic and social divides. Urgent yet hopeful, Bleeding Out offers practical solutions to the national emergency of urban violence -- and challenges readers to demand action.

Psychotherapy: A Practical Introduction Aug 01 2022 Offering unique, essential coverage of the theoretical foundations and core techniques of a variety of psychotherapies, Psychotherapy: A Practical Introduction is a one-stop resource for psychiatry residents and psychiatrists beginning practice, as well as graduate trainees in psychology and clinical social work. This practical reference is an invaluable tool for understanding the common approaches fundamental to all therapies, exploring the most frequently used therapy approaches, learning evidence-based approaches for making treatment decisions, and engaging patients in safe and effective psychotherapies, regardless of treatment setting. For faculty instructors, brand new resource provides a readable, highly applicable core textbook for any introductory psychotherapy course or psychotherapy didactic series.

Essentials of Metaheuristics (Second Edition) Jun 18 2021 Interested in the Genetic Algorithm? Simulated Annealing? Ant Colony Optimization? Essentials of Metaheuristics covers these and other metaheuristics algorithms, and is intended for undergraduate students, programmers, and non-experts. The book covers a wide range of algorithms, representations, selection and modification operators, and related topics, and includes 71 figures and 135 algorithms great and small. Algorithms include: Gradient Ascent techniques, Hill-Climbing variants, Simulated Annealing, Tabu Search variants, Iterated Local Search, Evolution Strategies, the Genetic Algorithm, the Steady-State Genetic Algorithm, Differential Evolution, Particle Swarm Optimization, Genetic Programming variants, One- and Two-Population Competitive Coevolution, N-Population Cooperative Coevolution, Implicit Fitness Sharing, Deterministic Crowding, NSGA-II, SPEA2, GRASP, Ant Colony Optimization variants, Guided Local Search, LEM, PBIL, UMDA, cGA, BOA, SAMUEL, ZCS, XCS, and XCSF.

PDF Explained Nov 04 2022 At last, here's an approachable introduction to the widely used Portable Document Format. Ending Midlife Bias May 06 2020 We live at a time when the human lifespan has increased like never before. As average lifespans stretch to new lengths, what impact should this have on our values? Should our values change over the course of our ever-increasing lifespans? Nancy S. Jecker coins the term, the life stage relativity of values, to capture the idea that at different stages of our lives, different ethical concerns shift to the foreground. During early life, infants and small children hold dear the value of being cared for and nurtured by someone they trust--and their vulnerability and dependency make these the right values for them. By early adulthood and continuing into midlife, the capacity for greater physical and emotional independence gives people reason to place more emphasis on autonomy and the ability to freely choose and carry out their plan of life. During old age, heightened risk for chronic disease and disability gives us a reason to shift our focus again, emphasizing safeguarding our central capabilities and keeping our dignity and self-respect intact. Despite different values becoming central at different stages of life, we often assume the standpoint of someone in midlife, who is in the midst of planning a future adulthood that stretches out before them. Jecker coins the term, midlife bias, to refer to the privileging of midlife. Midlife bias occurs when we assume that autonomy should be our central aim at all life stages and give it priority in a wide range of ethical decisions. The privileging of midlife raises fundamental problems of fairness. It also suggests the possibility of large gaps in the ethical principles and theories at hand. Ending Midlife Bias: New Values for Old Age addresses these concerns in a step-wise fashion, focusing on later life. Jecker first introduces a philosophical framework that extends moral theorizing to older adults, addressing midlife bias, the life stage relativity of values, human capabilities and dignity, time's passage, the narrative self, and justice between old and young. She then turns to policy and practice and explores ethical issues in bioethics, long term care, personal robotic assistants, care of the dying and newly dead, ageism in medical research, the allocation of healthcare, mandatory retirement, and the future of population aging.

To Read Or Not to Read: A Question of National Consequence Aug 09 2020 Executive Summary for a report which gathers & collates the best national data available to provide a reliable & comprehensive overview of American reading today. This report relies on large, nat. studies conducted on a regular basis by U.S. fed. agencies, supplemented by academic, foundation, & business surveys. Although there has been measurable progress in recent years in reading ability at the elementary school level, all progress appears to halt as children enter their teenage years. There is a general decline in reading among teenage & adult Americans. Both reading ability & the habit of regular reading have greatly declined among college grad. The declines have demonstrable social, economic, cultural, & civic implications. Charts & tables.
