Brief Strategic Family Therapy Jan 27 2020 "Brief Strategic Family Therapy (BSFT) is a strengths based model for diagnosing and changing repetitive patterns of behavior that cause friction in families. This clinical guide to BSFT shows how practitioners can transform family interactions from conflictive to collaborative, from habitual to proactive, so the love trapped behind anger can flourish. When, for example, a teen is acting out, using drugs, or not attending school, the adults in the family need to assume leadership, and all members of the family must adapt their patterns of talking and behaving with one another for positive changes to take place. BSFT therapists aid in this process by analyzing how the family operates as a whole and the role that each member plays in the family organism. Readers of this book will learn how to engage reluctant families or family members, and structure 12 to 16 week cognitive and affective interventions that will effect powerful behavior change. Detailed clinical examples

show practitioners how to navigate family complexities, and work through the challenging decision points they present"--

Advanced Regression Models with SAS and R Sep 15 2021 Advanced Regression Models with SAS and R exposes the reader to the modern world of regression analysis. The material covered by this book consists of regression models that go beyond linear regression, including models for right-skewed, categorical and hierarchical observations. The book presents the theory as well as fully worked-out numerical examples with complete SAS and R codes for each regression. The emphasis is on model accuracy and the interpretation of results. For each regression, the fitted model is presented along with interpretation of estimated regression coefficients and prediction of response for given values of predictors. Features: Presents the theoretical framework for each regression. Discusses data that are categorical, count, proportions, right-skewed, longitudinal and hierarchical. Uses examples based on real-life consulting projects. Provides complete SAS and R codes for each example. Includes several exercises for every regression. Advanced Regression Models with SAS and R is designed as a text for an upper division undergraduate or a graduate course in regression analysis. Prior exposure to the two software packages is desired but not required. The Author: Olga Korosteleva is a Professor of Statistics at California State University, Long Beach. She teaches a large variety of statistical courses to undergraduate and master ' s students. She has published three statistical textbooks. For a number of years, she has held the position of faculty director of the statistical consulting group. Her research interests lie mostly in applications of statistical methodology through collaboration with her clients in health sciences, nursing, kinesiology, and other fields.

Girlhood May 31 2020 Girlhood, interdisciplinary and global in source, scope, and methodology, examines the centrality of girlhood in shaping women's lives. Scholars study how age and gender, along with a multitude of other identities, work together to influence the historical experience. Spanning a broad time frame from 1750 to the present, essays illuminate the various continuities and differences in girls' lives across culture and region--girls on all continents except Antarctica are represented. Case studies and essays are arranged thematically to encourage comparisons between girls' experiences in diverse locales, and to assess how girls were affected by historical developments such as colonialism, political repression, war, modernization, shifts in labor markets, migrations, and the rise of consumer culture.

The Impact of Music on Human Development and Well-Being Feb 26 2020 Music is one of the most universal ways of expression and communication in human life and is present in the everyday lives of

people of all ages and from all cultures around the world. Music represents an enjoyable activity in and of itself, but its influence goes beyond simple amusement. Listening to music, singing, playing, composing and improvising, individually and collectively, are common activities for many people: these activities not only allow the expression of personal inner states and feelings, but also can bring many positive effects to those who engage in them. There is an increasing wealth of literature concerning the wider benefits of musical activity, and research in the sciences associated with music suggests that there are many dimensions of human life (physical, social, psychological—including cognitive and emotional) which can be affected positively by music. The impact that musical activity has on human life can be found in different processes, including a transfer of learning from the musical to another cognitive domain. Abilities that have been developed through music education and training may also be effectively applied in other cognitive tasks. Engagement in successful music activity may also have a positive impact on social skills and social inclusion, thus supporting the participation of the individual in collective and collaborative musical events. The promotion of social participation through music can foster many kinds of inclusion, including intercultural, intergenerational, and support for those who are differently abled. The aim of this Research Topic is to present a diverse range of original articles that investigate and discuss, in different ways, the crucial role that musical activity can play in human development and well-being.

The Book of St. Louisans Oct 24 2019 This second edition of the biographical dictionary of leading living men of the city of St. Louis, contains many names not listed in the earlier issue, names unavoidably overlooked in a first edition, as well as a large number representing new residents of St. Louis, and others who have come into prominence since the first edition was printed.

Innovative Strategies for Heritage Language Teaching Nov 17 2021 Heritage language (HL) learning and teaching presents particularly difficult challenges. Melding cutting-edge research with innovations in teaching practice, the contributors in this volume provide practical knowledge and tools that introduce new solutions informed by linguistic, sociolinguistic, and educational research on heritage learners. Scholars address new perspectives and orientations on designing HL programs, assessing progress and proficiency, transferring research knowledge into classroom practice, and the essential question of how to define a heritage learner. Articles offer analysis and answers on multiple languages, and the result is a unique and essential text—the only comprehensive guide for heritage language learning based on the latest theory and research with suggestions for the classroom.

High Flyers Jul 25 2022 These 15 women fly outside the lines. Soar beside Black Hawk helicopter pilot turned politician Tammy Duckworth, hot air balloonist Edgora McEwan, or medevac pilot Dede Murawsky. Higher up, meet commercial and military aviators such as the Coast Guard's Ronaqua Russell, the first African American female to receive the prestigious Air Medal for her rescue efforts during Hurricane Harvey. Next, ride along with Tammie Jo Shults, whose story includes a harrowing catastrophic engine failure while in command of 148 people aboard Southwest's Flight 1380. Others share their experiences in military high-performance jets, the Stratotanker, or while flying for the Blue Angels. Reaching past the bounds of Earth are astronauts who have launched in the cramped Russian rocket, the Soyuz, orbited Earth while conducting critical science experiments, or lived aboard the International Space Station. In all cases, the women in this book faced obstacles. Throughout their rise to incredible accomplishment, these courageous go-getters persevered and endured, insisting on success. Ultimately, each succeeded on her path to flight. These diverse high-flyers are dreamers and doers who believed, despite the odds, that soaring is possible.

So, How Long Have You Been Native? Mar 21 2022 So, How Long Have You Been Native? is Alexis C. Bunten's firsthand account of what it is like to work in the Alaska cultural tourism industry. An Alaska Native and anthropologist, she spent two seasons working for a tribally owned tourism business that markets the Tlingit culture in Sitka. Bunten's narrative takes readers through the summer tour season as she is hired and trained and eventually becomes a guide. A multibillion-dollar worldwide industry, cultural tourism provides one of the most ubiquitous face-to-face interactions between peoples of different cultures and is arguably one of the primary means by which knowledge about other cultures is disseminated. Bunten goes beyond debates about who owns Native culture and has the right to "sell" it to tourists. Through a series of anecdotes, she examines issues such as how and why Natives choose to sell their culture, the cutthroat politics of business in a small town, how the cruise industry maintains its bottom line, the impact of colonization on contemporary Native peoples, the ways that traditional cultural values play a role in everyday life for contemporary Alaska Natives, and how Indigenous peoples are engaging in global enterprises on their own terms. Bunten's bottom-up approach provides a fascinating and informative look at the cultural tourism industry in Alaska.

The Cypresses Believe in God Jan 07 2021 Considered by many critics to be the greatest novel about the Spanish Civil War, this classic work by Spaniard Jose Maria Gironella is an unbiased account of the complicated events, movements and personalities that led up to the war. Beginning in 1931, Cypresses covers the next five years of political unrest, culminating in the explosion of the brutal war that wreaked such great havoc on Spain and its citizens. In his epic novel, both gripping and suspenseful, Gironella deftly portrays the human conflict, both internal and external. The most influential philosophical movements of the 20th century are embodied in various characters. Through them, the reader is introduced to every faction involved--anarchist, communist, Catholic, royalist, existentialist, and others.
